Colloidal Synthesis of Plasmonic Nanometals Luis Liz-Marzán, 2020-04-23 Noble metal nanoparticles have attracted enormous scientific and technological interest because of their unique optical properties, which are related to surface plasmon resonances. The interest in nanosized metal particles dates back to ancient societies, when metals were used in various forms as decorative elements. From the famous Lycurgus cup, made by the Romans in the 4th century AD, through thousands of stained glasses in churches and cathedrals all over medieval Europe, bright-yellow, green, or red colors have

been obtained by a touch of metallic additions during glass blowing. This peculiar interaction of light with nanometals can be widely tuned through the morphology and assembly of nanoparticles, thereby expanding the range of potential applications, from energy and information storage to biomedicine, including novel diagnostic and therapeutic methods. This book compiles recent developments that clearly illustrate the state of the art in this cutting-edge research field. It comprises different review articles written by the teams of Prof. Luis Liz-Marzán, an international leader in chemical nanotechnology who has made seminal contributions to the use of colloid chemistry methods to understand and tailor the growth of metal particles at the nanoscale. Apart from synthesis, the book also describes in detail the plasmonic properties of nanomaterials and illustrates some representative applications. This book will appeal to anyone involved in nanotechnology, nanocrystal growth, nanoplasmonics, and surface-enhanced spectroscopies.

The Learning Imperative Mark Burns, Andy Griffith, 2018-10-08 Learning is central to the long-term success of any team and is far too important to dismiss or to relegate to a 'nice to do' list. In *The Learning Imperative*, bestselling authors Burns and Griffith explore the common barriers to effective learning and present a range of practical tools and strategies to help teams bring about and reap the benefits of a more positive culture around training and development. Together they map out the key stages of the learning journey and provide a comprehensive guide for team leaders and managers who want to improve learning in their teams. They also share essential advice on the design and delivery of effective training programmes, and punctuate their instruction with a range of illuminating case studies drawn from real-life contexts across the public, private and third sectors. The book has been split into three sections. Part I sets out why creating and maintaining a learning team needs to be a high priority, and provides an easy-to-use framework to help leaders establish their team's starting points. Part II is designed to assist leaders in fostering an open-to-learning mindset in their teams offering tools to diagnose any closed-to-learning mindsets and supplying straightforward strategies to facilitate team members' development in becoming habitually reflective, curious and responsive to feedback. The final part of the book concerns the designing and leading of effective learning, whether it is packaged within a one-off session or a multi-session programme, and will help leaders ensure that the learning their team participates in is engaging, appropriately challenging and, most importantly, will develop their performance. Whether you are an experienced leader or just starting out in the role, this user-friendly manual will empower you to boost your team's performance and to make a powerful impact on their learning.
