    Meeting Wise Kathryn Parker Boudett,Elizabeth A. City,2014-08-01 This book, by two editors of Data Wise: A Step-by-Step Guide to Using Assessment Results to Improve Teaching and Learning, attempts to bring about a fundamental shift in how educators think about the meetings we attend. They make the case that these gatherings are potentially the most important venue where adult and organizational learning can take place in schools, and that making more effective use of this time is the key to increasing student achievement. In Meeting Wise, the authors show why meeting planning is a high-leverage strategy for changing how people work together in the service of school improvement. To this end, they have created a meeting-planning "checklist" to develop a common language for discussing and improving the quality of meetings. In addition, they provide guidelines for readers on "wise facilitating" and "wise participating," and also include "top tips" and common dilemmas. Simple, succinct, and practical, Meeting Wise is designed to be read and applied at every level of the educational enterprise: district leadership meetings with central office staff, charter-school management summits, principals' meetings with teachers, professional development sessions, teacher-team meetings, and even teachers' meetings with parents and students.

    Data Wise, Revised and Expanded Edition Kathryn Parker Boudett,Elizabeth A. City,Richard J. Murnane,2020-08-26 Data Wise: A Step-by-Step Guide to Using Assessment Results to Improve Teaching and Learning presents a clear and carefully tested blueprint for school leaders. It shows how examining test scores and other classroom data can become a catalyst for important schoolwide conversations that will enhance schools' abilities to capture teachers' knowledge, foster collaboration, identify obstacles to change, and enhance school culture and climate. This revised and expanded edition captures the learning that has emerged in integrating the Data Wise process into school practice and brings the book up-to-date with recent developments in education and technology including: The shift to the Common Core State Standards. New material on the "ACE Habits of Mind": practices that prioritize Action, Collaboration, and Evidence as part of transforming school culture. A new chapter on "How We Improve," based on experiences implementing Data Wise and to address two common questions: "Where do I start?" and "How long will it take?" Other revisions take into account changes in the roles of school data teams and instructional leadership teams in guiding the inquiry process. The authors have also updated exhibits, examples, and terminology throughout and have added new protocols and resources.

Journey to Improvement Alicia Grunow,Sandra Park,Brandon Bennett,2024-04-24 The challenges we face in education, health care, and social welfare are multifaceted, reflecting the complex systems in which we live. Out of urgency and often the best of intentions, organizations implement new policies, technologies, and other innovations to tackle these issues, and hope for the best. However, addressing these challenges requires more than heroic individuals with silver-bullet solutions. We need teams with diverse expertise that know how to learn together and use their collective knowledge to redesign our social systems for the improved well-being of our communities. Journey to Improvement serves as a road map for teams that are ready to follow a different path to better outcomes. Drawing on their decades of on-the-ground experience, the authors walk teams through the phases of an improvement journey from launching the team to trying ideas in practice to spreading those that work. This book highlights the personal, relational, and technical aspects of taking an improvement science approach and illustrates these ideas through real-world examples from across the social sector and around the world.

Dare to Lead Brené Brown,2018-10-09 #1 NEW YORK TIMES BESTSELLER • Brené Brown has taught us what it means to dare greatly, rise strong, and brave the wilderness. Now, based on new research conducted with leaders, change makers, and culture shifters, she's showing us how to put those ideas into practice so we can step up and lead. Don't miss the five-part Max docuseries Brené Brown: Atlas of the Heart! ONE OF BLOOMBERG'S BEST BOOKS OF THE YEAR Leadership is not about titles, status, and wielding power. A leader is anyone who takes responsibility for recognizing the potential in people and ideas, and has the courage to develop that potential. When we dare to lead, we don't pretend to have the right answers; we stay curious and ask the right questions. We don't see power as finite and hoard it; we know that power becomes infinite when we share it with others. We don't avoid difficult conversations and situations; we lean into vulnerability when it's necessary to do good work. But daring leadership in a culture defined by scarcity, fear, and uncertainty requires skill-building around traits that are deeply and uniquely human. The irony is that we're choosing not to invest in developing the hearts and minds of leaders at the exact same time as we're scrambling to figure out what we have to offer that machines and AI can't do better and faster. What can we do better? Empathy, connection, and courage, to start. Four-time #1 New York Times bestselling author Brené Brown has spent the past two decades studying the emotions and

experiences that give meaning to our lives, and the past seven years working with transformative leaders and teams spanning the globe. She found that leaders in organizations ranging from small entrepreneurial startups and family-owned businesses to nonprofits, civic organizations, and Fortune 50 companies all ask the same question: How do you cultivate braver, more daring leaders, and how do you embed the value of courage in your culture? In Dare to Lead, Brown uses research, stories, and examples to answer these questions in the no-BS style that millions of readers have come to expect and love. Brown writes, "One of the most important findings of my career is that daring leadership is a collection of four skill sets that are 100 percent teachable, observable, and measurable. It's learning and unlearning that requires brave work, tough conversations, and showing up with your whole heart. Easy? No. Because choosing courage over comfort is not always our default. Worth it? Always. We want to be brave with our lives and our work. It's why we're here." Whether you've read Daring Greatly and Rising Strong or you're new to Brené Brown's work, this book is for anyone who wants to step up and into brave leadership.
