Mind Mapping and Artificial Intelligence Jose Maria Guerrero, 2022-10-22 In the near future, we will see an increase in the development and use of all sorts of AI applications. Some of the more promising areas will be Finance, Healthcare, IoT, Manufacturing, Journalism, and Cybersecurity. Many of these applications generate a great amount of complex information. Natural Language Understanding is one of the most clear examples. Traditional ways of visualizing complex information, namely linear text, web pages and hyperlink-based applications, have serious productivity problems. Users need a lot of time to visualize the information and have problems seeing the whole picture of the results. Mind mapping is probably the only way of reducing the problems inherent in these traditional ways of visualizing complex information. Most people have no clear idea about the advantages of mind mapping or the problems created by the traditional ways of visualizing complex information. The goal of Mind Mapping and Artificial Intelligence is to provide readers with an introduction to mind mapping and artificial intelligence, to the problems of using traditional ways of visualizing complex information and as an introduction to mind mapping automation and its integration into Artificial Intelligence applications such as NLU and others. As more applications of Artificial Intelligence are developed in the near future, the need for the improvement of the visualization of the information generated will increase exponentially. Information overload will soon also happen in AI applications. This will diminish the advantages of using AI. Author José Maria Guerrero is a long-time expert in mind mapping and visualization techniques. In this book he also introduces readers to MindManager mind mapping software, which can considerably reduce the problems associated with the interpretation of complex information generated by Artificial Intelligence software. - Provides coverage of the fundamentals of mind mapping and visualization applied to Artificial Intelligence applications - Includes coverage of the scientific bases for mind mapping for the visualization of complex information - Introduces MindManager software for mind mapping - Introduces the author's MindManager toolkit for the readers to use in

development of new mind mapping applications - Includes case studies and real-world applications of MindManager for AI applications, including examples using IBM Watson NLU

Design for Learning Jenae Cohn, Michael Greer, 2023-07-25 Online learning can be so dull—or not! Enter Jenae Cohn and Michael Greer, experienced authors and teachers, who decided it was time to take on the challenge of making online learning more interesting and compelling for students. So, they met in a Zoom call, contacted Rosenfeld Media, and wrote this book, *Design for Learning: User Experience in Online Teaching and Learning* (many Zoom calls later). The book is structured to teach online learning in such a way that anyone can follow its practices and create a dynamic educational presentation. Chapters cover everything from learning about your learners and setting learning goals to building connections with learners and giving them feedback. In addition, the authors dive into the nitty-gritty details of creating online courses, including takeaways at the end of each chapter and easy-to-follow examples throughout. “I particularly appreciate how thoughtful Jenae and Michael are about considering the experience from the learner’s point of view and the emphasis they put on learner agency.” —Julie Dirksen, Author, *Design for How People Learn Together*, Jenae Cohn and Michael Greer have years of experience designing and producing online courses for students. They wanted the tone of their book to be friendly, supportive, engaging, empathetic, and thoughtful. With that in mind, they chose examples that reflected what an ordinary user might encounter on a day-to-day basis, highlighting everything from complex skills (accessibility) to the most minute details, such as “smile when you talk” for a friendlier tone. Takeaways Writing compelling content and instructional text Designing interesting text and visuals Planning and producing videos Recording sound and voice-overs Creating and facilitating live website presentations Designing surveys for class feedback Rating whether your presentation was successful Who This Book Is For Teachers, learning development professionals, and anyone tasked with designing an online course or a one-off workshop Content creators, instructional designers, user experience designers, and others who care about the experience of online learning Whether you’re a novice or experienced online instructional designer, this book will show you how to apply industry best practices, and provide how-to examples, powerful templates, and activities to craft compelling instructional content—whether text, audio, or video. Best of all—your course will never be called dull again. Frequently Asked Questions Q: How do I design a course that really keeps people’s attention online? A: When it comes to online learning, distraction is a huge concern, and engagement metrics are a big part of how designers can tell if a course is really engaging. We believe that the more targeted a course is to your specific learners and their needs, the better you’ll be able to serve them. (See Chapter 2, “Learning About Your Learners,” to understand where your learners might be coming from.) We also have specific strategies for keeping learners’ attention once the course is running (see Chapters 8, “Facilitating Live Webinar Presentations,” and 9, “Building Connections Among Learners”). Q: Is it really possible to create an online course or training that’s just as good as an on-site one? A: We think so! But it’s important for readers to recognize that an online

learning experience is really different than an on-site course. Comparing the two experiences is (forgive the cliché) like comparing apples and oranges. You have to have different expectations up front—and so do your learners. In Chapter 4, “Building a Space for Online Learning,” we explore what unique advantages and limitations there are around building a course in an online space and consider how the lessons from UX research can inform quality experiences online. Q: I’ve been asked to design a course in just a month. Will this book help me design something quickly? A: A lot of designers have tight turnarounds, so you’ll find advice that could be applied on a shorter timeline. Specifically, you can modify some of the design approaches in Chapters 2, “Learning About Your Learners,” and 3, “Setting the Foundation.” In the chapters about video planning and production (Chapters 6, “Planning Videos, and 7, “Producing Videos”), you’ll learn tips to make simpler videos in case you don’t have time for an extensive video planning and editing process.

Using six well-defined steps that she developed in her 26 years of experience as a school librarian, Deb Stanley provides practical strategies for each of the six steps of the research process accompanied by easily used and replicated lessons and handouts that are applicable and adaptable to all grade levels K-12. The Fast Track Inbound Marketing Roadmap Kavoos Stark,2022-01-01 ♦ How can my business survive in this over-saturated market? ♦ How can I cut through the noise in my market? ♦ How can I build a successful online business with no authority and no testimonials? ♦ What tools do I need to start my online business? In this book, Kavoos Stark, the german online business coach, will answer all these questions. Kavoos stepped too late into the coaching market, and the results were unsatisfying! So he stopped everything and started documenting what worked well and what didn't. He did that in four steps: □ He realized he needed to document all the problems he needed to solve. □ Then, he understood that the root of many of his obstacles was his mindset. □ After that, he started to test what works and what does not. So he found out the only activities that brought him results were inbound, so he chose to have an inbound mentality and system. That became his roadmap, and in this book, he is sharing it without holding anything back. □ He created a toolset for his customers to implement his roadmap. Each of the steps became a chapter in this book. Independent Thinking on Primary Teaching Mark Creasy, 2022-02-01 Foreword by Ian Gilbert. Primary school teachers are working harder than ever, and have more and more to do in the finite time they have with their pupils, but Mark Creasy believes it doesn't need to be like this. With rare experience in both primary and secondary phases and at leadership as well as classroom levels, Mark is ideally placed to comment on what works and what doesn't - and in this book he urges teachers to recognise that there is another way. In *Independent Thinking on Primary Teaching*, Mark encourages teachers to stop and consider the things they do daily in the classroom and presents a series of prompts, nudges and suggestions to help them achieve the same (or even better) results by working smarter, not harder. In so doing he shares a wealth of practical and easily transferable tips for immediate use in the classroom, all designed to streamline teachers' schedules and lighten their workload while enlivening children's learning. These are in no way doctrines, or silver bullets for success, and nothing that Mark advocates requires further investment of either time or money; rather, these 'working smarter' tips are geared to win teachers their evenings and weekends back, something that many more teachers need than is healthy for the

profession. Essential reading for primary school teachers. Independent Thinking on Primary Teaching is one of a number of books in the Independent Thinking On ... series from the award-winning Independent Thinking Press.
