The Raven (Illustrated) Edgar Allan Poe, 2013-09-13 This Top Five Classics illustrated edition of Edgar Allan Poe's The Raven includes: • All 25 illustrations by Gustave Doré for Harper & Brothers' 1884 edition • An informative Introduction • A detailed Biography of Edgar Allan Poe • The illustrated version and text-only version of the full poem No poem has ever received the kind of immediate and overwhelming response that Poe's "The Raven" did when it first appeared in the New York Evening Mirror on January 29, 1845. It made Poe an overnight sensation (though his great fame never brought him much wealth) and the poem, a powerfully haunting elegy to lost love, remains one of the most beloved and recognizable verses in the English language. The illustrations that accompany this Top Five Classics edition are reproductions of the renowned French artist Gustave Doré's steel-plate engravings created for Harper & Brothers' 1884 release of The Raven. It would be Doré's last commission as he died shortly after completing the 25 illustrations in January 1883. His illustrations would become famous in their own right, evoking as they do the lyrical and mystical air of Poe's masterpiece.

**Exponential Organizations** Salim Ismail, Michael S. Malone, Yuri van Geest, 2014-10-18 Frost & Sullivan's 2014 Growth, Innovation, and Leadership Book of the Year EXPONENTIAL ORGANIZATIONS should be required reading for anyone interested in the ways exponential technologies are reinventing best practices in business. —Ray Kurzweil, Director of Engineering at Google In business, performance is key. In performance, how you organize can be the key to growth. In the past five years, the business world has seen the birth of a new breed of company—the Exponential Organization—that has revolutionized how a company can accelerate its growth by using technology. An ExO can eliminate the incremental, linear way traditional companies get bigger, leveraging assets like community, big data, algorithms, and new technology into achieving performance benchmarks ten times better than its peers. Three luminaries of the business world—Salim Ismail, Yuri van Geest, and Mike Malone—have researched this phenomenon and documented ten characteristics of Exponential Organizations. Here, in EXPONENTIAL ORGANIZATIONS, they walk the reader through how any company, from a startup to a multi-national, can become an ExO, streamline its performance, and grow to the next level. EXPONENTIAL ORGANIZATIONS is the most pivotal book in its class. Salim examines the future of organizations and offers readers his insights on the concept of Exponential Organizations, because he himself embodies the strategy, structure, culture, processes, and systems of this new breed of company. —John Hagel, The Center for the Edge Chosen by Benjamin Netanyahu, Prime Minister of Israel, to be one of Bloomberg's Best Books of 2015

Results Bruce A. Pasternack,Gary L. Neilson,2005-10-18 Every company has a personality. Does yours help or hinder

your results? Does it make you fit for growth? Find out by taking the quiz that's helped 50,000 people better understand their organizations at OrgDNA.com and to learn more about Organizational DNA. Just as you can understand an individual's personality, so too can you understand a company's type—what makes it tick, what's good and bad about it. Results explains why some organizations bob and weave and roll with the punches to consistently deliver on commitments and produce great results, while others can't leave their corner of the ring without tripping on their own shoelaces. Gary Neilson and Bruce Pasternack help you identify which of the seven company types you work for—and how to keep what's good and fix what's wrong. You'll feel the shock of recognition (“That’s me, that’s my company”) as you find out whether your organization is:

- Passive-Aggressive (“everyone agrees, smiles, and nods, but nothing changes”): entrenched underground resistance makes getting anything done like trying to nail Jell-O to the wall
- Fits-and-Starts (“let 1,000 flowers bloom”): filled with smart people pulling in different directions
- Outgrown (“the good old days meet a brave new world”): reacts slowly to market developments, since it's too hard to run new ideas up the flagpole
- Overmanaged (“we're from corporate and we're here to help”): more reporting than working, as managers check on their subordinates' work so they can in turn report to their bosses
- Just-in-Time (“succeeding, but by the skin of our teeth”): can turn on a dime and create real breakthroughs but also tends to burn out its best and brightest
- Military Precision (“flying in formation”): executes brilliant strategies but usually does not deal well with events not in the playbook
- Resilient (“as good as it gets”): flexible, forward-looking, and fun; bounces back when it hits a bump in the road and never, ever rests on its laurels

For anyone who's ever said, “Wow, that's a great idea, but it'll never happen here” or “Whew, we pulled it off again, but I'm tired of all this sprinting,” Results provides robust, practical ideas for becoming and remaining a resilient business. Also available as an eBook From the Hardcover edition.

*Speculative Everything* Anthony Dunne, Fiona Raby, 2013-12-06 How to use design as a tool to create not only things but ideas, to speculate about possible futures. Today designers often focus on making technology easy to use, sexy, and consumable. In *Speculative Everything*, Anthony Dunne and Fiona Raby propose a kind of design that is used as a tool to create not only things but ideas. For them, design is a means of speculating about how things could be—to imagine possible futures. This is not the usual sort of predicting or forecasting, spotting trends and extrapolating; these kinds of predictions have been proven wrong, again and again. Instead, Dunne and Raby pose “what if” questions that are intended to open debate and discussion about the kind of future people want (and do not want). *Speculative Everything* offers a tour through an emerging cultural landscape of design ideas, ideals, and approaches. Dunne and Raby cite examples from their own

design and teaching and from other projects from fine art, design, architecture, cinema, and photography. They also draw on futurology, political theory, the philosophy of technology, and literary fiction. They show us, for example, ideas for a solar kitchen restaurant; a flypaper robotic clock; a menstruation machine; a cloud-seeding truck; a phantom-limb sensation recorder; and devices for food foraging that use the tools of synthetic biology. Dunne and Raby contend that if we speculate more—about everything—reality will become more malleable. The ideas freed by speculative design increase the odds of achieving desirable futures.
