Practices, Education and Technology in Audiovisual Translation Alejandro Bolaños García-Escribano, 2024-08-30

This book explores the intersections of education and technology in audiovisual translation, unpacking the evolution of AVT ecosystems and looking ahead to future directions for the role of technology in the translation industry and higher education. The volume begins by outlining a holistic account of audiovisual translation scholarship, which includes work on subtitling and dubbing but which has grown to encompass a wider range of practices in light of new technologies, before looking at the current landscape of translator education, including greater interest in distance education and AVT-centered curriculum design. These foundations set the stage for an examination of technological inroads which have permeated AVT practice, including the rise of cloud-based technologies and their use by major media companies. Bolaños draws parallels between these developments to demonstrate the ways in which new tools can help the ever-evolving needs of both the translation industry and higher education and in turn, foster industry-academia collaboration and the growth of new technologies through investment at the pedagogical level. This book will be of interest to students, scholars, and practitioners in translation studies, particularly those working in audiovisual translation, translation technologies, and translator training. The Open Access version of this book, available at <http://www.taylorfrancis.com>, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives (CC-BY-NC-ND) 4.0 license.

This re-telling of Macbeth from the witches point of view is brought to life by Mairghread Scott (TRANSFORMERS: Windblade, LANTERN CITY), and illustrated by talented duo Kelly & Nichole Matthews. Time Representations in the Perspective of Human Creativity Anna Piata, Adriana Gordejuela, Daniel Alcaraz Carrión, 2022-11-15 In recent years, the study of the conceptualization of time has seen a considerable growth, providing a basis for exploring the cognitive foundation of metaphor. But if metaphorical representations of time are established in the cognitive system, how are they manipulated when humans are engaged in creative expression? This is the question that the present volume addresses, on the assumption that by interrogating creativity, new insights into our understanding of time may be gained. Our view of creativity, which informs the ten chapters that compose this volume, endorses not only the extraordinary instances found in poetry and the arts (cinema, music, graphic novels, etc.), but also its more 'mundane',

everyday manifestations that appear in ordinary language use, political discourse, or TV news. Spanning across modalities (verbal, pictorial, auditory, and gestural), the exemplary expressions herein are intended to reflect the richness and diversity vis-à-vis the creativity of time representations while also pointing to the common underpinnings that motivate and constrain creativity.

Guerrilla Publishing Derek Murphy, 2017-01-24 TRAIN THE INTERNET TO SELL BOOKS FOR YOU Book marketing doesn't need to be an exhausting hamster wheel of promotion and publicity. Put your book sales on autopilot... so you can focus on writing your next bestseller. FAST AND EFFECTIVE BOOK MARKETING This book is a crash course on some of the more creative book marketing strategies I've discovered in my first year of publishing fiction. It will provide simple, actionable, measurable steps to publishing a high quality book quickly, doing only as much marketing as is necessary to launch your book like a rock star, and keep it selling enough to support you while you write another. I only mention the things I actually use, that I know work, and ignore options that don't get results. We'll discuss paid advertising, release strategies, pricing and pre-orders, book giveaways, how to target your audience, viral exposure and press coverage, marketing hacks, and how to reach your first \$1000 on Kindle. LAUNCH BIG EVEN IF YOU'RE STARTING SMALL Guerrilla is a style of warfare intended to surprise and harass enemies. It can also mean using unconventional and usually inexpensive means to generate interest or raise concern among the public. That's basically how I'll use it: book marketing strategies from the trenches to help you win the publishing war. However, instead of surprise and harass I will focus on surprise and delight. First you need to show up and get in front of the right people. Then you need to surprise and delight them. You need to be remarkable enough to be noticed. Few authors are using these strategies (yet) so it's relatively easy to outrank your competition, get more visibility and reach new readers.
