Teaching the Video Production Class David Howard,Amy Hunter,2014-01-13 This guidebook is a must-have resource for anyone teaching a television production class or running a morning news show at the elementary, middle, or high school level. Teaching a television production class is a real challenge, especially when working with the typical budget and time limitations of most elementary, middle, or high school curricula. Beyond the technical aspects of teaching this subject, what is the best way to keep students engaged and challenged while teaching them skills that will help make them college and career ready? Spanning lesson plans, video production activities, assessment, and more, this book supplies a comprehensive, step-by-step guide to teaching a television production class, using whatever equipment is readily available. It focuses on the critical aspects of how to teach television production and organize lessons, rather than the quickly evolving details of what equipment or editing software to use. The authors also provide lessons on creating and executing a daily newscast show, how to evaluate that show and collect school-wide data for further evaluation and improvement, and how to archive and mount these productions on the school website.

Editing Across Media Ross F. Collins,2013-02-05 Requirements for professional media editing have undergone enormous technological change. Editors still edit copy. But today they do much more. Mass media editors must demonstrate skills from computerized pagination to social media monitoring, from image manipulation to Search Engine Optimization. The need for editing skills is reaching far beyond traditional journalism and into all areas of mass media, from newspapers to strategic communication. Public relations practitioners are expected to edit. Even advertising creative professionals must edit. And journalists taking on new roles as social media editors need to understand editing at the speed of digital media. This textbook aims to prepare university-level students for these expanded editing roles in an age of convergence. Thirteen authors representing many years of collective media experience examine both traditional editing roles and new editing needs. While many mass media students will not become professional editors, this textbook assumes nearly all will need competent editing knowledge to produce products of professional quality. Editing, the authors believe, remains a bedrock skill for all students who hope to be successful in the mass media. Instructors considering this book for use in a course may request an examination copy here.

Understanding by Design Grant P. Wiggins,Jay McTighe,2005 What is understanding and how does it differ from knowledge? How can we determine the big ideas worth understanding? Why is understanding an important teaching goal, and how do we know when students have attained it? How can we create a rigorous and engaging curriculum that focuses on understanding and leads to improved student performance in today's high-stakes, standards-based environment? Authors Grant Wiggins and Jay McTighe answer these and many other questions in this second edition of *Understanding by Design*. Drawing on feedback from thousands of educators around the world who have used the UbD framework since its introduction in 1998, the authors have greatly revised and expanded their original work to guide educators across the K-16 spectrum in the design of curriculum, assessment, and instruction. With an improved UbD Template at its core, the book explains the rationale of backward design and explores in greater depth the meaning of such key ideas as essential questions and transfer tasks. Readers will learn why the familiar coverage- and activity-based approaches to curriculum design fall short, and how a focus on the six facets of understanding can enrich student learning. With an expanded array of practical strategies, tools, and examples from all subject areas, the book demonstrates how the research-based principles of *Understanding by Design* apply to district frameworks as well as to individual units of curriculum. Combining provocative ideas, thoughtful analysis, and tested approaches, this new edition of *Understanding by Design* offers teacher-designers a clear path to the creation of curriculum that ensures better learning and a more stimulating experience for students and teachers alike.

Worlds of Journalism Thomas Hanitzsch,Folker Hanusch,Jyotika Ramaprasad,Arnold S. de Beer,2019-06-18 How do journalists around the world view their roles and responsibilities in society? Based on a landmark study that has collected data from more than 27,500 journalists in 67 countries, *Worlds of Journalism* offers a groundbreaking analysis of the different ways journalists perceive their duties, their relationship to society and government, and the nature and meaning of

their work. Challenging assumptions of a universal definition or concept of journalism, the book maps a world populated by a rich diversity of journalistic cultures. Organized around a series of key questions on topics such as editorial autonomy, journalistic ethics, trust in social institutions, and changes in the profession, it details how the practice of journalism differs across the world in a range of political, social, and economic contexts. The book covers how journalism as an institution is created and re-created by journalists and how they experience their profession in very different ways, even as they retain a commitment to some basic, widely shared professional norms and practices. It concludes with a global classification of journalistic cultures that reflects the breadth of worldviews and orientations found in disparate countries and regions. *Worlds of Journalism* offers an ambitious, comparative global understanding of the state of journalism in a time when it is confronting a series of economic and political threats.

Romiette and Julio Sharon M. Draper, 2010-12-07 Do you feel the soul of another calling to you? Do you know in your heart that your destiny and his were meant to merge In the cosmos? We can help you find him. When Romiette Cappelle and her best friend, Destiny, decide to order The Scientific Soul Mate System from the back of Heavy Hunks magazine, they're not sure what they're getting into. But Destiny, a self-proclaimed psychic, assures Romi that for \$44.99 plus shipping and handling, it's the only way they're ever going to find out who their soul mates really are. If nothing else, maybe Romi will get some insight into that recurring dream she's been having about fire and water. But they never expect that the scented candle and tube of dream ointment will live up to their promises and merge Romiette's destiny with that of Julio Montague, a boy she's just met in the cosmos of an Internet chat room. It turns out they go to the same high school, not to mention having almost the same names as Shakespeare's famous lovers! Sweet-scented dreams of Julio have almost overtaken Romi's nightmares... ..when suddenly they return, but this time in real life. It seems the Devildogs, a local gang, violently oppose the

relationship of Romiette and Julio. Soon they find themselves haunted by the purple-clad shadows of the gang, and the fire and water of Romiette's dream merge in ways more terrifying -- and ultimately more affirming -- than even Destiny could have foreseen.

Visual Global Politics Roland Bleiker, 2018-02-13 We live in a visual age. Images and visual artefacts shape international events and our understanding of them. Photographs, film and television influence how we view and approach phenomena as diverse as war, diplomacy, financial crises and election campaigns. Other visual fields, from art and cartoons to maps, monuments and videogames, frame how politics is perceived and enacted. Drones, satellites and surveillance cameras watch us around the clock and deliver images that are then put to political use. Add to this that new technologies now allow for a rapid distribution of still and moving images around the world. Digital media platforms, such as Twitter, YouTube, Facebook and Instagram, play an important role across the political spectrum, from terrorist recruitment drives to social justice campaigns. This book offers the first comprehensive engagement with visual global politics. Written by leading experts in numerous scholarly disciplines and presented in accessible and engaging language, Visual Global Politics is a one-stop source for students, scholars and practitioners interested in understanding the crucial and persistent role of images in today's world.

Better Learning Through Structured Teaching: A Framework for the Gradual Release of Responsibility Doug Fisher, Nancy Frey, 2010-09-10 Better Learning Through Structured Teaching describes how teachers can help students develop stronger learning skills by ensuring that instruction moves from modeling and guided practice (situations where the teacher has most of the responsibility) to collaborative learning and, finally, to independent tasks. You'll find out how to use the four components of this approach to help meet critical challenges, including differentiating instruction and making effective use of class time: 1. Focus Lessons: Establishing the lesson's purpose and then modeling your own thinking for students. 2. Guided Instruction: Working with small groups of students who have similar results on performance assessments. 3. Collaborative Learning: Enabling students to discuss and negotiate with one another to create independent work, not simply one project. 4. Independent Tasks: Requiring students to use their previous knowledge to create new and authentic products. The authors explore each component using student dialogues and examples from a variety of disciplines and grade levels. They provide tips and tools for successfully implementing this instructional approach in your own classroom, including checklists for classroom setup and routines, critical questions, real-world lesson plans, and more. No matter what grade level you teach, Better Learning Through Structured Teaching is your essential guide to helping students develop and expand their capacity for authentic and long-lasting learning.

Managing Electronic Media Joan Van Tassel, 2012-09-10 This college-level media management textbook reflects the changes in the media industries that have occurred in the past decade. Today's managers must address new issues that their predecessors never faced, from the threats of professional piracy and casual copying of digital media products, to global networks, on-demand consumption, and changing business models. The book explains the new new vocabulary of media moguls, such as bandwidth, digital rights management, customer relations management, distributed work groups, centralized broadcast operations, automated playlists, server-based playout, repurposing, mobisodes, TV-to-DVD, and content management. The chapters logically unfold the ways that managers are evolving their practices to make content, market it,

and deliver it to consumers in a competitive, global digital marketplace. In addition to media companies, this book covers management processes that extend to all content-producing organizations, because today's students are as likely to produce high-quality video and Web video for ABC Computer Sales as they are for the ABC Entertainment Television Network.

Educating the Enemy Jonna Perrillo, 2022-02-25 In Educating the Enemy, Jonna Perrillo not only tells this fascinating story of Cold War educational policy, she draws an important comparison to another population of children in the El Paso public schools who received dramatically different treatment: Mexican Americans. Like everywhere else in the Southwest, Mexican children in El Paso were segregated into Mexican schools, as opposed to the American schools the German students attended. In these Mexican schools, children were penalized for speaking Spanish, which, because of residential segregation, was the only language all but a few spoke. They also prepared students for menial jobs that would keep them ensconced in Mexican American enclaves. .
