Virtualpolitik Elizabeth Mathews Losh, 2009 Government media-making, from official websites to whistleblowers' e-mail, and its sometimes unintended consequences. Today government agencies not only have official Web sites but also sponsor moderated chats, blogs, digital video clips, online tutorials, videogames, and virtual tours of national landmarks. Sophisticated online marketing campaigns target citizens with messages from the government--even as officials make news with digital gaffes involving embarrassing e-mails, instant messages, and videos. In *Virtualpolitik*, Elizabeth Losh closely examines the government's digital rhetoric in such cases and its dual role as mediamaker and regulator. Looking beyond the usual focus on interfaces, operations, and procedures, Losh analyzes the ideologies revealed in government's digital discourse, its anxieties about new online practices, and what happens when officially sanctioned material is parodied, remixed, or recontextualized by users. Losh reports on a video game that panicked the House Intelligence Committee, pedagogic and therapeutic digital products aimed at American soldiers, government Web sites in the weeks and months following 9/11, PowerPoint presentations by government officials and gadflies, e-mail as a channel for whistleblowing, digital satire of surveillance practices, national digital libraries, and computer-based training for health professionals. Losh concludes that the government's virtualpolitik--its digital realpolitik aimed at preserving its own power--is focused on regulation, casting as criminal such common online activities as file sharing, video-game play, and social networking. This policy approach, she warns, indefinitely postpones building effective institutions for electronic governance, ignores constituents' need to shape electronic identities to suit their personal politics, and misses an opportunity to learn how citizens can have meaningful interaction with the virtual manifestations of the state.

Ditch That Textbook Matt Miller, 2015-04-13 Textbooks are symbols of centuries-old education. They're often outdated

as soon as they hit students' desks. Acting by the textbook implies compliance and a lack of creativity. It's time to ditch those textbooks--and those textbook assumptions about learning In *Ditch That Textbook*, teacher and blogger Matt Miller encourages educators to throw out meaningless, pedestrian teaching and learning practices. He empowers them to evolve and improve on old, standard, teaching methods. *Ditch That Textbook* is a support system, toolbox, and manifesto to help educators free their teaching and revolutionize their classrooms.

The Ridiculously Simple Guide to Google Slides Scott La Counte,2019-08-19 How many times do you work on a presentation that you will get absolutely no feedback on and want no help? Maybe you're the type that likes to whip something up and have no practice or feedback at all? Most of us are the former. Before we stand in front of a group of people, we want to make sure we're as polished as possible. The problem is PowerPoint wasn't built like that. It was built as a desktop program that one person would use at a time. Google realized the problem and seized the opportunity when they launched Google Slides over ten years ago. Google Slides is a cloud-based presentation editor that can replace PowerPoint or Keynote. If you'd like to get the most out of the software, then let's get started! Note: This book is the Google Slides portion of the larger work: *The Ridiculously Simple Guide to Google Apps (G Suite)*

The Computer Culture Reader Joseph R. Chaney, Ken S. McAllister, Judd Ethan Ruggill, 2009-03-26 The Computer Culture Reader brings together a multi-disciplinary group of scholars to probe the underlying structures and overarching implications of the ways in which people and computers collaborate in the production of meaning. The contributors navigate the heady and sometimes terrifying atmosphere surrounding the digital revolution in an attempt to take its measure through examinations of community and modes of communication, representation, information-production, learning, work, and play. The authors address questions of art, reality, literacy, history, heroism, commerce, crime, and death, as well as specific technologies ranging from corporate web portals and computer games to social networking applications and virtual museums. In all, the essayists work around and through the notion that the desire to communicate is at the heart of the digital age, and that the opportunity for private and public expression has taken a commanding hold on the modern imagination. The contributors argue, ultimately, that the reference field for the technological and cultural changes at the root of the digital revolution extends well beyond any specific locality, nationality, discourse, or discipline. Consequently, this volume advocates for an adaptable perspective that delivers new insights about the robust and fragile relationships between computers and people.

Slides for Students Gary D. Fisk, 2018-10-16 300 million powerpoint presentations are given daily, yet there is a disconnect between the amazing technology of powerpoint and a mediocre student learning experience. To unleash the full potential of powerpoint presentations, we must do a better job of creating presentations that fit the educational needs of students. Slides for Students does just that. Slides for Students is an open and honest discussion about powerpoint in the classroom. A need exists for thoughtfully designed and implemented classroom instruction that focuses on the learner rather than on the technology. This book was written to translate academic research findings into practical suggestions about powerpoint that educators can use. Divided into two parts, Slides for Students discusses the history of powerpoint, explores academic studies on the topic, and demonstrates how to design slides to best suit educational needs and engage with students to avoid the dreaded death by powerpoint.
