Joan Garry's Guide to Nonprofit Leadership Joan Garry,2017-03-06 Nonprofit leadership is messy Nonprofits leaders are optimistic by nature. They believe with time, energy, smarts, strategy and sheer will, they can change the world. But as staff or board leader, you know nonprofits present unique challenges. Too many cooks, not enough money, an abundance of passion. It's enough to make you feel overwhelmed and alone. The people you help need you to be successful. But there are so many obstacles: a micromanaging board that doesn't understand its true role; insufficient fundraising and donors who make unreasonable demands; unclear and inconsistent messaging and marketing; a leader who's a star in her sector but a difficult boss... And yet, many nonprofits do thrive. Joan Garry's Guide to Nonprofit Leadership will show you how to do just that. Funny, honest, intensely actionable, and based on her decades of experience, this is the book Joan Garry wishes she had when she led GLAAD out of a financial crisis in 1997. Joan will teach you how to: Build a powerhouse board Create an impressive and sustainable fundraising program Become seen as a 'workplace of choice' Be a compelling public face of your nonprofit This book will renew your passion for your mission and organization, and help you make a bigger difference in the world.

This comprehensive guide is for all nonprofits that are required to comply with financial reporting standards set by the IRS and thirty-five state charity regulators (Form 990), FASB and AICPA (GAAP), grantmakers, and the like. It shows how to unify financial reporting requirements without compromising the organization's accuracy and accountability. Authors Russy D. Sumariwalla and Wilson C. Levis combine over fifty years of experience in nonprofit accounting and reporting to describe the key elements of a unified financial reporting system. They also draw valuable lessons from a three-year project formed to improve the quality of reporting on IRS Form 990 and to strengthen public accountability. Known as 990 in 2000, this sectorwide project involved the IRS, the National Association of Attorneys General, the National Association of State Charity Officials, the Greater Washington Society of CPAs, the California Society of CPAs, the National Health Council, the United Way of America, and other organizations. Armed with the latest information, the authors discuss a unified chart of accounts, activity-level accounting, cost allocation, and computerization. They also explore ways of unifying internal and external financial reports, including GAAP statements, grant reports, and others. This guide offers a powerful resource section including information on various appendices program service reporting, government regulation, voluntary standards expert review groups, and more. Much more than a standard accounting manual, Unified Financial Reporting System for Not-for-Profit Organizations is a thoughtful guide to improving financial reporting so organizations can focus on the business of fulfilling mission, developing essential programs, and serving communities.

Missed Information David Sarokin, Jay Schulkin, 2017-09-01 How better information and better access to it improves the quality of our decisions and makes for a more vibrant participatory society. Information is power. It drives commerce, protects nations, and forms the backbone of systems that range from health care to high finance. Yet despite the avalanche of data available in today's information age, neither institutions nor individuals get the information they truly need to make well-informed decisions. Faulty information and sub-optimal decision-making create an imbalance of power that is exaggerated as governments and corporations amass enormous databases on each of us. Who has more power: the government, in possession of uncounted terabytes of data (some of it obtained by cybersnooping), or the ordinary citizen, trying to get in touch with a government agency? In *Missed Information*, David Sarokin and Jay Schulkin explore information—not information technology, but information itself—as a central part of our lives and institutions. They show that providing better information and better access to it improves the quality of our decisions and makes for a more vibrant participatory society. Sarokin and Schulkin argue that freely flowing information helps systems run more efficiently and that incomplete information does just the opposite. It's easier to comparison shop for microwave ovens than for doctors or hospitals because of information gaps that hinder the entire health-care system. Better information about such social ills as child labor and pollution can help consumers support more sustainable products. The authors examine the opacity of corporate annual reports, the impenetrability of government secrets, and emerging techniques of “information foraging.” The information imbalance of power can be reconfigured, they argue, with greater and more meaningful transparency from government and corporations.
