Teaching and Learning Online Franklin S. Allaire,Jennifer E. Killham,2022-04-01 Science is unique among the disciplines since it is inherently hands-on. However, the hands-on nature of science instruction also makes it uniquely challenging when teaching in virtual environments. How do we, as science teachers, deliver high-quality experiences in an online environment that leads to age/grade-level appropriate science content knowledge and literacy, but also collaborative experiences in the inquiry process and the nature of science? The expansion of online environments for education poses logistical and pedagogical challenges for early childhood and elementary science teachers and early learners. Despite digital media becoming more available and ubiquitous and increases in online spaces for teaching and learning (Killham et al., 2014; Wong et al., 2018), PreK-12 teachers consistently report feeling underprepared or overwhelmed by online learning environments (Molnar et al., 2021; Seaman et al., 2018). This is coupled with persistent challenges related to elementary teachers' lack of confidence and low science teaching self-efficacy (Brigido, Borrachero, Bermejo, & Mellado, 2013; Gunning & Mensah, 2011). Teaching and Learning Online: Science for Elementary Grade Levels comprises three distinct sections: Frameworks, Teacher's Journeys, and Lesson Plans. Each section explores the current trends and the unique challenges facing elementary teachers and students when teaching and learning science in online environments. All three sections include alignment with Next Generation Science Standards, tips and advice from the authors, online resources, and discussion questions to foster individual reflection as well as small group/classwide discussion. Teacher's Journeys and Lesson Plan sections use the 5E model (Bybee et al., 2006; Duran & Duran, 2004). Ideal for undergraduate teacher candidates, graduate students, teacher educators, classroom teachers, parents, and administrators, this book addresses why and how teachers use online

environments to teach science content and work with elementary students through a research-based foundation.

The Assessment Playbook for Distance and Blended Learning Douglas Fisher,Nancy Frey,Vince Bustamante,John Hattie,2020-11-04 Design assessments that measure and target student learning in both face-to-face and distance learning environments Assessments are the essential link between teaching and learning, yet the assessments used in face-to-face classrooms are not always practical or impactful in remote learning environments. Now that teachers are teaching from a distance, how will you assess what your students have learned? Tapping the expertise of teachers who are successfully engaged in distance learning, The Assessment Playbook for Distance and Blended Learning answers that question. Rich with a wide range of examples, strategies, and assessments that can be leveraged with rigor and fidelity regardless of learning environment, this practical playbook empowers teachers with the decision-making tools needed to gauge the impact of instructional strategies in today's rapidly evolving educational landscape. It features • Assessment cookies, or insights that endure in any distance or hybrid learning environment and can be used to inform assessment decisions, including the understanding that everything is searchable. • A robust playlist of distance learning assessment tools—including universal response, teach-back opportunities, composing, taking action, self-assessment, and peer assessment—that teachers can mix and deploy to match every learning intention. • Information on how to evaluate the impact of your teaching on student learning—and how assessment can guide your teaching moves • Characteristics of formal tools of evaluation, such as tests, longer essays, and performance tasks that teachers can use in distance learning environments to document learning for reporting purposes. Designed properly, assessments implemented through the lens of distance and hybrid learning can yield significant impact for student achievement, both in the pandemic teaching of today, and in the educational contexts of the future.

Taking College Teaching Seriously - Pedagogy Matters! Gail O. Mellow,Diana D. Woolis,Marisa Klages-Bombich,Susan Restler,2023-07-03 "College teaching is not rocket science – it's much, much harder." Diana Laurillard, University of LondonCollege faculty, both adjunct and full-time, stand with their students at the coalface of learning, wishing for more to succeed and disappointed at how illusory academic success is for so many. Among the array of investments colleges are making to improve student outcomes, from predictive data analysis to enhanced advising, too little attention is

paid to supporting faculty. Yet the impact of teacher and teaching on student learning is incontrovertible. Taking College Teaching Seriously: Pedagogy Matters! stands against the tide – celebrating the incredible work faculty members do each day and challenging them to expand their capacity to present their content expertise effectively. This book presents a model of embedded professional development, which capitalizes on the affordances of technology to enable groups of faculty to examine their practice in a non-evaluative context, but with a clear focus on improvement. The core of the work involves individual reflection and the design provides for an accessible way to "see" into the classrooms of discipline peers. Most importantly, the Taking College Teaching Seriously experience is not an intense one-shot, but rather a structured opportunity for a faculty member to examine and adapt practice over time and to assess the impact of changes on student learning. Faculty who have participated in the Taking College Teaching Seriously experience found it to be transformative:• English Professor, Kentucky: Participating in (the work) this year has helped me to be more reflective in every single action. I constantly analyze how each session went… (it) gave me the tools to think about every minute detail of a classroom.• Adjunct Math Professor, Mississippi: Speaking as an adjunct, I have valued the chance to share my teaching and get ideas from others. I can honestly say that this experience has been a lifeline of sorts this year. In a "magic wand" instructional setting, I'd wish for the kind of honest, respectful and professionally challenging discussions we have in Classroom Notebook* at weekly staff meetings.*Classroom Notebook is the Taking College Teaching Seriously online platform• Math Professor, NJ: I think the continual self-evaluation and reflection allowed us to work together to brainstorm improvements and positive tweaks to be more purposeful in our classrooms as opposed to just randomly reaching in the dark for ideas and techniques in HOPE of success.Taking College Teaching Seriously: Pedagogy Matters! breaks new ground in professional development. Each faculty member is at the center of the learning experience, stimulated and supported by peers working in similar contexts. They share a desire to see more students learn deeply and find that honing their skill at adapting to the learning needs of specific classes and students allows them to realize this goal. Uniquely, Taking College Teaching Seriously illuminates the link between faculty teaching expertise and improving student outcomes.The introduction to the book examines the challenges facing faculty in higher education today and reviews the literature on teaching and learning. Chapter 1 looks at the analytical foundations for all of the model's elements, from adult learning theory to communities of practice, and Chapter 2 presents the model's theory of change. Chapter 3 describes the model in detail and Chapters 4 and 5 concern the infrastructure of the faculty collaborative community, focusing on both its interpersonal and technological dimensions. The book concludes in Chapter 6 with an assessment of the value of this approach to professional development and a call to action for faculty member engagement in this important work, so essential to both professional passion and mandate.
