The Best of Dear Coquette The Coquette,2016-09-08 'Whoever The Coquette is, she's the voice of reason for these crazy times' Maria Alyokhina, Pussy Riot Dear Coquette unleashes the brutal truth about life, love, dating, sex and everything in between. For nearly a decade, The Coquette has delivered wisdom with a harsh wit and devastating elegance to the hundreds of thousands of readers who know where to come for her practical, no-nonsense advice. Rising forth from the glitter and madness of the L.A. party scene, this mysterious online oracle has evolved into one of the most insightful and conscientious voices of her generation, and Dear Coquette is consistently rated amongst the funniest and most beloved blogs on the net by publications ranging from The Guardian to The Huffington Post. Here, for the first time between hard covers, is the very best of Dear Coquette.

Urban Rehearsals and Novel Plots in the Early American City Elizabeth Klimasmith,2021 Explores how early American Republic literary texts about urban life played an important role in constructing urban spaces and identities in the young United States, and how books allowed readers to access and practice being urban.

The Force of Beauty Holly Grout,2015-05-13 The market for commercial beauty products exploded in Third Republic France, with a proliferation of goods promising to erase female imperfections and perpetuate an aesthetic of femininity that conveyed health and respectability. While the industry's meteoric growth helped to codify conventional standards of womanhood, *The Force of Beauty* goes beyond the narrative of beauty culture as a tool for sociopolitical subjugation to show how it also targeted women as important consumers in major markets and created new avenues by which they could express their identities and challenge or reinforce gender norms. As cosmetics companies and cultural media, from magazines to novels to cinema, urged women to aspire to commercial standards of female perfection, beauty evolved as a goal to be pursued rather than a biological inheritance. The products and techniques that enabled women to embody society's feminine ideal also taught them how to fashion their bodies into objects of desire and thus offered a subversive tool of self-expression. Holly Grout explores attempts by commercial beauty culture to reconcile a standard of respectability with female sexuality, as well as its efforts to position French women within the global phenomenon of changing views on modern womanhood. Grout draws on a wide range of primary sources-hygiene manuals, professional and legal debates about the right to fabricate and distribute medicines, advertisements for beauty products, and contemporary fiction and works of art-to explore how

French women navigated changing views on femininity. Her seamless integration of gender studies with business history, aesthetics, and the history of medicine results in a textured and complex study of the relationship between the politics of womanhood and the politics of beauty.

Urban Rehearsals and Novel Plots in the Early American City Betsy Klimasmith,2021-11-04 *Urban Rehearsals and Novel Plots in the Early American City* sheds new light on the literature of the early US by exploring how literature, theatre, architecture, and images worked together to allow readers to imagine themselves as urbanites even before cities developed. In the four decades following the Revolutionary War, the new nation was a loose network of nascent cities connected by print. Before a national culture could develop, local city cultures took shape; literary texts played key roles in helping new Americans become city people. Drawing on extensive archival research, *Urban Rehearsals* argues that literature, particularly novels and plays, allowed Bostonians to navigate the transition from colonial town to post-revolution city, enabled Philadelphians to grieve their experiences of the 1793 Yellow Fever epidemic and rebuild in the epidemic's aftermath, and showed New Yorkers how the domestic practices that reinforced their urbanity could be opened to the broader public. Throughout, attention to underrepresented voices and texts calls attention to the possibilities for women, immigrants, and Black Americans in developing urban spaces, while showing how those possibilities would be foreclosed as the nation developed. Balancing attention to canonical texts of the early Republic, including *The Power of Sympathy*, *Charlotte Temple*, and Benjamin Franklin's *Autobiography*, with novels whose depiction of early cities deserves greater attention, such as *Ormond*, *The Boarding-School*, *Monima*, and *Kelroy*, this volume shows how US cities developed on the pages and stages of the early Republic, building urban imaginations that would construct the nation's early cities.

Polymer Physics Leszek A. Utracki,Alexander M. 1996 IUCN Red List of Threatened Animals Ulf Gärdenfors,A. J. Stattersfield,International Union for Conservation of Nature and Natural Resources. Species Survival Commission,1996 The 1994 IUCN Red List of Threatened Animals was a major advance on its predecessors in clarity of layout and amount of information presented. This is taken further in the 1996 edition, which is also the first global compilation to use the complete new IUCN Red List category system.

Notes for a Romantic Encyclopaedia Novalis,2012-02-01 Novalis is best known in history as the poet of early German Romanticism. However, this translation of *Das Allgemeine Brouillon*, or *Universal Notebook*, finally introduces him to the English-speaking world as an extraordinarily gifted philosopher in his own right and shatters the myth of him as a mere

daydreaming and irrational poet. Composed of more than 1,100 notebook entries, this is easily Novalis's largest theoretical work and certainly one of the most remarkable and audacious undertakings of the Golden Age of German philosophy. In it, Novalis reflects on numerous aspects of human culture, including philosophy, poetry, the natural sciences, the fine arts, mathematics, mineralogy, history, and religion, and brings them all together into what he calls a Romantic Encyclopaedia or Scientific Bible. Novalis's Romantic Encyclopaedia fully embodies the author's own personal brand of philosophy, Magical Idealism. With meditations on mankind and nature, the possible future development of our faculties of reason, imagination, and the senses, and the unification of the different sciences, these notes contain a veritable treasure trove of richly poetic and philosophic thoughts.

Explosion of Deferred Dreams Mat Callahan, 2017-01-01 As the fiftieth anniversary of the Summer of Love floods the media with debates and celebrations of music, political movements, “flower power,” “acid rock,” and “hippies,” The Explosion of Deferred Dreams offers a critical reexamination of the interwoven political and musical happenings in San Francisco in the Sixties. Author, musician, and native San Franciscan Mat Callahan explores the dynamic links between the Black Panthers and Sly and the Family Stone, the United Farm Workers and Santana, the Indian Occupation of Alcatraz and the San Francisco Mime Troupe, and the New Left and the counterculture. Callahan’s meticulous, impassioned arguments both expose and reframe the political and social context for the San Francisco Sound and the vibrant subcultural uprisings with which it is associated. Using dozens of original interviews, primary sources, and personal experiences, the author shows how the intense interplay of artistic and political movements put San Francisco, briefly, in the forefront of a worldwide revolutionary upsurge. A must-read for any musician, historian, or person who “was there” (or longed to have been), The Explosion of Deferred Dreams is substantive and provocative, inviting us to reinvigorate our historical sense-making of an era that assumes a mythic role in the contemporary American zeitgeist.

The Criminal Brain, Second Edition Nicole Rafter, Chad Posick, Michael Rocque, 2016-08-30 A lively, up-to-date overview of the newest research in biosocial criminology What is the relationship between criminality and biology? Nineteenth-century phrenologists insisted that criminality was innate, inherent in the offender’s brain matter. While they were eventually repudiated as pseudo-scientists, today the pendulum has swung back. Both criminologists and biologists have begun to speak of a tantalizing but disturbing possibility: that criminality may be inherited as a set of genetic deficits that place one at risk to commit theft, violence, or acts of sexual deviance. But what do these new theories really assert? Are they as dangerous as

their forerunners, which the Nazis and other eugenicists used to sterilize, incarcerate, and even execute thousands of supposed “born” criminals? How can we prepare for a future in which leaders may propose crime-control programs based on biology? In this second edition of *The Criminal Brain*, Nicole Rafter, Chad Posick, and Michael Rocque describe early biological theories of crime and provide a lively, up-to-date overview of the newest research in biosocial criminology. New chapters introduce the theories of the latter part of the 20th century; apply and critically assess current biosocial and evolutionary theories, the developments in neuro-imaging, and recent progressions in fields such as epigenetics; and finally, provide a vision for the future of criminology and crime policy from a biosocial perspective. The book is a careful, critical examination of each research approach and conclusion. Both compiling and analyzing the body of scholarship devoted to understanding the criminal brain, this volume serves as a condensed, accessible, and contemporary exploration of biological theories of crime and their everyday relevance.

Collected Works of Velimir Khlebnikov: Letters and theoretical writings Велимир Хлебников, 1987 Dubbed by his fellow Futurists the King of Time, Velimir Khlebnikov (1885-1922) spent his entire brief life searching for a new poetic language to express his convictions about the rhythm of history, the correspondence between human behavior and the language of the stars. The result was a vast body of poetry and prose that has been called hermetic, incomprehensible, even deranged. Of all this tragic generation of Russian poets (including Blok, Esenin, and Mayakovsky), Khlebnikov has been perhaps the most praised and the more censured. This first volume of the *Collected Works*, an edition sponsored by the Dia Art Foundation, will do much to establish the counterimage of Khlebnikov as an honest, serious writer. The 117 letters published here for the first time in English reveal an ebullient, humane, impractical, but deliberate working artist. We read of the continuing involvement with his family throughout his vagabond life (pleas to his smartest sister, Vera, to break out of the mold, pleas to his scholarly father not to condemn and to send a warm overcoat); the naive pleasure he took in being applauded by other artists; his insistence that a young girl's simple verses be included in one of the typically outrageous Futurist publications of the time; his jealous fury at the appearance in Moscow of the Italian Futurist Marinetti; a first draft of his famous zoo poem (O Garden of Animals!); his seriocomic but ultimately shattering efforts to be released from army service; his inexhaustibly courageous confrontation with his own disease and excruciating poverty; and always his deadly earnest attempt to make sense of numbers, language, suffering, politics, and the exigencies of publication. The theoretical writings presented here are even more important than the letters to an understanding of Khlebnikov's creative output. In the scientific articles written before 1910, we discern foreshadowings of major patterns of later poetic work. In the pan-Slavic proclamations of 1908-1914, we find explicit connections between cultural roots and linguistic ramifications. In the semantic excursions beginning in 1915, we can see Khlebnikov's experiments with consonants, nouns, and definitions spelled out in accessible, if arid, form. The essays of 1916-1922 take us into the future of Planet Earth, visions of universal order and

accomplishment that no longer seem so farfetched but indeed resonate for modern readers.

The Leading Facts of English History David Henry Montgomery, 1886

With Languages in Mind: Musings of a Polyglot Kató Lomb, 2016-06 Kató Lomb (1909–2003) was one of the great polyglots of the 20th century. A translator and one of the first simultaneous interpreters in the world, Lomb worked in 16 languages for state and business concerns in her native Hungary. She achieved further fame by writing books on languages, interpreting, and polyglots. In 'With Languages in Mind', originally published in Hungary as 'Nyelvekről jut eszembe...' (1983), Dr. Lomb presents her views on subjects ranging from language differences, language use, the inherent compromises in interpreting, and language learning. --

Dance and Drama in French Baroque Opera Rebecca Harris-Warrick, 2016-10-27 Examines the evolving practices in music, librettos, choreographed dance, and staging throughout the history of French Baroque opera.

Contending for the "Chinese Modern" Xiaoping Wang, 2019-05-15 In *Contending for the Chinese Modern*, Xiaoping Wang studies the writing of fiction in 1940s China. Through a practice of political hermeneutics of fictional texts and social subtexts, it explores how social modernity and literary modernity intertwined with and interacted upon each other in the development of modern Chinese literature. It not only makes critical reappraisal of some renowned modern Chinese writers, but also sheds fresh lights on a series of theoretical problems pertaining to the issue of plural modernities, in which the problematic of subjectivity, class consciousness and identity politics are the key words as well as the concrete procedures that it employs to undertake the ideological analysis. The manuscript signifies a new paradigm in studies of modern Chinese literature.

The Equation that Couldn't Be Solved Mario Livio, 2005-09-19 What do Bach's compositions, Rubik's Cube, the way we choose our mates, and the physics of subatomic particles have in common? All are governed by the laws of symmetry, which elegantly unify scientific and artistic principles. Yet the mathematical language of symmetry-known as group theory-did not emerge from the study of symmetry at all, but from an equation that couldn't be solved. For thousands of years mathematicians solved progressively more difficult algebraic equations, until they encountered the quintic equation, which resisted solution for three centuries. Working independently, two great prodigies ultimately proved that the quintic cannot be solved by a simple formula. These geniuses, a Norwegian named Niels Henrik Abel and a romantic Frenchman named Évariste Galois, both died tragically young. Their incredible labor, however, produced the origins of group theory. The first extensive, popular account of the mathematics of symmetry and order, *The Equation That Couldn't Be Solved* is told not through abstract formulas but in a beautifully written and dramatic account of the lives and work of some of the greatest and most intriguing mathematicians in history.

Biosocial Worlds Jens Seeberg, Andreas Roepstorff, Lotte Meinert, 2020-09-29 Biosocial Worlds presents state-of-the-art contributions to anthropological reflections on the porous boundaries between human and non-human life – biosocial worlds. Based on changing understandings of biology and the social, it explores what it means to be human in these worlds. Growing separation of scientific disciplines for more than a century has maintained a separation of the ‘natural’ and the ‘social’ that has created a space for projections between the two. Such projections carry a directional causality and so constitute powerful means to establish discursive authority. While arguing against the separation of the biological and the social in the study of human and non-human life, it remains important to unfold the consequences of their discursive separation. Based on examples from Botswana, Denmark, Mexico, the Netherlands, Uganda, the UK and USA, the volume explores what has been created in the space between ‘the social’ and ‘the natural’, with a view to rethink ‘the biosocial’. Health topics in the book include diabetes, trauma, cancer, HIV, tuberculosis, prevention of neonatal disease and wider issues of epigenetics. Many of the chapters engage with constructions of health and disease in a wide range of environments, and engage with analysis of the concept of ‘environment’. Anthropological reflection and ethnographic case studies explore how ‘health’ and ‘environment’ are entangled in ways that move their relation beyond interdependence to one of inseparability. The subtitle of this volume captures these insights through the concept of ‘health environment’, seeking to move the engagement of anthropology and biology beyond deterministic projections.

From Violence to Blessing Vernon Neufeld Redekop, 2002-01 One of Canada's foremost leaders in conflict resolution writes about his personal experiences of infamous, long-standing conflicts in South Africa, the former Yugoslavia, Rwanda, and elsewhere. He argues that we must understand human violence if we are to keep human civilization alive. From such understanding, he is able to show how deep-rooted conflict can slowly be transformed into peace and reconciliation. Anyone who cares about violence in this world should feel that this book is for them.
