**Designing a Garden** Michael Van Valkenburgh, 2019-10-15 The intimate Monk's Garden at the Isabella Stewart Gardner Museum in Boston embodies the design principles that inform the work of noted landscape architect Michael Van Valkenburgh. In *Designing a Garden*, Van Valkenburgh presents the design of the Monk's Garden at the Isabella Stewart Gardner Museum, an intimate, walled garden that Laurie Olin has described as a masterpiece, and not a minor one. The book documents the evolution of the garden's design, which is based on the concept of meandering paths through a dreamlike woodland to create a contemplative space. Sketches and models show how the idea was worked out, and lush photographs reveal the completed garden through the seasons. Van Valkenburgh's text explores the origins of his love of landscape and plants in his family farm in Upstate New York and how this has influenced his intuitions as a designer. He shares the full background story of the Monk's Garden, focusing on the experimental nature of design work as well as the challenges and satisfactions of the small scale and the historic and cultural context. *Designing a Garden* provides a unique first-person account of the design process from the most prominent landscape architects in the country.

**The Flowering of the Landscape Garden** Mark Laird, 1999-03-23 Mark Laird offers a wealth of visual and literary materials to revolutionize our understanding of the English landscape garden as a powerful cultural expression.

*Food Not Lawns* H. C. Flores, 2006 Combines practical wisdom on ecological design and community-building with a fresh, green perspective on an age-old subject. Activist and urban gardener Heather Flores shares her nine-step permaculture design to help farmsteaders and city dwellers alike build fertile soil, promote biodiversity, and increase natural habitat in

their own paradise gardens. This joyful lifestyle manual inspires readers to apply the principles of the paradise garden--simplicity, resourcefulness, creativity, mindfulness, and community--to all aspects of life. Plant guerrilla gardens in barren intersections and medians; organize community meals; start a street theater troupe or host a local art swap; free your kitchen from refrigeration and enjoy truly fresh, nourishing foods from your own plot of land; work with children to create garden play spaces. Flores cares passionately about the damaged state of our environment and our throwaway society. Here, she shows us how to reclaim the earth, one garden at a time.--From publisher description.

Newbery-winning author Paul Fleischman uses thirteen speakers to bring to life a community garden's founding and first year. Seedfolks has been drawn upon to teach tolerance, read in ESL classes, promoted by urban gardeners, and performed in schools and on stages from South Africa to Broadway. The book's many tributaries—from the author's immigrant grandfather to his adoption of two brothers from Mexico—are detailed in his forthcoming memoir, *No Map, Great Trip: A Young Writer's Road to Page One*. The size of this slim volume belies the profound message of hope it contains. —Christian Science Monitor And don't miss *Joyful Noise: Poems for Two Voices*, the Newbery Medal-winning poetry collection!

**Human Dimension and Interior Space** Julius Panero, Martin Zelnik, 2014-01-21 The study of human body measurements on a comparative basis is known as anthropometrics. Its applicability to the design process is seen in the physical fit, or interface, between the human body and the various components of interior space. Human Dimension and Interior Space is the first major anthropometrically based reference book of design standards for use by all those involved with the physical planning and detailing of interiors, including interior designers, architects, furniture designers, builders, industrial designers, and students of design. The use of anthropometric data, although no substitute for good design or sound professional judgment should be viewed as one of the many tools required in the design process. This comprehensive overview of anthropometrics consists of three parts. The first part deals with the theory and application of anthropometrics and includes a special section dealing with physically disabled and elderly people. It provides the designer with the fundamentals of anthropometrics and a basic understanding of how interior design standards are established. The second part contains easy-to-read, illustrated anthropometric tables, which provide the most current data available on human body size, organized by age and percentile groupings. Also included is data relative to the range of joint motion and body sizes of children. The third part contains hundreds of dimensioned drawings, illustrating in plan and section the proper anthropometrically based relationship between user and space. The types of spaces range from residential and commercial to recreational and institutional, and all dimensions include metric conversions. In the Epilogue, the authors challenge the interior design profession, the building industry, and the furniture manufacturer to seriously explore the problem of adjustability in design. They expose the fallacy of designing to accommodate the so-called average man, who, in fact, does not exist. Using government data, including studies prepared by Dr. Howard Stoudt, Dr. Albert Damon, and Dr. Ross McFarland, formerly of the Harvard School of Public Health, and Jean Roberts of the U.S. Public Health Service, Panero and Zelnik have devised a system of interior design reference standards, easily understood through a series of charts and situation drawings. With Human Dimension and Interior Space, these standards are now accessible to all designers of interior environments.

*Beauty and the End of Art* Sonia Sedivy,2016-04-21 Beauty and the End of Art shows how a resurgence of interest in beauty and a sense of ending in Western art are challenging us to rethink art, beauty and their relationship. By arguing that Wittgenstein's later work and contemporary theory of perception offer just what we need for a unified approach to art and beauty, Sonia Sedivy provides new answers to these contemporary challenges. These new accounts also provide support for the Wittgensteinian realism and theory of perception that make them possible. Wittgenstein's subtle form of realism explains artworks in terms of norm governed practices that have their own varied constitutive norms and values. Wittgensteinian realism also suggests that diverse beauties become available and compelling in different cultural eras and bring a shared 'higher-order' value into view. With this framework in place, Sedivy argues that perception is a form of engagement with the world that draws on our conceptual capacities. This approach explains how perceptual experience and the perceptible presence of the world are of value, helping to account for the diversity of beauties that are available in different historical contexts and why the many faces of beauty allow us to experience the value of the world's perceptible presence. Carefully examining contemporary debates about art, aesthetics and perception, Beauty and the End of Art presents an original approach. Insights from such diverse thinkers as Immanuel Kant, Hans-Georg Gadamer and Arthur Danto, Alexander Nehamas, Elaine Scarry and Dave Hickey are woven together to reveal how they make good sense if we bring contemporary theory of perception and Wittgensteinian realism into the conversation.

*The Manager's Handbook* Alex Maccaw,2021-08-16 This handbook is the practical guide to becoming a great manager. It covers all the major topics including hiring, coaching, feedback, one-on-ones, and decision making. It also covers some of softer, but equally important, topics like conflict resolution and mental health. Great management changes lives. In fact, it's one of the most single overlooked pieces of leverage in the world. Great managers are remembered like great teachers, inspirations who help others soar. That's why it's such a shame management training is so often overlooked. Successful individual-contributors are rewarded with a 'promotion' into management and then, more often than not, left to sink or swim. If you're a new manager, this book will shine a friendly light on the road ahead. And if you're an old dog, perhaps it'll teach you a trick or two. This handbook was written by Alex MacCaw and stress-tested at a company called Clearbit.

*Sculpture and the Garden* Patrick Eyres,2017-07-05 Although the integration of sculpture in gardens is part of a long tradition dating back at least to antiquity, the sculptures themselves are often overlooked, both in the history of art and in the history of the garden. This collection of essays considers the changing relationship between sculpture and gardens over the last three centuries, focusing on four British archetypes: the Georgian landscape garden, the Victorian urban park, the outdoor spaces of twentieth-century modernism and the late-twentieth-century sculpture park. Through a series of case studies exploring the contemporaneous audiences of gardens, the book uncovers the social, political and gendered messages revealed by sculpture's placement and suggests that the garden can itself be read as a sculptural landscape.
