Slides for Students Gary D. Fisk, 2018-10-16 300 million powerpoint presentations are given daily, yet there is a disconnect between the amazing technology of powerpoint and a mediocre student learning experience. To unleash the full potential of powerpoint presentations, we must do a better job of creating presentations that fit the educational needs of students. Slides for Students does just that. Slides for Students is an open and honest discussion about powerpoint in the classroom. A need exists for thoughtfully designed and implemented classroom instruction that focuses on the learner rather than on the technology. This book was written to translate academic research findings into practical suggestions about powerpoint that educators can use. Divided into two parts, Slides for Students discusses the history of powerpoint, explores academic studies on the topic, and demonstrates how to design slides to best suit educational needs and engage with students to avoid the dreaded death by powerpoint.

Ditch That Textbook Matt Miller,2015-04-13 Textbooks are symbols of centuries-old education. They're often outdated as soon as they hit students' desks. Acting by the textbook implies compliance and a lack of creativity. It's time to ditch those textbooks--and those textbook assumptions about learning In Ditch That Textbook, teacher and blogger Matt Miller encourages educators to throw out meaningless, pedestrian teaching and learning practices. He empowers them to evolve and improve on old, standard, teaching methods. Ditch That Textbook is a support system, toolbox, and manifesto to help educators free their teaching and revolutionize their classrooms.

Better Presentations Jonathan Schwabish,2016-11-15 Whether you are a university professor, researcher at a think tank, graduate student, or analyst at a private firm, chances are that at some point you have presented your work in front of an audience. Most of us approach this task by converting a written document into slides, but the result is often a text-heavy presentation saddled with bullet points, stock images, and graphs too complex for an audience to decipher—much less understand. Presenting is fundamentally different from writing, and with only a little more time, a little more effort, and a little more planning, you can communicate your work with force and clarity. Designed for presenters of scholarly or data-intensive content, Better Presentations details essential strategies for developing clear, sophisticated, and visually captivating presentations. Following three core principles—visualize, unify, and focus—Better Presentations describes how to visualize data effectively, find and use images appropriately, choose sensible fonts and colors, edit text for powerful delivery, and restructure a written argument for maximum engagement and persuasion. With a range of clear examples for what to do (and what not to do), the practical package offered in Better Presentations shares the best techniques to display work and the best tactics for winning over audiences. It pushes presenters past the frustration and intimidation of the process to more effective, memorable, and persuasive presentations.

Move Patty Azzarello,2017-02-28 Move past the obstacles and implement your new strategy Move is your guide to mobilizing your whole organization to take your business forward. Whatever your needed transformation may be: a new initiative, a new market, a new product, your fresh strategy is up against a powerful foe: an organization's tendency to stay very busy and completely engaged what it's already doing. This book shows you how to cut through resistance and get your team engaged and proactively doing the new thing! Author Patty Azzarello draws on over twenty-five years of international business management experience to identify the chronic challenges that keep organizations from decisively executing strategy, and to give you a practical game plan for breaking through. Leaders tend to assume that stalls in execution are inevitable, unchanging parts of the workplace—but things can change. At the heart of every execution problem is the fact that there simply are not enough people doing what the business needs. This guide shows you how to get your entire

organization on board—remove the fear, excuses, and hurdles—and uphold the new pursuit against distractions and dissent. No transformation can succeed without suitable engagement from the whole organization, but building engagement can be difficult, uncomfortable, and tentative. This book shows you how to get it done. Get your organization to embrace and personally commit to the new work Remove obstacles and passive aggressive attacks that block progress Defend new strategic initiatives against short term pressures to revert to business as usual Sustain momentum and the desire to move forward Make sure no one is ever asking, 'Are we still doing this?' Inertia isn't just a law of the universe, it's a law in the workplace that can be a major obstacle to making things happen. The great thing about inertia is that it cuts two ways: a body at rest remains at rest, but a body in motion remains in motion. People love to finish things. Move shows you how to make successful execution the new norm—starting today.
