*You Don't Need a Budget* Dana Miranda, 2024-12-24 Free yourself from the tyranny of toxic budget culture, and build an ethical, stress-free financial life. Track every dollar you spend. Check your account balances once a week. Always pay off your credit card bill in full. Make a budget—and stick to it. These are just a few of the edicts you'll find in virtually every personal finance book. But this kind of rigid, one-size-fits-all advice—usually written for and by wealthy white men (and a few women) with little perspective on the money struggles that many people face—is unrealistic, and only creates stress and shame. As a financial journalist and educator, Dana Miranda is on a mission to liberate readers from budget culture: the damaging set of beliefs around money that rely on restriction, shame, and greed—much like diet culture does for food and bodies. In this long-overdue alternative to traditional budgeting advice, Miranda offers a new approach that makes money easy for everyone, regardless of the numbers in their bank account. Full of counterintuitive advice—like how to use debt to support your life goals, how to plan for retirement without a 401K, and how to take advantage of resources that exist to support those left behind by the forces of capitalism—*You Don't Need a Budget* will empower readers to get money off their mind and live the lives they want.

Applied Text Analysis with Python Benjamin Bengfort,Rebecca Bilbro,Tony Ojeda,2018-06-11 From news and speeches to informal chatter on social media, natural language is one of the richest and most underutilized sources of data. Not only does

it come in a constant stream, always changing and adapting in context; it also contains information that is not conveyed by traditional data sources. The key to unlocking natural language is through the creative application of text analytics. This practical book presents a data scientist's approach to building language-aware products with applied machine learning. You'll learn robust, repeatable, and scalable techniques for text analysis with Python, including contextual and linguistic feature engineering, vectorization, classification, topic modeling, entity resolution, graph analysis, and visual steering. By the end of the book, you'll be equipped with practical methods to solve any number of complex real-world problems. Preprocess and vectorize text into high-dimensional feature representations Perform document classification and topic modeling Steer the model selection process with visual diagnostics Extract key phrases, named entities, and graph structures to reason about data in text Build a dialog framework to enable chatbots and language-driven interaction Use Spark to scale processing power and neural networks to scale model complexity
