The Family Imprint Nancy Borowick,2017 When Photojournalist Nancy Borowick's parents--Howie and Laurel--were diagnosed with stage IV cancer and simultaneously underwent treatment, she did the only thing she knew how--she documented it. By turning the camera on her family's life during this most intimate time, Borowick learned a great deal about herself, family, and relationships in general. She discovered that her parents' marriage--while complex--was an intricate symbiosis of compassion. Their partnership and sense of family only deepened. And no matter the prognosis, there was always room for laughter. Today, Borowick, herself, is married. Her father passed away in 2013, and her mom followed suit, 364 days later. The lessons she garnered from Howie and Laurel were plentiful: always call when the airplane lands, never pass on blueberry pie--and most importantly, family is love and love is family.

*Portfolio Design* Harold Linton,Steven Rost,2003 The bible of portfolio design and production is now in its third edition, revised and expanded to include essential information on the digital and multimedia direction of portfolios today. Whether you work in architecture, urban planning, landscape or interior design, a finely tailored portfolio is the most important element to include in your application for graduate school, a design grant or competition, or to bring to a job interview. In

addition to showing you how to assemble a portfolio that will display your talents and qualifications to the best advantage, the third edition of Portfolio Design adds a chapter on digital strategies, discussing all the elements necessary to bring your work together in a digital format. Also new to this edition is commentary and analysis of selected student portfolios by three experienced professionals who offer unique insights to help you develop your own portfolio. From formats, bindings, and cases to reproduction techniques, content, style, sequencing, multimedia, and the latest in promoting yourself on the Internet, Portfolio Design addresses every aspect of portfolio planning and production. Three-hundred samples nearly half of them new to this edition drawn from a wide array of current student and professional portfolios, both print and electronic, illustrate many and varied graphic design alternatives to demonstrate what will capture the reviewer's attention and secure you an offer. Portfolio pointers from industry professionals and educators complement the practical advice given by Harold Linton, who has taught portfolio design to generations of students.

**Lighting Essentials** Don Giannatti, 2012-04-01 The core goal of photography is representing subjects that have depth and texture in a medium that inherently lacks both those qualities, and this book shows the best way to rise to that challenge: through the careful application and capture of lighting. It demonstrates how to accentuate or minimize textures, add or subtract highlights, and create or combat shadows to showcase the subjects in the best way and create the illusion of a third dimension in the images. Exploring techniques for lighting portraits, still-life subjects, nature images, and architectural shots, both studio and location lighting are covered in detail. The book teaches photographers how to study their subjects with all of the textures, colors, shapes, and surfaces they have then visualize the image as a finished photograph before the photography actually begins. With chapters that thoroughly cover the science of lighting and visualization, photographers can apply that knowledge and successfully create artful images.
