*Ditch That Textbook* Matt Miller,2015-04-13 Textbooks are symbols of centuries-old education. They're often outdated as soon as they hit students' desks. Acting by the textbook implies compliance and a lack of creativity. It's time to ditch those textbooks--and those textbook assumptions about learning In *Ditch That Textbook*, teacher and blogger Matt Miller encourages educators to throw out meaningless, pedestrian teaching and learning practices. He empowers them to evolve and improve on old, standard, teaching methods. *Ditch That Textbook* is a support system, toolbox, and manifesto to help educators free their teaching and revolutionize their classrooms.

It will challenge communications agency professionals, who are looking to get better at managing brands, including those who work in advertising, public relations, in-store marketing, digital advertising or event marketing. Most books on branding are really for the MARCOM crowd. They sound good, but you find it's all fluff when you try to take it from words to actions. **THIS BOOK IS DIFFERENT!** Graham does a wonderful job laying out the steps in clear language and goes

beyond advertising and social media to show how branding relates to all aspects of GENERAL as well as marketing management. Make no mistake: there is a strong theoretical foundation for all he says...but he spares you the buzzwords. Next year my students will all be using this book. Kenneth B. (Ken) Wong, Queen's University If you are an entrepreneur who has a great product and wants to turn it into a brand, you can use this book as a playbook. These tips will help you take full advantage of branding and marketing, and make your brand more powerful and more profitable. You will learn how to think, define, plan, execute and analyze, and I provide every tool you will ever need to run your brand. You will find models and examples for each of the four strategic thinking methods, looking at core strength, competitive, consumer and situational strategies. To define the brand, I will provide a tool for writing a brand positioning statement as well as a consumer profile and a consumer benefits ladder. I have created lists of potential functional and emotional benefits to kickstart your thinking on brand positioning. We explore the step-by-step process to come up with your brand idea and bring it all together with a tool for writing the ideal brand concept. For brand plans, I provide formats for a long-range brand strategy roadmap and the annual brand plan with definitions for each planning element. From there, I show how to build a brand execution plan that includes the creative brief, innovation process, and sales plan. I provide tools for how to create a brand calendar and specific project plans. To grow your brand, I show how to make smart decisions on execution around creative advertising and media choices. When it comes time for the analytics, I provide all the tools you need to write a deep-dive business review, looking at the marketplace, consumer, channels, competitors and the brand. Write everything so that it is easy to follow and implement for your brand. My promise to help make you smarter so you can realize your full potential.

*Good Strategy Bad Strategy* Richard Rumelt, 2011-07-19 Good Strategy/Bad Strategy clarifies the muddled thinking underlying too many strategies and provides a clear way to create and implement a powerful action-oriented strategy for the real world. Developing and implementing a strategy is the central task of a leader. A good strategy is a specific and coherent response to—and approach for—overcoming the obstacles to progress. A good strategy works by harnessing and applying power where it will have the greatest effect. Yet, Rumelt shows that there has been a growing and unfortunate tendency to equate Mom-and-apple-pie values, fluffy packages of buzzwords, motivational slogans, and financial goals with “strategy.” In *Good Strategy/Bad Strategy*, he debunks these elements of “bad strategy” and awakens an understanding of the power of a “good strategy.” He introduces nine sources of power—ranging from using leverage to effectively focusing on growth—that are eye-opening yet pragmatic tools that can easily be put to work on Monday morning, and uses fascinating examples from business, nonprofit, and military affairs to bring its original and pragmatic ideas to life. The detailed examples range from Apple to General Motors, from the two Iraq wars to Afghanistan, from a small local market to Wal-Mart, from Nvidia to Silicon Graphics, from the Getty Trust to the Los Angeles Unified School District, from Cisco Systems to Paccar, and from Global Crossing to the 2007–08 financial crisis. Reflecting an astonishing grasp and integration of economics, finance,

technology, history, and the brilliance and foibles of the human character, *Good Strategy/Bad Strategy* stems from Rumelt's decades of digging beyond the superficial to address hard questions with honesty and integrity.

**Slides for Students** Gary D. Fisk, 2018-10-16 300 million powerpoint presentations are given daily, yet there is a disconnect between the amazing technology of powerpoint and a mediocre student learning experience. To unleash the full potential of powerpoint presentations, we must do a better job of creating presentations that fit the educational needs of students. *Slides for Students* does just that. *Slides for Students* is an open and honest discussion about powerpoint in the classroom. A need exists for thoughtfully designed and implemented classroom instruction that focuses on the learner rather than on the technology. This book was written to translate academic research findings into practical suggestions about powerpoint that educators can use. Divided into two parts, *Slides for Students* discusses the history of powerpoint, explores academic studies on the topic, and demonstrates how to design slides to best suit educational needs and engage with students to avoid the dreaded death by powerpoint.

### **Microsoft PowerPoint(R) Simple Projects** Jan Rader,2004-11

Drawdown Paul Hawken,2017-04-18 • New York Times bestseller • The 100 most substantive solutions to reverse global warming, based on meticulous research by leading scientists and policymakers around the world “At this point in time, the Drawdown book is exactly what is needed; a credible, conservative solution-by-solution narrative that we can do it. Reading it is an effective inoculation against the widespread perception of doom that humanity cannot and will not solve the climate crisis. Reported by-effects include increased determination and a sense of grounded hope.” —Per Espen Stoknes, Author, What We Think About When We Try Not To Think About Global Warming “There’s been no real way for ordinary people to get an understanding of what they can do and what impact it can have. There remains no single, comprehensive, reliable compendium of carbon-reduction solutions across sectors. At least until now. . . . The public is hungry for this kind of practical wisdom.” —David Roberts, Vox “This is the ideal environmental sciences textbook—only it is too interesting and inspiring to be called a textbook.” —Peter Kareiva, Director of the Institute of the Environment and Sustainability, UCLA In the face of widespread fear and apathy, an international coalition of researchers, professionals, and scientists have come together to offer a set of realistic and bold solutions to climate change. One hundred techniques and practices are described here—some are well known; some you may have never heard of. They range from clean energy to educating girls in lower-income countries to land use practices that pull carbon out of the air. The solutions exist, are economically viable, and communities throughout the world are currently enacting them with skill and determination. If deployed collectively on a global scale over the next thirty years, they represent a credible path forward, not just to slow the earth’s warming but to reach drawdown, that point in time when greenhouse gases in the atmosphere peak and begin to decline. These measures promise cascading benefits to human health, security, prosperity, and well-being—giving us every reason to see this planetary crisis as an opportunity to create a just and livable world.

*Advanced Presentations by Design* Andrew Abela,2008-08-20 *Advanced Presentations by Design* overturns much of the conventional wisdom and practice for creating presentations. Based on over 200 research studies from the fields of communication, marketing, psychology, multimedia, and law, it provides fact-based answers to critical questions about presentation design, including how to adapt your presentation to different audience personality preferences, what role your data should play and how much of it you need, how to turn your data into a story, and how to design persuasive yet comprehensible visual layouts.

**My Buddy Knows...Letters** Keith Wheeler,2016-12-08 Say GOODBYE to boring old “A is for Apple” books and say HELLO to the exciting, playful world of “My Buddy Knows Letters” by Keith Wheeler. In book 1, My Buddy Knows Letters, children are introduced to our buddy, Josh. This blue-haired, sharp-dressed character will introduce the reader to an item with the catchphrase, “My Buddy Knows”, then a picture of the item, followed by “starts with...”. The reader then decides

what letter that item starts with. Once they think they know the answer, they can flip the page and see if they're right. My Buddy Knows the answers...Do you?

*Scaling Up* Verne Harnish,2014 In this guide, Harnish and his co-authors share practical tools and techniques to help entrepreneurs grow an industry -- dominating business without it killing them -- and actually have fun. Many growth company leaders reach a point where they actually dread adding another customer, employee, or location. It feels like they are just adding more weight to an ever-heavier anchor they are dragging through the sand. To make matters worse, the increased revenues have not turned into more profitability, so at some point they wonder if the journey is worth the effort. This book focuses on the four major decisions every company must get right: People, Strategy, Execution and Cash. The book includes a series of One-Page tools including the One-Page Strategic Plan and the Rockefeller Habits Execution Checklist, which more than 40,000 firms around the globe have used to scale their companies successfully.

Beyond Bullet Points Cliff Atkinson,2005 A guide to using Microsoft PowerPoint describes how to use stories to create effective business presentations.

**The Back of the Napkin (Expanded Edition)** Dan Roam,2009-12-31 The acclaimed bestseller about visual problem solving-now bigger and better There is no more powerful way to prove that we know something well than to draw a simple picture of it. And there is no more powerful way to see hidden solutions than to pick up a pen and draw out the pieces of our problem. So writes Dan Roam in *The Back of the Napkin*, the international bestseller that proves that a simple drawing on a humble napkin can be more powerful than the slickest PowerPoint presentation. Drawing on twenty years of experience and the latest discoveries in vision science, Roam teaches readers how to clarify any problem or sell any idea using a simple set of tools. He reveals that everyone is born with a talent for visual thinking, even those who swear they can't draw. And he shows how thinking with pictures can help you discover and develop new ideas, solve problems in unexpected ways, and dramatically improve your ability to share your insights. Take Herb Kelleher and Rollin King, who figured out how to beat the traditional hub-and-spoke airlines with a bar napkin and a pen. Three dots to represent Dallas, Houston, and San Antonio. Three arrows to show direct flights. Problem solved, and the picture made it easy to sell Southwest Airlines to investors and customers. Now with more color, bigger pictures, and additional content, this new edition does an even better job of helping you literally see the world in a new way. Join the teachers, project managers, doctors, engineers, assembly-line workers, pilots, football coaches, marine drill instructors, financial analysts, students, parents, and lawyers who have discovered the power of solving problems with pictures.
