Building PowerPoint Templates Step by Step with the Experts Echo Swinford, Julie Terberg, 2012-09-28 Building PowerPoint Templates Supercharge your PowerPoint® presentations with custom templates and themes! Want to create presentations that are more consistent and cost-effective? Presentations that fully reflect your branding? Then don't settle for Microsoft's "out-of-the-box" templates and themes: create your own! In this easy, hands-on guide, two PowerPoint MVPs teach you every skill and technique you'll need to build the perfect template—from planning and design, through theme building, custom layouts, colors, and deployment. Echo Swinford and Julie Terberg have distilled their immense PowerPoint knowledge into simple, step-by-step techniques you can use right now, whether you're using PowerPoint 2010 or 2007 for Windows, or PowerPoint 2011 for Mac. Well-built templates are the backbone of great presentations—whether building them

for your own use or designing for thousands of users, this book will guide you through the process of creating the most effective templates. Important Note: Upgrading from older versions of PowerPoint, such as PowerPoint 2003? Your old templates may no longer work. This book will help you make the transition painlessly! • Plan new templates and themes to maximize their business value for years to come • Understand the differences between templates and themes, and how they work together • Make better choices about color, fonts, and slide layouts • Create efficient templates for individual users, teams, and large organizations • Incorporate Notes and Handout Masters into your presentation templates • Provide example slides and default settings that lead to better presentations • Use Microsoft's little-known Theme Builder to create effects and background styles • Work around hidden quirks in PowerPoint's advanced template and theme features Echo Swinford, a Microsoft PowerPoint MVP since 2000, has been a featured speaker at the Presentatio Summit (formerly PowerPoint Live) since its inception. She is the expert voice and instructor behind PowerPoint 2010 LiveLessons (Video Training), the author of Fixing PowerPoint Annoyances and co-author of The PowerPoint 2007 Complete Makeover Kit. Julie Terberg is a Microsoft PowerPoint MVP and featured speaker at the Presentation Summit. She is the owner of Terberg Design and has been designing presentations since the mid-1980s. She is co-author of Perfect Medical Presentations. As contributing author for Presentations Magazine, she won awards for her Creative Techniques columns.

Ditch That Textbook Matt Miller, 2015-04-13 Textbooks are symbols of centuries-old education. They're often outdated as soon as they hit students' desks. Acting by the textbook implies compliance and a lack of creativity. It's time to ditch those textbooks--and those textbook assumptions about learning In *Ditch That Textbook*, teacher and blogger Matt Miller encourages educators to throw out meaningless, pedestrian teaching and learning practices. He empowers them to evolve and improve on old, standard, teaching methods. *Ditch That Textbook* is a support system, toolbox, and manifesto to help educators free their teaching and revolutionize their classrooms.

bookdown Yihui Xie, 2016-12-12 *bookdown: Authoring Books and Technical Documents with R Markdown* presents a much easier way to write books and technical publications than traditional tools such as LaTeX and Word. The *bookdown* package inherits the simplicity of syntax and flexibility for data analysis from R Markdown, and extends R Markdown for technical writing, so that you can make better use of document elements such as figures, tables, equations, theorems, citations, and references. Similar to LaTeX, you can number and cross-reference these elements with *bookdown*. Your document can even include live examples so readers can interact with them while reading the book. The book can be rendered to multiple output formats, including LaTeX/PDF, HTML, EPUB, and Word, thus making it easy to put your documents online. The style and theme of these output formats can be customized. We used books and R primarily for examples in this book, but *bookdown* is not only for books or R. Most features introduced in this book also apply to other types of publications: journal papers, reports, dissertations, course handouts, study notes, and even novels. You do not have

to use R, either. Other choices of computing languages include Python, C, C++, SQL, Bash, Stan, JavaScript, and so on, although R is best supported. You can also leave out computing, for example, to write a fiction. This book itself is an example of publishing with bookdown and R Markdown, and its source is fully available on GitHub.

Slides for Students Gary D. Fisk, 2018-10-16 300 million powerpoint presentations are given daily, yet there is a disconnect between the amazing technology of powerpoint and a mediocre student learning experience. To unleash the full potential of powerpoint presentations, we must do a better job of creating presentations that fit the educational needs of students. Slides for Students does just that. Slides for Students is an open and honest discussion about powerpoint in the classroom. A need exists for thoughtfully designed and implemented classroom instruction that focuses on the learner rather than on the technology. This book was written to translate academic research findings into practical suggestions about powerpoint that educators can use. Divided into two parts, Slides for Students discusses the history of powerpoint, explores academic studies on the topic, and demonstrates how to design slides to best suit educational needs and engage with students to avoid the dreaded death by powerpoint.

A Trainer's Guide to PowerPoint Mike Parkinson, 2018-10-02 Learn the Secrets Needed to Master PowerPoint for Training As a successful facilitator, you know the importance of the resources in your professional toolkit. How you engage

your audience and improve learning can be affected by how well you use them. But mastery of PowerPoint evades many. Feedback on presentations can range from “What was the point?” to “That changed my life.” Most, though, fall closer to the former. If you are looking for a guide to the PowerPoint practices that will push your presentations into the latter category, look no further. *A Trainer's Guide to PowerPoint: Best Practices for Master Presenters* is Mike Parkinson's master class on the art of PowerPoint. While Parkinson wants you to understand how amazing a tool PowerPoint is, he's the first to tell you that there is no magic button to make awesome slides. There are, however, proven processes and tools that deliver successful PowerPoint content each and every time you use them. In this book he shares them, detailing his award-winning PowerPoint process and guiding you through three phases of presentation development—discover, design, and deliver. What's more, Parkinson is a Microsoft PowerPoint MVP—most valuable professional—an honorific bestowed by Microsoft on those with “very deep knowledge of Microsoft products and services.” He shares not only his tips and best practices for presentation success, but also those from several of his fellow MVPs. Parkinson invites you to master PowerPoint as a tool—just like a paintbrush and paint—and to realize that the tool doesn't make the art, you do.

Powerful PowerPoint for Educators David M. Marcovitz, 2012-05-15 This timely book helps educators unleash the interactive potential of PowerPoint to build their own multimedia material that perfectly matches the needs of their students. While PowerPoint affords powerful capabilities for creating dynamic classroom lessons and enriching curriculum, few educators understand how to take advantage of these built-in features. The second edition of this practical guide helps educators produce creative multimedia material for their students, regardless of their level of programming proficiency. *Powerful PowerPoint for Educators: Using Visual Basic for Applications to Make PowerPoint Interactive, Second Edition* discusses the educational benefits of multimedia instruction and provides a review of intermediate PowerPoint skills. Author David Marcovitz explains the concept of Visual Basic for Applications (VBA) scripting and provides progressively advanced skills and practice examples. While other books that describe VBA are written in a highly technical manner, this book is geared toward educators with little or no programming background and includes tips for modifying the practice examples for their own interactive multimedia projects.
