Want to create presentations that are more consistent and cost-effective? Presentations that fully reflect your branding? Then don't settle for Microsoft's "out-of-the-box" templates and themes: create your own! In this easy, hands-on guide, two PowerPoint MVPs teach you every skill and technique you'll need to build the perfect template—from planning and design, through theme building, custom layouts, colors, and deployment. Well-built templates are the backbone of great presentations—whether building them for your own use or designing for thousands of users, this book will guide you through the process of creating the most effective templates. *Ghost Boys* Jewell Parker Rhodes, 2018-04-17 A heartbreaking and powerful story about a black boy killed by a police officer, drawing connections through history, from award-winning author Jewell Parker Rhodes. Only the living can make the world better. Live and make it better. Twelve-year-old Jerome is shot by a police officer who mistakes his toy gun for a real threat. As a ghost, he observes the devastation that's been unleashed on his family and community in the wake of what they see as an unjust and brutal killing. Soon Jerome meets another ghost: Emmett Till, a boy from a very different time but similar circumstances. Emmett helps Jerome process what has happened, on a journey towards recognizing how historical racism may have led to the events that ended his life. Jerome also meets Sarah, the daughter of the police officer, who grapples with her father's actions. Once again Jewell Parker Rhodes deftly weaves historical and socio-political layers into a gripping and poignant story about how children and families face the complexities of today's world, and how one boy grows to understand American blackness in the aftermath of his own death.

**The Bullet Journal Method** Ryder Carroll, 2021-12 THE NEW YORK TIMES BESTSELLER Transform your life using the Bullet Journal Method, the revolutionary organisational system and worldwide phenomenon. The Bullet Journal Method will undoubtedly transform your life, in more ways than you can imagine' Hal Elrod, author of *The Miracle Morning* In his long-awaited first book, Ryder Carroll, the creator of the enormously popular Bullet Journal organisational system, explains how to use his method to: \* TRACK YOUR PAST: using nothing more than a pen and paper, create a clear, comprehensive, and organised record of your thoughts and goals. \* ORDER YOUR PRESENT: find daily calm by prioritising and minimising your workload and tackling your to-do list in a more mindful and productive way. \* PLAN YOUR FUTURE: establish and appraise your short-term and long-term goals, plan more complex projects simply and effectively, and live your life with meaning and purpose. Like many of us, Ryder Carroll tried everything to get organised - countless apps, systems, planners, you name it. Nothing really worked. Then he invented his own simple system that required only pen and paper, which he found both effective and calming. He shared his method with a few friends, and before long he had a worldwide viral movement. The system combines elements of a wishlist, a to-do list, and a diary. It helps you identify what matters and set goals accordingly. By breaking long-term goals into small actionable steps, users map out an approachable path towards continual improvement, allowing them to stay focused despite the crush of incoming demands. But this is much more than a time management book. It's also a manifesto for what Ryder calls intentional living: making sure that your beliefs and actions align. Even if you already use a Bullet Journal, this book gives you new exercises to become more calm and focused, new insights on how to prioritise well, and a new awareness of the power of analogue tools in a digital world. \*\*\* This book has been printed with three different colour designs, black, Nordic blue and emerald. We are unable to accept requests for a specific cover. The different covers will be assigned to orders at random. \*\*\*

*The Stardust in My Soulbones* Rebekka Kaur, 2020-05-11 This book compiles poems written by a person who believes that the sky is not the limit; it never was. It is an expression of the distance traveled by the words between the home built by the human race here and the interstellar forces swarming around the Cosmos. So, the writer has nicely captured the words dipped in stardust and wisdom into beautiful poetries to make you envision beyond the mundane existence of daily life. It will take you to places covered in the space dust that you have accumulated while traveling to different places in this milky way and beyond. The poems will make you see that you are much more than the bones and blood and tissues and this world is much more than your eyes can see. Just like a spell, the words in the poems might make you see the extraordinary you, living under the human skin and also, might set you in the direction which will take you to places that are left unseen and unnoticed by the analytical mind of yours. These poems are more like chants that the writer happened to capture for you to read; so that you have something to look upon, the next time you look up in the sky. It's for you to look at what is hiding in the upper layers of the atmosphere of this blue gem. Sometimes, you just need the eyes to look at what's up there and if you

don't have them, even standing on the surface of the moon won't seem magical to you. I hope these poems will give you that kind of light to your eyes.

*Inventing the Medium* Janet H. Murray, 2011-11-23 A foundational text offering a unified design vocabulary and a common methodology for maximizing the expressive power of digital artifacts. Digital artifacts from iPads to databases pervade our lives, and the design decisions that shape them affect how we think, act, communicate, and understand the world. But the pace of change has been so rapid that technical innovation is outstripping design. Interactors are often mystified and frustrated by their enticing but confusing new devices; meanwhile, product design teams struggle to articulate shared and enduring design goals. With *Inventing the Medium*, Janet Murray provides a unified vocabulary and a common methodology for the design of digital objects and environments. It will be an essential guide for both students and practitioners in this evolving field. Murray explains that innovative interaction designers should think of all objects made with bits—whether games or Web pages, robots or the latest killer apps—as belonging to a single new medium: the digital medium. Designers can speed the process of useful and lasting innovation by focusing on the collective cultural task of inventing this new medium. Exploring strategies for maximizing the expressive power of digital artifacts, Murray identifies and examines four representational affordances of digital environments that provide the core palette for designers across applications: computational procedures, user participation, navigable space, and encyclopedic capacity. Each chapter includes a set of Design Explorations—creative exercises for students and thought experiments for practitioners—that allow readers to apply the ideas in the chapter to particular design problems. *Inventing the Medium* also provides more than 200 illustrations of specific design strategies drawn from multiple genres and platforms and a glossary of design concepts.

Techies around the world can now jump start and grow their speaking careers with the book, Present! A Techie's Guide to Public Speaking, written by tech leaders, Poornima Vijayashanker and Karen Catlin. The book serves as a resource for technology professionals who want or need to develop the skills to communicate their expertise effectively, whether in a meeting at work or delivering an engaging talk at a conference. Poornima, who is the founder of Femgineer and the founding engineer of Mint.com, collaborated with former Adobe vice president and founder of Karen Catlin Consulting, Karen Catlin, to compile and share their lessons, tips, and techniques learned from their own experiences as professional tech speakers. Karen and I wanted to write this book so that our fellow techies would have a comprehensive resource to help them with their own public speaking endeavors. So many folks in the tech industry have amazing ideas and experience, but they often feel stuck on how to present them effectively. Also, our hope is that more women will be inspired by our stories and encouraged to get out there and share their own valuable expertise through public speaking in order to boost representation of women tech speakers, Poornima said. Present! covers public speaking from A to Z. Through stories, examples, and interactive exercises, Poornima and Karen dive into topics including, overcoming stage fright, exploring personal speaking style, creating the right talk for the right audience, polishing presence and delivery, and nailing any type of talk, whether it's a lightning or long-form talk or being part of a panel. Karen said, Even though Poornima and I are professional speakers, we felt it was important to share our own feelings of nerves and uncertainty, and bumps we've had along the way - and sometimes continue to experience. It was important for us to communicate that no one is perfect and it really is okay when talks don't always go according to plan. Our hope is that by being open, we'll be able to give others the confidence and the techniques to handle situations when they arise, deliver an amazing presentation, and most importantly, have FUN!
