Better Presentations Jonathan Schwabish,2016-11-15 Whether you are a university professor, researcher at a think tank, graduate student, or analyst at a private firm, chances are that at some point you have presented your work in front of an audience. Most of us approach this task by converting a written document into slides, but the result is often a text-heavy

presentation saddled with bullet points, stock images, and graphs too complex for an audience to decipher—much less understand. Presenting is fundamentally different from writing, and with only a little more time, a little more effort, and a little more planning, you can communicate your work with force and clarity. Designed for presenters of scholarly or data-intensive content, *Better Presentations* details essential strategies for developing clear, sophisticated, and visually captivating presentations. Following three core principles—visualize, unify, and focus—*Better Presentations* describes how to visualize data effectively, find and use images appropriately, choose sensible fonts and colors, edit text for powerful delivery, and restructure a written argument for maximum engagement and persuasion. With a range of clear examples for what to do (and what not to do), the practical package offered in *Better Presentations* shares the best techniques to display work and the best tactics for winning over audiences. It pushes presenters past the frustration and intimidation of the process to more effective, memorable, and persuasive presentations.

Draw to Win Dan Roam, 2016-09-13 Get ready for the ultimate crash course in communicating and solving problems through simple pictures. Thirty-two thousand years ago, your many-times-great-grandparents Oog and Aag drew pictures on the wall of a cave. They had an innate need to communicate, but no written language. So they found an easy and natural way to share their thoughts and stories. Today, after so many years when speaking and writing dominated, we're back in another highly visual age. About 90 percent of everything shared online is now visual—selfies, GIFs, smartphone videos, and more. This explosion of communication through pictures isn't a millennial-driven fad; it's as natural as those lines first drawn by Oog and Aag. Just turbo-charged by the latest technology. And yet over the past twenty years, as I've taught people from Fortune 500 CEOs to White House staffers how to harness the power of imagery, the biggest objection I've always heard is, But I can't draw! Trust me, you can. You don't need to be da Vinci to be an outstanding visual thinker and communicator. The most effective drawings are the simplest, and you can get good at those in three minutes. In this little book, I'll teach you how to use seven basic shapes to explain just about anything to just about anyone. If you've read my previous books, you'll see one or two familiar tools here, along with a bunch of new tools you can start using right away. If you're new to my approach—welcome! Get ready to work smarter, communicate more clearly, and get better at whatever you do, just by picking up a pen. Get ready to draw to win.

Advanced Presentations by Design Andrew Abela, 2008-08-20 *Advanced Presentations by Design* overturns much of the conventional wisdom and practice for creating presentations. Based on over 200 research studies from the fields of communication, marketing, psychology, multimedia, and law, it provides fact-based answers to critical questions about

presentation design, including how to adapt your presentation to different audience personality preferences, what role your data should play and how much of it you need, how to turn your data into a story, and how to design persuasive yet comprehensible visual layouts.
