Effective Prototyping with Excel Nevin Berger, Michael Arent, Jonathan Arnowitz, Fred Sampson, 2009-01-07 Although recognized as a key to the design process, prototyping often falls victim to budget cuts, deadlines, or lack of access to sophisticated tools. This can lead to sloppy and ineffective prototypes or the abandonment of them altogether. Rather than lose this important step, people are turning to Microsoft Excel® to create effective, simple, and inexpensive prototypes. Conveniently, the software is available to nearly everyone, and most are proficient in its basic functionality. *Effective Prototyping with Excel* offers how-to guidance on how everyone can use basic Excel skills to create prototypes - ranging from narrative wire frames to hi-fidelity prototypes. A wide array of software design problems and business demands are solved via practical step-by-step examples and illustrations. - Step-by-step guide to prototyping with a simple and affordable tool nearly everyone already has on their desktop - Quickly and easily allows web and software designers to explore usability, design alternatives, and test theories prior to starting production - Perfect companion to *Effective Prototyping for Software Makers* - with the same author team and full-color treatment, useful case studies, and hands-on exercises

Pro Expression Blend 4 Andrew Troelsen, 2011-07-14 Pro Expression Blend 4 is for .NET developers and graphical artists who want to learn the ins and outs of the Expression Blend integrated development environment. You may know already that this tool can be used to build Windows Presentation Foundation (WPF), Silverlight, and Windows Phone 7 applications; however, this book will take you well beyond the basics and provide you with a detailed examination of key Blend topics, including workspace customization, graphics, layout, styles, themes, data binding, and the use of SketchFlow,

giving you an excellent understanding of the Blend product and what it can do for you. Over the course of these eight chapters, you will learn numerous techniques to simplify the authoring of XAML using Blend. These include: Transforming a vector graphic into a custom control template with a few clicks of the mouse Generating complex animations using an integrated timeline editor Visually designing interactive data templates Creating prototypes (via SketchFlow) that can be transformed into production-level code Throughout Pro Expression Blend 4, you'll work with both Blend and .NET code to finalize fully-functional projects that will provide both valuable insights and a sound foundation for your future WPF and Silverlight projects. Each chapter will give you ample opportunity to build .NET software using Blend. However, this is not a programming book, per se. While some examples will require a manageable amount of C# code, this book is squarely focused on helping you gain mastery over the numerous tools, editors, designers, and wizards of the Microsoft Expression Blend IDE.

The Struggle for Justice, Equity, and Peace in the Global Classroom McClean, Marva,2023-06-23 In the current state of global upheaval with the rallying call for human rights and justice for people who have been historically marginalized, the curriculum must be decolonized to ensure that children identified as marginalized and at risk are receiving an equitable education that is based on respect and acceptance of their cultural heritage as well as their human rights. The Struggle for Justice, Equity, and Peace in the Global Classroom investigates the global classroom as a site of transformation for educators who dare to take action to replace oppressive and repressive practices with emancipatory strategies grounded in critical consciousness. The book's contents convey the pluralism that defines America and the world, investigating how educators can re-envision the future through an engagement with the past and an understanding of how the historical continuities of racial intolerance and social injustice continue to impact classroom teaching and the outcomes of children whose lives are shaped by the aftermath of slavery and oppression. Covering topics such as colonial education, inclusive classrooms, and student agency, this premier reference source is an excellent resource for teachers, school administrators, literary scholars, community activists, teacher educators, preservice teachers, researchers, and academicians.

Multimedia Services in Intelligent Environments George A. Tsihrintzis, Maria Virvou, Lakhmi C. Jain, 2013-05-16 Multimedia services are now commonly used in various activities in the daily lives of humans. Related application areas include services that allow access to large depositories of information, digital libraries, e-learning and e-education, e-government and e-governance, e-commerce and e-auctions, e-entertainment, e-health and e-medicine, and e-legal services, as well as their mobile counterparts (i.e., m-services). Despite the tremendous growth of multimedia services over the recent years, there is an increasing demand for their further development. This demand is driven by the ever-increasing desire of society for easy accessibility to information in friendly, personalized and adaptive environments. In this book at hand, we examine recent Recommendation Services. Recommendation services appear in the mobile environment, medicine/biology, tourism, education, and so on. The book includes ten chapters, which present various recently developed recommendation

services. This research book is directed to professors, researchers, application engineers and students of all disciplines who are interested in learning more about recommendation services, advancing the corresponding state of the art and developing innovative recommendation services.

Multimodal Usability Niels Ole Bernsen, Laila Dybkjær, 2009-10-03 This preface tells the story of how Multimodal Usability responds to a special challenge. Chapter 1 describes the goals and structure of this book. The idea of describing how to make multimodal computer systems usable arose in the European Network of Excellence SIMILAR – “Taskforce for creating human-machine interfaces SIMILAR to human-human communication”, 2003– 2007, www.similar.cc. SIMILAR brought together people from multimodal signal processing and usability with the aim of creating enabling technologies for new kinds of multimodal systems and demonstrating results in research prototypes. Most of our colleagues in the network were, in fact, busy extracting features and figuring out how to demonstrate progress in working interactive systems, while claiming not to have too much of a notion of usability in system development and evaluation. It was proposed that the authors support the usability of the many multimodal prototypes underway by researching and presenting a methodology for building usable multimodal systems. We accepted the challenge, first and foremost, no doubt, because the formidable team spirit in SIMILAR could make people accept outrageous things. Second, having worked for nearly two decades on making multimodal systems usable, we were curious – curious at the opportunity to try to understand what happens to traditional usability work, that is, work in human-computer interaction centred around traditional graphical user interfaces (GUIs), when systems become as multimodal and as advanced in other ways as those we build in research today.

Web Engineering Nora Koch, Piero Fraternali, Martin Wirsing, 2004-07-14 Web engineering is a new discipline that addresses the pressing need for systematic and tool-supported approaches for the development, maintenance and testing of Web applications. Web engineering builds upon well-known and successful software engineering principles and practices, adapting them to the special characteristics of Web applications. Even more relevant is the enrichment with methods and techniques stemming from related areas like hypertext authoring, human-computer interaction, content management, and usability engineering. The goal of the 4th International Conference on Web Engineering (ICWE 2004), in line with the previous ICWE conferences, was to work towards a better understanding of the issues related to Web application development. Special attention was paid to emerging trends, technologies and future visions, to help the academic and industrial communities identify the most challenging tasks for their research and projects. Following a number of successful workshops on Web engineering since 1997 at well-known conferences, such as ICSE and WWW, the first conference on Web engineering was held in Cáceres, Spain in 2001. It was followed by ICWE 2002 in Santa Fe, Argentina and ICWE 2003 in Oviedo, Spain. In 2004 ICWE moved to the center of Europe and was held in Munich, Germany from July 26 to 30. ICWE 2004 was organized by the Institute for Informatics of the Ludwig-Maximilians-Universität at (LMU) Munich. The ICWE 2004 edition received a total of 204 submissions, out of which 25 papers were selected by the Program Committee as full papers (12% acceptance).
