Slides for Students Gary D. Fisk,2018-10-16 300 million powerpoint presentations are given daily, yet there is a disconnect between the amazing technology of powerpoint and a mediocre student learning experience. To unleash the full potential of powerpoint presentations, we must do a better job of creating presentations that fit the educational needs of students. Slides for Students does just that.Slides for Students is an open and honest discussion about powerpoint in the classroom. A need exists for thoughtfully designed and implemented classroom instruction that focuses on the learner rather than on the technology. This book was written to translate academic research findings into practical suggestions about powerpoint that educators can use. Divided into two parts, Slides for Students discusses the history of powerpoint, explores academic studies on the topic, and demonstrates how to design slides to best suit educational needs and engage with students to avoid the dreaded death by powerpoint.

Sweating Bullets Robert Gaskins,2012-04-20 PowerPoint was the first presentation software designed for Macintosh and Windows, received the first venture capital investment ever made by Apple, then became the first significant acquisition ever made by Microsoft, who set up a new Graphics Business Unit in Silicon Valley to develop it further. Now, twenty-five years later, PowerPoint is installed on more than one billion computers, worldwide. In this book, Robert Gaskins (who invented the idea, managed its design and development, and then headed the new Microsoft group) tells the story of its first years, recounting the perils and disasters narrowly evaded as a startup, dissecting the complexities of being the first distant development group in Microsoft, and explaining decisions and insights that enabled PowerPoint to become a lasting success well beyond its original business uses.

Building Digital Power Karen Nilsen,2020-01-20 Everything I wish I knew when I started out as a digital campaigner.A deep dive on digital advocacy for campaigners, communicators, and strategists. In five parts:1) Digital Communications Strategy2) Email Strategy3) Action Page Strategy4) List Building & Segmentation5) Pro TipsNow more than ever, the world needs more people whose expertise is to change the world. And if those skills aren't already specialised enough, to fuel a cause in 2020 you also need to magically be an expert in online giving, digital advocacy and engagement.While there's no shortage of digital strategy advice, how much of it should non-profits pay attention to? Which ideas that sound intuitive could actually be hurting your long-term engagement? What is leading millions of potential donors and online activists to tune out over time? At Animals Australia, we put a lot of theories to the test and busted plenty of myths. This book outlines what worked for us in practice.And here's the truth. A decade of trial and error, research, and pushing boundaries has revealed one universal insight. The real key to building digital power has less to do with tech than it does people. It's about relationships -- forged and nurtured at scale. Tap into the power that exists when communication, design, and tech meet empathy, respect, and a supporter-centric mindset.

Teach with Magic Kevin Roughton,2021-05 Learn from the Engagement Masters Education is a battle for attention. Whether you are a teacher trying to reach a classroom full of students or a parent trying to prepare your child for the world to come, getting our audience to just listen can be a real challenge. When students have access to personalized entertainment sitting in their pockets, anything that doesn't jump out and grab their attention right away is easily drowned out. But there is a place where even today all those modern distractions melt away--Disneyland. When you're there, you're not only in a different world, you're in Walt Disney's world. Whether you are Peter Pan flying over London in Fantasyland or a rebel fighter struggling against the First Order in Galaxy's Edge, you are 100% engaged. Sights, sounds and even smells ensure that your brain is locked into the experience. If we can bring those techniques into our teaching, we can create engaging experiences for our students, grab their attention, and boost their learning. You'll improve your teaching and create a place students want to visit. In this book we'll learn from the world's greatest engagement masters--the Disney Imagineers.

Through narrative visits to attractions throughout Disneyland and Disney California Adventure, you'll experience a visit to the park as we share memories and see how the Imagineers make it all work. We'll be guided by Imagineering icon Marty Sklar's Mickey's 10 Commandments of Theme Park Design as we turn our classrooms into the most engaging places on Earth!
