Slides for Students Gary D. Fisk,2018-10-16 300 million powerpoint presentations are given daily, yet there is a disconnect between the amazing technology of powerpoint and a mediocre student learning experience. To unleash the full potential of powerpoint presentations, we must do a better job of creating presentations that fit the educational needs of students. Slides for Students does just that.Slides for Students is an open and honest discussion about powerpoint in the classroom. A need exists for thoughtfully designed and implemented classroom instruction that focuses on the learner rather than on the technology. This book was written to translate academic research findings into practical suggestions about powerpoint that educators can use. Divided into two parts, Slides for Students discusses the history of powerpoint, explores academic studies on the topic, and demonstrates how to design slides to best suit educational needs and engage with students to avoid the dreaded death by powerpoint.

In this book, Robert Gaskins (who invented the idea, managed its design and development, and then headed the new Microsoft group) tells the story of its first years, recounting the perils and disasters narrowly evaded as a startup, dissecting the complexities of being the first distant development group in Microsoft, and explaining decisions and insights that enabled PowerPoint to become a lasting success well beyond its original business uses.

In five parts: 1) Digital Communications Strategy 2) Email Strategy 3) Action Page Strategy 4) List Building & Segmentation 5) Pro Tips Now more than ever, the world needs more people whose expertise is to change the world. And if those skills aren't already specialised enough, to fuel a cause in 2020 you also need to magically be an expert in online giving, digital advocacy and engagement. While there's no shortage of digital strategy advice, how much of it should non-profits pay attention to? Which ideas that sound intuitive could actually be hurting your long-term engagement? What is leading millions of potential donors and online activists to tune out over time? At Animals Australia, we put a lot of theories to the test and busted plenty of myths. This book outlines what worked for us in practice. And here's the truth. A decade of trial and error, research, and pushing boundaries has revealed one universal insight. The real key to building digital power has less to do with tech than it does people. It's about relationships -- forged and nurtured at scale. Tap into the power that exists when communication, design, and tech meet empathy, respect, and a supporter-centric mindset.
