   From Me to We Jason Griffith,2016-08-19 With this practical book, you'll learn effective ways to engage students in reading and writing by teaching them narrative nonfiction. By engaging adolescents in narrative, literary, or creative nonfiction, they can cultivate a greater understanding of themselves, the world around them, and what it means to feel empathy for others. This book will guide you to first structure a reading unit around a narrative nonfiction text, and then develop lessons and activities for students to craft their own personal essays. Topics include: Engaging your students in the reading of a nonfiction narrative with collaborative chapter notes, empathy check-ins, and a mini-research paper to deepen students' understanding; Helping your students identify meaningful life events, recount their experiences creatively, and construct effective opening and closing lines for their personal essays; Encouraging your students to use dialogue, outside research, and a clear plot structure to make their narrative nonfiction more compelling and polished. The strategies in this book are supplemented by examples of student work and snapshots from the author's own classroom. The book also includes interviews with narrative nonfiction writers MK Asante and Johanna Bear. The appendices offer additional tips for using narrative nonfiction in English class, text and online resources for teaching narrative nonfiction, and a correlation chart between the activities in this book and the Common Core Standards.

Strategies for Writing in the Science Classroom Kathleen Kopp,2011 Writing is a valuable learning tool that can quite effectively--and easily--help students learn and understand science content. Teaching it, however, can be challenging for content-area teachers now under pressure from the Common Core Standards' refocused attention on reading and writing. With step-by-step directions, rubrics, student examples, templates, technology tips, and ideas for differentiation, Kopp goes beyond journals or reports to show how science teachers can use writing to develop critical-thinking skills, improve understanding of scientific concepts, assess students' progress, and hone skills in content-area writing. Her writing strategies support the Common Core Standards and, because the focus is on applying writing skills--and not teaching writing as an end in itself--science teachers can easily incorporate these strategies in any unit of study. This comprehensive resource makes it easy to incorporate writing in your science class today--and every day!

Technologies in Biomedical and Life Sciences Education Harry J. Witchel,Michael W. Lee,2022-06-24 This contributed volume focuses on understanding the educational strengths and weaknesses of mediated content (including media as a

learning supplement), in comparison to traditional face-to-face learning. Each chapter includes research on, and a broad-brush summary of, approaches to combining life sciences education with educational technologies. The chapters are organized into four main sections, each of which focuses on a key question regarding the consequences of incorporating media into education. In this regard, the authors highlight how educational technology is both a bridge and barrier to student access and inclusivity. Further, they address the ongoing discussion as to whether students need to be present for lectures, and on how having agency in their own learning can improve both retention and conceptual understanding. To link the content to current events, the authors also shed light on the impact that the COVID-19 pandemic is having on the continuity of educational programs and on the growing importance of educational technologies. Consequently, the book offers life science educators valuable guidance on the technologies already available, and an outlook on what is yet to come.
