Selling Out Education Stephanie Allais,2014-08-07 Selling Out Education argues that basing education policy on qualifications and learning outcomes—dramatized by the phenomenal expansion of qualifications frameworks—is misguided. Qualifications frameworks are intended to make education more responsive to the needs of economies and societies by improving how qualifications and credentials are used in labour markets. But using learning outcomes as the starting point of education programmes neglects the core purpose of education: giving people access to bodies of knowledge they would not otherwise have. Furthermore, instead of creating demand for skilled workers through industrial and economic policy, qualifications frameworks are premised on the flawed idea that a supply of skilled workers leads to industrial and economic development. And skilled workers are to be supplied not by encouraging governments to focus attention on creating, improving, and supporting education institutions, but by suggesting that governments take a quality-assurance role. As a result, in poor countries where provision is weak to start with, qualifications have been created and institutions established to monitor providers without increasing or improving education provision. The weaknesses of many current policy approaches make clear, Allais argues, that education is inherently a collective good, and that the acquisition of bodies of knowledge provide the basis for its integrity and intelligibility.

Building Lean, Building BIM Rafael Sacks,Samuel Korb,Ronen Barak,2017-12-06 Building Lean, Building BIM is the essential guide for any construction company that wants to implement Lean Construction and Building Information Modelling (BIM) to gain a strategic edge over their competition. The first of its kind, the book outlines the principles of Lean, the functionality of BIM, and the interactions between the two, illustrating them through the story of how Tidhar Construction has implemented Lean Construction and BIM in a concerted effort over four years. Tidhar is a small-to-medium-sized construction company that pioneered a way of working that gave it a profit margin unheard of in its market. The company's story serves as a case study for explanation of the various facets of Lean Construction and BIM. Each chapter defines a principle of Lean and/or BIM, describes the achievements and failures in Tidhar's implementation based on the experiences of the key people involved, and reviews the relevant background and theory. The implementation at Tidhar has not been a pure success, but by examining their motives alongside their achievements and failures, readers will learn about what pitfalls

and pinnacles to expect. A number of chapters also compare the experience of Tidhar with those of other companies who are leaders in their fields, such as Skanska and DPR. This book is highly relevant and useful to a wide range of readers from the construction industry, especially those who are frustrated with the inefficiencies in their companies and construction projects. It is also essential reading for Lean and BIM enthusiasts, researchers and students from a variety of industries and backgrounds.

The Complete Idiot's Guide to Cold Calling Keith Rosen MCC, 2004-08-03 Does this sound familiar? "If I could get in front of the prospect, the rest of the selling process becomes easier. It's just getting in front of them that's the challenge." The fact is most cold calling efforts are doomed from the start. Salespeople lose sales not due to a lack of effort, but because they lack a prospecting system they are comfortable with and can trust to generate greater, consistent results. If you are prospecting the same way you have been for the last several years (including the "calling to check in, touch base or follow-up" approach) or haven't been prospecting at all, you're simply making it easier for your competition to take away the new business you are working so hard to earn. So, if you love to sell but hate (or don't like) to prospect, this book is your opportunity to maximize your cold calling potential and boost your income by learning how to get in front of the right prospects in less time and create greater selling opportunities without the fear, pressure or anxiety associated with cold calling. This Complete Idiot's Guide® will show you how to:

- Utilize the seven steps to a permission-based cold calling conversation so that you don't have to push your presentation and hope there's a fit.
- Create winning voice mail messages that will ensure more return calls.
- Develop your MVP (Most Valuable Proposition) that separates you from your competition.
- Craft the Compelling Reasons that would motivate a prospect to speak with you.
- Prevent and defuse initial objections, such as "I'm not interested," "We don't have any money now," or "Call me back later."
- Design your own step-by-step prospecting and follow-up system that runs on autopilot and is aligned with your selling philosophy, strengths, objectives, and natural talents rather than taking the

generic, “one size fits all” approach. • Develop the right questions and uncover new selling opportunities in seconds so that you can stop wasting precious time on the wrong prospects.
