The Listening Shift Janie van Hool, 2021-06-28 ***WINNER BUSINESS SELF-DEVELOPMENT BOOK OF THE YEAR: BUSINESS BOOK AWARDS 2022 *** As a leader, you work hard at crafting effective messages. You aim to influence, persuade, present. You have a voice, you have a platform... but is anyone listening? The reality is that the people you're talking to are distracted. They're listening at a rate of 125-250 words per minute, but they're thinking at 1,000-3,000 words per minute. That gap means they're likely to miss 75% of what you say. And guess what? It's the same when it's your turn to listen. What are you missing? At the very least, if your people don't feel heard or understood by managers and leaders, trust is eroded, frustration increases and engagement is reduced. You need to listen and be heard...but most of us have never learned how. The Listening Shift will show you how to be a listening leader. Find out: why listening matters how to engage people across your organisation by listening how to have listening conversations - collaborative, connecting and inclusive how to help others listen to you. Janie van Hool is an expert leadership advisor in the art of communication. In the last 20 years, her practical, accessible solutions-focused approach to communicating has allowed hundreds of leaders to engage, inspire and influence their listeners.

Communicating In A Digital World Aristotle T. Lekacos, 2010-03-31 You are about to embark on a journey. In some respects it will be similar to ones taken by other pioneers and innovators in the past. Your journey may begin with excitement and trepidation. As you continue and persevere you will discover new things and most importantly will feel a sense of accomplishment and self-improvement. There will be times along the journey when you believe that you cannot possibly go any further. You will push yourself and lo and behold you will realize that you have discovered and learned so much more than you imagined. You will be changed forever! #13; Change is taking place everywhere and will proceed whether we are for or against it. Just as the acoustic telegraph (telephone) replaced the electric telegraph, the incandescent lamp replaced gas lighting, wireless methods superseded wired technologies; the turbines eventual replacement of the horse, the aircraft the train, the email the mailed letter to name just a few changes in our recent history. In all cases these changes were not

overnight phenomena but ones that took time. Slowly the practitioners changed, the users switched and the infrastructure transitioned and then the process repeated itself. This is civilization advancing; beginning with a technological innovation, then a 'marketing' of the technology to define its benefits and most importantly the subsequent preparation of society for its eventual deployment. The only certainty is uncertainty. Our position on the merits of the change must be based on our knowledge and not hearsay.#13; As you embark on this journey of enlightenment you may encounter resistance from others. As with all innovation and transitional periods? naysayers, especially and perhaps surprisingly from within the field, will state why the new approach is inadequate, insufficient, incapable, not going to work and so forth. In business this denial to consider the need for possible change is called 'Core Rigidity'. Why the term 'Core Rigidity'? Rigidity - because individuals refuse to consider any change or revision and want the status quo to remain. Core - because most of these individuals are experts in the field and have years of experience in the existing environment, their specific knowledge is based on the current processes and most importantly if the change does come to pass their skill sets will be negated hence the term core rigidity.#13; Some say it is human nature to discount new methodology, new theories, new approaches, new ideas; to paraphrase a common quote 'If it's not broken don't fix it?'. I say where would we be today if all of our ancestors had thought that way? Despite the reluctance of incumbents change is continuous.#13; With respect to virtual communications we are approaching the societal stage; which is why I have written this book. Virtual communications will eventually replace the current mode of distance contact. Communicating and meetings will be forever changed. It is my intention to provide the information and knowledge to empower you to successfully join this new and exciting way of communicating. I will show you how to employ and understand tools used in communicating virtually, such as Adobe Presenter, Adobe Captivate and Adobe Connect. #13; In this book I have introduced a number of new concepts that are useful in the preparation and implementation of the virtual environments and digital content.#13; Let's begin our journey to change.

CHAMPION GUIDES Karen Kellock,2022-08-18 A new theory in psychology with a formula: all disease obstruction, all recovery elimination, all success attraction. The three obstructions are explained in detail: people, habit and food. What messed us up? The influence of other people. With trauma we swallow them whole/mimic evil. What is the Dunning-Kruger? It's the dumb thinking they're smart--most dangerous for sure. We mal-adapt by taking on another part but through elimination we get a fresh start. Cover design by Blaze Goldburst

Variation and Change in Spoken and Written Discourse Julia Bamford,Silvia Cavalieri,Giuliana Diani,2013-10-31 This book focuses on aspects of variation and change in language use in spoken and written discourse on the basis of corpus analyses, providing new descriptive insights, and new methods of utilising small specialized corpora for the description of language variation and change. The sixteen contributions included in this volume represent a variety of diverse views and approaches, but all share the common goal of throwing light on a crucial dimension of discourse: the dialogic interactivity between the spoken and written. Their foci range from papers addressing general issues related to corpus analysis of spoken dialogue to papers focusing on specific cases employing a variety of analytical tools, including qualitative and quantitative analysis of small and large corpora. The present volume constitutes a highly valuable tool for applied linguists and discourse analysts as well as for students, instructors and language teachers.

Autism Elizabeth B. Torres,Caroline Whyatt,2017-09-25 Autism: The Movement Sensing Perspective is the result of a collaborative effort by parents, therapists, clinicians, and researchers from all disciplines in science including physics, engineering, and applied mathematics. This book poses questions regarding the current conceptualization and approach to

the study of autism, providing an alternative unifying data-driven framework grounded in physiological factors. This book reaches beyond subjective descriptions of autistic phenomena and embraces a new era of objective measurements, analyses, and statistical inferences. The authors harness activities from the nervous systems across the brain and body (often in tandem), and introduce a platform for the comprehensive personalized phenotyping of individuals with autism. The impact of this approach is discussed to advance the development of tailored treatments options, enhance the ability to longitudinally track symptomatology, and to fundamentally empower affected individuals and their families. This book encompasses a new era for autism research and treatments, and our continuous effort to collectively empower and embrace the autistic community.

Integrated Marketing Communication Jerome M. Juska, 2021-11-29 Now in its second edition, this textbook explores the continuing transformation of advertising, sales promotion, and public relations functions within the marketing discipline. The content focuses on emerging new technologies, as well as established digital and legacy media, as the reader is guided through the process of developing and implementing a comprehensive Integrated Marketing Communication plan for companies, organizations, and brands. Clear, concise, and practical, the book takes the reader through consumer, market, and competitive research; creative conceptualization; market segmentation, identification of a target audience, and brand positioning; as well as strategic decisions involving the timing, placement, and intensity of advertising, sales promotion, public relations, and brand visibility. The new edition emphasizes the importance of social media, website development, search engine optimization, mobile marketing, brand promotion events, and retail store connectivity. Updated to include more digital content with detailed international examples, this new edition adds four new chapters including Integrated Marketing Communication objectives, budgets, and metrics, legacy media planning, business-to-business marketing strategies, and innovative technologies with topics such as artificial intelligence, predictive analytics, synthetic media, virtual reality, and voice marketing. Upper-level undergraduate and postgraduate students will appreciate this lucid, up-to-date text, as will business professionals in executive education and certificate programs. Experiential learning is provided with chapter assignments and a continuity case study woven into the textbook. The second edition is also accompanied by robust online resources, including PowerPoint slides, chapter videos, lecture notes, classroom exercises, digital flash cards, test banks, an

instructor resource book, and interactive templates for preparing an Integrated Marketing Communication Plan.

Exploring Discourse Practices in Romanian Andra Vasilescu,Mihaela-Viorica Constantinescu,Gabriela Stoica,Jonathan Russell White,2020-04-02 Exploring Discourse Practices in Romanian is a glimpse into Romanians' style of interaction, which has developed eclectically at the crossroads of Eastern and Western cultures. It is oriented towards modern literacy while being deeply rooted in a long oral tradition, and paradoxically displays both attachment to local specifics and commitment to mimetic speech and act(ion)s imported from various cultural spaces. The book presents a characterisation of the Romanian cultural space in terms of various discourse practices, drawing on recent challenging theoretical proposals, and concluding with in-depth corpus-based analyses. The chapters focus on five main topics (the co-construction of discursive identities, discursive polyphony, textualisation of attitudes and emotions, conceptual metaphors, and grammaticalisation of context) explored in various discourse genres (political discourse, media discourse, professional discourse, face-to-face conversation, literature of memoirs, and the usage of Romanian by non-natives). The theoretical framework utilised here is discourse analysis, defined in a broad sense (with regards to discourse patterns, pragmatic phenomena, conversation analysis, and rhetoric). The volume, having both a theoretical and an applied dimension, will appeal to an international readership, including researchers interested in current developments of pragmatics and discourse analysis.
