Art of the Cut Steve Hullfish, 2024-07-18 This is the second volume of the widely acclaimed *Art of the Cut* book published in 2017. This follow-up text expands on its predecessor with wisdom from more than 360 interviews with the world's best editors (including nearly every Oscar winner from the last 30 years). Because editing is a highly subjective art form, and one that is critical to the success of motion picture storytelling, it requires side-by-side comparisons of the many techniques and solutions used by a wide range of editors from around the world. That is why this book compares and contrasts methodologies from a wide array of diverse voices and organizes that information so that it is easily digested and understood. There is no one way to approach editorial problems, so this book allows readers to see multiple solutions from multiple editors. The interviews contained within are carefully curated into topics that are most important to film editors and those who aspire to become film editors. The questions asked, and the organization of the book, are not merely an academic or theoretical view of the art of editing but rather the practical advice and methodologies of actual working film and TV editors, bringing benefits to both students and professional readers. The book is supplemented by a collection of downloadable online exclusive chapters, which cover additional topics ranging from Choosing the Project to VFX. In addition to the supplementary chapters, access to the full-color, full-resolution images printed in the book—and other exclusive images—is included.

Saul Bass Jennifer Bass,Pat Kirkham,2011-11-09 This is the first book to be published on one of the greatest American designers of the 20th Century, who was as famous for his work in film as for his corporate identity and graphic work. With more than 1,400 illustrations, many of them never published before and written by the leading design historian Pat Kirkham, this is the definitive study that design and film enthusiasts have been eagerly anticipating. Saul Bass (1920-1996) created some of the most compelling images of American post-war visual culture. Having extended the remit of graphic design to include film titles, he went on to transform the genre. His best known works include a series of unforgettable posters and title sequences for films such as Alfred Hitchcock's Vertigo and Otto Preminger's The Man With The Golden Arm and Anatomy of a Murder. He also created some of the most famous logos and corporate identity campaigns of the century, including those for major companies such as AT&T, Quaker Oats, United Airlines and Minolta. His wife and collaborator, Elaine, joined the Bass office in the late 1950s. Together they created an impressive series of award-winning short films, including the Oscar-winning Why Man Creates, as well as an equally impressive series of film titles, ranging from Stanley Kubrick's Spartacus in the early 1960s to Martin Scorsese's Cape Fear and Casino in the 1990s. Designed by Jennifer Bass, Saul Bass's daughter and written by distinguished design historian Pat Kirkham who knew Saul Bass personally, this book is full of images from the Bass archive, providing an in depth account of one of the leading graphic artists of the 20th century.

Using Technology with Classroom Instruction That Works Howard Pitler,Elizabeth R. Hubbell,Matt Kuhn,2012-08-02 Technology is ubiquitous, and its potential to transform learning is immense. The first edition of Using Technology with Classroom Instruction That Works answered some vital questions about 21st century teaching and learning: What are the best ways to incorporate technology into the curriculum? What kinds of technology will best support particular learning tasks and objectives? How does a teacher ensure that technology use will enhance instruction rather than distract from it? This revised and updated second edition of that best-selling book provides fresh answers to these critical questions, taking into account the enormous technological advances that have occurred since the first edition was published, including the proliferation of social networks, mobile devices, and web-based multimedia tools. It also builds on the up-to-date research and instructional planning framework featured in the new edition of Classroom Instruction That Works, outlining the most appropriate technology applications and resources for all nine categories of effective instructional strategies: * Setting objectives and providing feedback * Reinforcing effort and providing recognition * Cooperative learning * Cues, questions, and advance organizers * Nonlinguistic representations * Summarizing and note taking * Assigning homework and providing practice * Identifying similarities and differences * Generating and testing hypotheses Each strategy-focused chapter features examples—across grade levels and subject areas, and drawn from real-life lesson plans and projects—of teachers integrating relevant technology in the classroom in ways that are engaging and inspiring to students. The authors also

recommend dozens of word processing applications, spreadsheet generators, educational games, data collection tools, and online resources that can help make lessons more fun, more challenging, and—most of all—more effective.

Talking to Strangers Malcolm Gladwell, 2019-09-10 Malcolm Gladwell, host of the podcast Revisionist History and author of the #1 New York Times bestseller *Outliers*, offers a powerful examination of our interactions with strangers and why they often go wrong—now with a new afterword by the author. A Best Book of the Year: The Financial Times, Bloomberg, Chicago Tribune, and Detroit Free Press How did Fidel Castro fool the CIA for a generation? Why did Neville Chamberlain think he could trust Adolf Hitler? Why are campus sexual assaults on the rise? Do television sitcoms teach us something about the way we relate to one another that isn't true? *Talking to Strangers* is a classically Gladwellian intellectual adventure, a challenging and controversial excursion through history, psychology, and scandals taken straight from the news. He revisits the deceptions of Bernie Madoff, the trial of Amanda Knox, the suicide of Sylvia Plath, the Jerry Sandusky pedophilia scandal at Penn State University, and the death of Sandra Bland—throwing our understanding of these and other stories into doubt. Something is very wrong, Gladwell argues, with the tools and strategies we use to make sense of people we don't know. And because we don't know how to talk to strangers, we are inviting conflict and misunderstanding in ways that have a profound effect on our lives and our world. In his first book since his #1 bestseller *David and Goliath*, Malcolm Gladwell has written a gripping guidebook for troubled times.
