Finding Your Seat at the Table Susan M. Harnett,Laureen P. Cantwell-Jurkovic,2022-02-19 Service on Institutional Review Boards (IRB) and Institutional Animal Care and Use Committees (IACUC) is an uncommon activity for librarians. Even librarians who participate in institutional research activities in a supportive capacity or conduct their own original research as scholars themselves and are familiar with the IRB/IACUC research approval process, they may hesitate to participate more fully with these boards. There may be a perception that the work of the IRB and IACUC is too scientifically complex for librarians without an appropriate background. Library administrators may not advocate for librarian inclusion on the board for fear of additional burdens on the librarian's time; and university administrators might need some convincing of the librarian's suitability to perform this work. This book provides librarians with foundational knowledge of the IRB and IACUC, describes the work of these important committees, and expands librarians' conceptualization and knowledge of opportunities to create services and partnerships through participation. The book provides a progressively more comprehensive understanding of the work of these committees. Parts I and II discuss IRB and IACUC, respectively; their history, functions and membership. Part III highlights expanding roles for librarians on IRB and IACUC; and in institutional research activities. A special feature of this section describes the experiences of librarians, in their own words, who work with IRB or IACUC; what they have learned, how they have used their experiences to create partnerships and market library services; and what role they see for libraries and librarians in institutional research.

Story Engineering Larry Brooks,2011-01-27 What makes a good story or a screenplay great? The vast majority of writers begin the storytelling process with only a partial understanding where to begin. Some labor their entire lives without ever learning that successful stories are as dependent upon good engineering as they are artistry. But the truth is, unless you are master of the form, function and criteria of successful storytelling, sitting down and pounding out a first draft without planning is an ineffective way to begin. Story Engineering starts with the criteria and the architecture of storytelling, the engineering and design of a story--and uses it as the basis for narrative. The greatest potential of any story is found in the way six specific aspects of storytelling combine and empower each other on the page. When rendered artfully, they become a sum in excess of their parts. You'll learn to wrap your head around the big pictures of storytelling at a professional level through a new approach that shows how to combine these six core competencies which include: • Four elemental competencies of concept, character, theme, and story structure (plot) • Two executional competencies of scene construction and writing voice The true magic of storytelling happens when these six core competencies work together in perfect harmony. And the best part? Anyone can do it!
