Startup Success Gordon Daugherty,2019-10-22 You've got yourself a startup! But now where's the funding going to come from? In this day and age, creating a startup seems to be an easy process. After some meetings with an equally passionate cofounder, you discover you have a creative idea, the outline of a business plan, and a willingness to spend nights and weekends doing really hard work. But most startup founders have never run a company—much less had to secure funding to reach crucial milestones. If you don't get the funding you need, you may either make progress at a snail's pace, or you may have to give up altogether. With stakes this high, improving a startup founder's odds of fundraising successfully—even just a little—can make a huge difference in the outcome of a venture. In this informative and enlightening book, Gordon Daugherty demystifies the fundraising process that takes place during the early phases of a startup's evolution. Every founder cares about the valuation they will be able to negotiate with investors, and anyone who has attempted fundraising has encountered numerous debates about the valuation they're asking for. Startup Success dedicates a whole chapter to negotiating valuation, which, in the end, involves a serious combination of art and science to execute effectively. Daugherty's book serves as a valuable educational and planning tool for use before the fundraising campaign begins and a reference guide for interacting and negotiating with investors after things get underway. Startup Success is written in a

logical sequence that follows the general life cycle of planning and executing a successful fundraising campaign. Actionable tips, tricks, and aha realizations will have readers dog-eared pages and highlighting passages for future reference. The author's own words tell it all: "I decided to write something different that best exploits the gray in my hair and the hard lessons I've learned." Any startup founder, advisor, or angel investor—regardless of their experience level—will come away with improved skills and an increased knowledge base. Gordon Daugherty is a seasoned business executive, entrepreneur, startup advisor, and investor. He has made more than 200 investments in early-stage companies as a venture fund manager and angel investor, and he has been involved in raising more than \$80 million in growth and venture capital.

Super Founders Ali Tamaseb, 2021 Every VC is chasing a unicorn—those billion-dollar companies that fundamentally change their industries, and every entrepreneur certainly wants to become one. For *Super Founders*, author Ali Tamaseb gathered and analyzed 40,000 data points about the 200+ unicorns founded since 2005 and found out what these billion-dollar companies and their founders actually looked like. And you'll be surprised by what he discovered. Half of unicorn founders are over 35. Most founders don't have any directly relevant work experience in the industry they're disrupting. There's no disadvantage to being a solo founder. Sixty percent of billion-dollar companies are started by repeat entrepreneurs, many of whom already have at least one \$50M+ exit under their belt. And over half of unicorns were competing with multiple incumbents at the time of their founding. What we thought we knew about these companies doesn't turn out to be true, which has serious implications for both the kinds of startups that get funding and the kinds of people who decide to start companies in the first place. *Super Founders* gives readers an unprecedented look not just at what the data tells us about the world's most successful startups and the people who create them, but also at those companies and founders themselves, many of which are not well-known among the general public. A blend of data, analysis, stories and exclusive interviews, the book is a paradigm-shifting guide for entrepreneurs and the investment community. You may look more like a Super Founder than you think!—
