Resonate Nancy Duarte,2013-07-02 Reveals the underlying story form of all great presentations that will not only create impact, but will move people to action Presentations are meant to inform, inspire, and persuade audiences. So why then do so many audiences leave feeling like they've wasted their time? All too often, presentations don't resonate with the audience and move them to transformative action. Just as the author's first book helped presenters become visual communicators, Resonate helps you make a strong connection with your audience and lead them to purposeful action. The author's approach is simple: building a presentation today is a bit like writing a documentary. Using this approach, you'll convey your content with passion, persuasion, and impact. Author has a proven track record, including having created the slides in Al Gore's Oscar-winning An Inconvenient Truth Focuses on content development methodologies that are not only fundamental but will move people to action Upends the usual paradigm by making the audience the hero and the presenter the mentor Shows how to use story techniques of conflict and resolution Presentations don't have to be boring ordeals. You can make them fun, exciting, and full of meaning. Leave your audiences energized and ready to take action with Resonate.

The Back of the Napkin (Expanded Edition) Dan Roam, 2009-12-31 The acclaimed bestseller about visual problem solving—now bigger and better—There is no more powerful way to prove that we know something well than to draw a simple picture of it. And there is no more powerful way to see hidden solutions than to pick up a pen and draw out the pieces of our problem. So writes Dan Roam in *The Back of the Napkin*, the international bestseller that proves that a simple drawing on a humble napkin can be more powerful than the slickest PowerPoint presentation. Drawing on twenty years of experience and the latest discoveries in vision science, Roam teaches readers how to clarify any problem or sell any idea using a simple set of tools. He reveals that everyone is born with a talent for visual thinking, even those who swear they can't draw. And he shows how thinking with pictures can help you discover and develop new ideas, solve problems in unexpected ways, and dramatically improve your ability to share your insights. Take Herb Kelleher and Rollin King, who figured out how to beat the traditional hub-and-spoke airlines with a bar napkin and a pen. Three dots to represent Dallas, Houston, and San Antonio. Three arrows to show direct flights. Problem solved, and the picture made it easy to sell Southwest Airlines to investors and customers. Now with more color, bigger pictures, and additional content, this new edition does an even better job of helping you literally see the world in a new way. Join the teachers, project managers, doctors, engineers, assembly-line workers, pilots, football coaches, marine drill instructors, financial analysts, students, parents, and lawyers who have discovered the power of solving problems with pictures.
