**Business Capital 101** Roberta A. Pellant, Tony Drexel-Smith, 2021-04-26 The purpose of this book is to define the process and protocols of the TASASS™ score. It also serves as the textbook for the USCGA™ TASASS™ certification course. It was written as a manual for students, entrepreneurs, finance professionals, advisors, and consultants. It defines the types of capital available and documentation requirements to achieve “success” in the capital marketplace. Success is defined as a trifecta of: 1) the enterprise acquiring capital; 2) the business becoming successful and 3) the capital source(s) receiving a positive outcome. Business Capital 101 provides clarity in an otherwise complicated environment of gaining access to capital for qualified enterprises. Our mission is to provide a compliant, professional, time-sensitive, cost-conscious, and realistic

approach to the business finance process. We accomplish this mission by the implementation of a due diligence process known as the TASASS™ score. The TASASS™ score was developed as a result of a study of more than 300 enterprises engaged by me since 2008 wherein, I was able to determine the more than 300 common attributes amongst successful and failed ventures. The TASASS™ score is a combination of a Transaction Analysis™ (TA), a Situation Analysis™ (SA) implemented in a Software (S) that results in a Score (S). The TASASS™ score is a standardized objective due diligence process that serves capital markets during the enterprise vetting phase of capitalization. The software was created based on a 10-year study of 300 applicants. The goal of the proprietary Software as a Service (SaaS) is to identify opportunities that achieve a TASASS™ score in excess of 92.5%, known as "TASASS Prime™." TASASS™ is an acronym for: Transaction Analysis Situation Analysis Scoring Software™. The TASASS™ score was developed by Tony Drexel Smith through the financial and human capital resources of: TASASS, Inc, The Association of Blue Moon Advisors, Blue Moon Advisors, Inc., Blue Moon Consortium, Inc., US Capital Global, SUMATICI, Inc., and TD Smith & Associates. Enterprises that have raised capital successfully have the following commonalities: they sought the right type of capital for their stage of development and ability to repay; they created documentation that speaks to the correct capital; and they earned a minimum of 925 out of the 1,000 points possible in our TASASS™ score. Tony Drexel Smith Dr. Roberta Pellant

*The IT4ITTM Standard, Version 3.0* The Open Group, 2022-12-14 This publication is the specification of The Open Group IT4IT Standard, Version 3.0, a standard of The Open Group. It describes a reference architecture that can be used to manage the business of Information Technology (IT) and the associated end-to-end lifecycle management of Digital Products. It is intended to provide a prescriptive Target Architecture and clear guidance for the transformation of existing technology management practices for a faster, scalable, automated, and practical approach to deploying product-based investment models and providing an unprecedented level of operational control and measurable value. This foundational IT4IT Reference Architecture is independent of specific technologies, vendors, organization structures, process models, and methodologies. It

can be mapped to any existing technology landscape. It is flexible enough to accommodate the continuing evolution of operational and management paradigms for technology. It addresses every Digital Product lifecycle phase from investment decision-making to end-of-life. The IT4IT Standard addresses a critical gap in the Digital Transformation toolkit: the need for a unifying architectural model that describes and connects the capabilities, value streams, functions, and operational data needed to manage a Digital Product Portfolio at scale. The IT4IT Standard provides an approach to making digital investment decisions and managing digital outcomes that is particularly useful for:

- C-level executives responsible for Digital Transformation, as a top-down view of digital value creation
- Product Managers and Product Marketing Managers whose portfolios include significant digital content, as a way to integrate marketing priorities with product delivery practices
- Governance, risk, and compliance practitioners, as a guide to controlling a modern digital landscape
- Enterprise and IT Architects, as a template for IT tool rationalization and for governing end-to-end technology management architectures
- Technology buyers, as the basis for Requests for Information (RFIs) and Requests for Proposals (RFPs) and as a template for evaluating product completeness
- Consultants and assessors, as a guide for evaluating current practice against a well-defined standard
- Technology vendors, as a guide for product design and customer integrations
- Technical support staff, as a guide for automating and scaling up support services to deal with modern technology deployment velocity

*Capital For Keeps* Russell C. Weigel, 2015-02-20 Raising Capital for Your Company or Your Real Estate Acquisition?

Russell Weigel has been practicing securities law since 1990. For more than ten of these years he was an attorney for the Securities & Exchange Commission. Since 2001, he has been in private practice counseling public and private capital raisers and defending the securities industry and corporate executives from SEC and FINRA enforcement matters. Russell Weigel opens your eyes to the risks of raising capital but shows you a path to minimize these risks. Whether private or public, companies raising capital the wrong way and not properly planning for unforeseen events can result in substantial loss. Capital for Keeps is designed to save the entrepreneur thousands of dollars in legal fees by educating them on their options and the standards of conduct expected of them to stay away from the courthouse.

**Blockchain and Applications, 4th International Congress** Javier Prieto, Francisco Luis Benítez Martínez, Stefano Ferretti, David Arroyo Guardado, Pedro Tomás Nevado-Batalla, 2023-01-07 This book constitutes the refereed proceedings of the 4th International Congress on Blockchain and Applications 2022, BLOCKCHAIN'22, held in L'Aquila, Italy, in July 2022. Among the scientific community, blockchain and artificial intelligence are a promising combination that will transform the production and manufacturing industry, media, finance, insurance, e-government, etc. Nevertheless, there is no consensus with schemes or best practices that would specify how blockchain and artificial intelligence should be used together. The 37 full papers presented in the main track were carefully reviewed and selected from more than 75 submissions. They contain the latest advances on blockchain and artificial intelligence and on their application domains, exploring innovative ideas, guidelines, theories, models, technologies, and tools and identifying critical issues and challenges that researchers and practitioners must deal with in the future research. The book also includes 3 papers from the WEB3-TRUST workshop and 2 papers from the Doctoral Consortium.

**A Network-centric Design for Relationship-based Rights Management** Martin Roscheisen, 1998 Abstract:

Networked environments such as the Internet provide a new platform for communication and information access. In this thesis, we address the question of how to articulate and enforce boundaries of control on top of this platform, while enabling collaboration and sharing in a peer-to-peer environment. We develop the concepts and technologies for a new Internet service layer, called FIRM, that enables structured rights/relationship management. Using a prototype implementation, RManage, we show how FIRM makes it possible to unify rights/relationship management from a user-centered perspective and to support full end-to-end integration of shared control state in network services and users' client applications. We present a network-centric architecture for managing control information, which generalizes previous, client/server-based models to a peer-to-peer environment. Principles and concepts from contract law are used to identify a generic way of representing the shared structure of different kinds of relationships.

*Enterprise Interoperability V* Raúl Poler, Guy Doumeingts, Bernhard Katzy, Ricardo Chalmeta, 2012-02-25 Within a scenario of globalised markets, where the capacity to efficiently cooperate with other firms starts to become essential in order to remain in the market in an economically, socially and environmentally cost-effective manner, it can be seen how the most innovative enterprises are beginning to redesign their business model to become interoperable. This goal of interoperability is essential, not only from the perspective of the individual enterprise but also in the new business structures that are now emerging, such as supply chains, virtual enterprises, interconnected organisations or extended enterprises, as well as in mergers and acquisitions. Composed of over 40 papers, Enterprise Interoperability V ranges from academic research through case studies to industrial and administrative experience of interoperability. The international nature of the authorship continues to broaden. Many of the papers have examples and illustrations calculated to deepen understanding and generate new ideas. The I-ESA'12 Conference from which this book is drawn was organized by Polytechnic University of Valencia, on

behalf INTERVAL, and the European Virtual Laboratory for Enterprise Interoperability (INTEROP-VLab) and sponsored by the International Federation for Information Processing (IFIP) and the International Federation of Automatic Control (IFAC). A concise reference to the state of the art in systems interoperability, Enterprise Interoperability V will be of great value to engineers and computer scientists working in manufacturing and other process industries and to software engineers and electronic and manufacturing engineers working in the academic environment.
