Entrepreneurial Future of Higher Education Mary Landon Darden, 2021-01-07 Projections are frightening. Even before the onset of the COVID-19 pandemic, financial considerations were forcing the closing of increasing numbers of American colleges and universities. Higher education in the United States is facing a tsunami of economic issues and the abrupt shift to on-line learning has only accelerated the process. But it doesn't have to be this way. The wobbly two-legged stool that supports virtually every American school - tuition and endowment - was never designed to be sustainable into the 21st century. Instead, the university leaders of the future must embrace the best elements of the most forward-seeing and nimble practitioners of modern business - the entrepreneur. *Entrepreneurial Future of Higher Education: Radical Transformation in Times of Profound Change* is that rare nuts-and-bolts guide that provides the essential tools for colleges and universities to switch from barely surviving to thriving. Assisted by an impressive array experts and visionaries, higher education author and futurist Dr. Mary Landon Darden presents a do-able roadmap out of the morass of escalating costs and decreasing revenue. In no-nonsense, sometimes blunt language, Darden lays out specific, revenue streams available to virtually every college - and a step-by-step primer on how to achieve them. Entrepreneurial is not a theoretical argument, parsed with passive-voice modifiers and exceptions. It is a blueprint on how to revive, restore and secure the academy in the second decade of the 21st century. Each chapter addresses significant failures (or missed opportunity) that virtually all modern colleges can rapidly address and reform. Too many institutions are hopelessly attached to the failed practices of the past. Students have changed. Governments have changed. Economic engines and drivers have changed. The need to financially support higher education has not - and it is more crucial than ever. *Entrepreneurial Future of Higher Education: Radical Transformation in Times of Profound Change* is the answer for the post-COVID academy in America: Practical, unapologetically direct, awash in real-life applications and answers.

Public Relations Writing James Mahoney, 2025-03-31 *Public Relations Writing* is an undergraduate communication and public relations textbook. It positions writing for public relations in the context of strategic planning, and is based on traditional communication writing principles, including for news and digital media. The book illustrates how writing for all public relations tools reflects the concepts that inform professional planning and practice. This book, based on the author's

wide professional practice and tertiary teaching experiences, has been widely used in international undergraduate teaching and learning. This fourth edition continues to treat clear, concise and accurate writing for this profession as integral to all aspects of professional practice and as a skill that is not confined to media release writing. Among the book's strengths are the student exercises, including international cases, which are based on real-world examples, and references to ethical practice. This book provides a holistic approach to learning about writing in this profession. While its focus is on writing, this holistic approach, which includes material on planning a communication strategy, makes it an ideal text for introductory subjects at university as well as for specialist writing units. While it is primarily grounded in Australian practice, the book is written in line with accepted international approaches to public relations writing, including the principles of journalism's 'news writing', and contains case studies from other countries. This book appeals to audiences in early-year university students studying public relations and marketing communication. It is also suitable for professional practitioners seeking to enhance their writing skills.

Coaching a Way to Develop the Teachers Internal Commitment Eirini Diamantopoulou, 2015-02 The purpose of this study is to identify and elucidate the influence of coaching in teachers' attitude and performance as perceived by inexperienced in coaching practice nursery school. The question that guided this study is 'What is the impact of coaching in a Greek nursery school?' This study focuses on three research questions: • How do teachers evaluate the coaching experience? • What are the benefits and the implementing of coaching? • If and how teachers' interaction with coaching changes their attitude? The author's research was influenced by her first degree in early childhood education, and her own professional background. One head teacher and five teachers provided the study evidence. The qualitative approach was used to collect and analyse the data. This research has been a follow-up to a descriptive, exploratory qualitative case study. The findings were based on several different research tools such as semi-structured interviews, reflective journals, criteria sheets, coaching sheets, and SWOT sheets. The examination of the data highlights 5 key issues: the leadership effects in the working environment and teachers' performance; the coaching understanding concerns the degree in which respondents clarify the different aspects of coaching; the next category, on coaching difficulties, includes the perceived reasons for which coaching was ineffective; the coaching benefits introduces the positive contributions of the coaching process; and the final key point is the coaching influence in the teachers' attitude. The findings support that coaching influences the participants' attitude to a limited but significant degree.

The Business Plan Reference Manual for IT Businesses Fernando Almeida, José Santos, 2022-09-01 There is a great worldwide desire to launch new technology-based business. In this sense, and increasingly, entrepreneurship courses have arisen in several universities and many of the courses in the management, administration and engineering areas already offer entrepreneurship curricular units. Throughout those programs, the teams develop key integrated competencies in innovation, entrepreneurship and technology that will ultimately enable the students to create and develop new technology-

based businesses. The Business Plan Reference Manual for IT Businesses provides a reference manual for undergraduate and graduate students that intend to launch their start-up business in the IT field. It helps them to create and model the business plan of their business. Therefore, this manual is mainly aimed at instructors who want to offer a practical view of the process of modeling, designing and developing an IT start-up. Additionally, it can be individually used by entrepreneurs who wish to launch their start-up businesses in IT field. The structure of the book was defined taking into account different approaches to the construction of the business plan, which basically consider a disaggregation of some of these chapters in others smaller (e.g., marketing plan into products/services and market, financial plan into investment plan and economic-financial projections). We chose to aggregate these dimensions into a single chapter, which in our view facilitates the process of analyzing a business plan. It is also relevant to mention the inclusion of “Chapter V - Prototype description” which is innovative and intends to take into account the application of this business plan template to the information technology sector.
