The Blendification System Daniel Bruder, 2020-05-18 Shelving Guide: Business and Management / Strategic Planning / Leadership / Operations Culture, Strategy, Execution. These three components forge the path to realized potential. The Blendification® System breaks down and rebuilds these core concepts within your company's DNA, setting the foundation for an energizing, engaging, and impactful organization. It is based on the belief that many organizations fail to maximize their potential because they simply do not comprehend the magnitude of their personal and collective untapped capabilities. Many workplaces are stuck in second gear, not quite embracing and pursuing their full potential. Corporate missions are based on market dominance and incremental profit growth, leaving a massive blind spot in terms of the connection between employees, customers, and communities. This short-sightedness may provide a clear focal point, but it leaves the company, its leadership, and its employees with limited sustained motivation to realize potential. The Blendification® System embraces the connection between culture, strategy, and execution using the Strategy Whiteboard and integrating emotional and system intelligence into the following three-step model: Strategic Analysis including Culture Strategic Focus, Strategic Outcomes, and Strategic Actions Strategic Execution The Blendification® System connects culture, strategy, and execution in a meaningful way that fosters an inspired, exceptional workforce. By focusing on the unifying purpose within each organization, the platform promotes alignment between leadership and employees setting a clear, strong foundation in which every individual can thrive. With this foundation in place, organizations activate their employee's potential who then take care of their customers. By fully engaging those with whom organizations directly interact, these individuals then become the spark that ignites community-wide advancement. This is not a theory-based, philosophical book. This is an in-depth operating system by which organizations reshape their infrastructure to realize potential. The methodology outlined in The Blendification® System creates agile and efficient action, maximizing success in periods of economic expansion and times of uncertainty such as the COVID-19 outbreak, the Great Recession, and 9/11. By following the structure outlined in The Blendification® System and using the Strategy Whiteboard, organizations will move beyond financial success to uplifting employees, customers, and entire communities.

At a time when coming together is more important than ever, Parker sets forth a human-centered approach to gathering that will help everyone create meaningful, memorable experiences, large and small, for work and for play. Drawing on her expertise as a facilitator of high-powered gatherings around the world, Parker takes us inside events of all kinds to show what works, what doesn't, and why. She investigates a wide array of gatherings--conferences, meetings, a courtroom, a flash-mob party, an Arab-Israeli summer camp--and explains how simple, specific changes can invigorate any group experience. The result is a book that's both journey and guide, full of exciting ideas with real-world applications. *The Art of Gathering* will forever alter the way you look at your next meeting, industry conference, dinner party, and backyard barbecue--and how you host and attend them.

Project Retrospectives Norman L. Kerth,2013-07-15 This is the digital copy of the printed book (Copyright © 2001). With detailed scenarios, imaginative illustrations, and step-by-step instructions, consultant and speaker Norman L. Kerth guides readers through productive, empowering retrospectives of project performance. Whether your shop calls them postmortems or postpartums or something else, project retrospectives offer organizations a formal method for preserving the valuable lessons learned from the successes and failures of every project. These lessons and the changes identified by the community will foster stronger teams and savings on subsequent efforts. For a retrospective to be effective and successful, though, it needs to be safe. Kerth shows facilitators and participants how to defeat the fear of retribution and establish an air of mutual trust. One tool is Kerth's Prime Directive: Regardless of what we discover, we must understand and truly believe that everyone did the best job he or she could, given what was known at the time, his or her skills and abilities, the resources available, and the situation at hand. Applying years of experience as a project retrospective facilitator for software organizations, Kerth reveals his secrets for managing the sensitive, often emotionally charged issues that arise as teams relive and learn from each project.
