Free and Easy Website Design for Museums and Historic Sites Kelsey J. S. Ransick, 2015-12-16 Museums and historic sites faced with small budgets and staff can find it intimidating to redesign or create a website from scratch. Concerns over

resources make coding and designing (or hiring someone to do so) daunting and expensive. It does not have to be so. Content creation is inescapable when making a website, but designing and constructing a unique website can be as simple as taking an afternoon to use a color chart to pick a color scheme and paste in text from a Word document. All of the tools discussed in the book are free at the base level, and some offer upgrade packages with even more features. The advice and techniques are all created with an eye to making websites work for smaller institutions with limited budgets and timeframes. Every museum professional has come across issues when adapting general software for an institution's specific needs, and the information in this book will anticipate some of these needs by offering easy-to-implement workarounds and information on related software or services that integrate with each website. Features include: Howto guides for Wix, Weebly, WordPress, and Google Sites Detailed comparisons of WYSIWYG (What You See Is What You Get) editors by cost, features, and ease of use so that you can easily identify which platforms meet your needs Mythbusting of common website and computer assumptions Step-by-step content and design planning guide Basic HTML coding tricks and tips for the slightly more advanced users (or those who want to become so) • A free companion Web site includes links to online resources, ongoing updates to this book to keep it current, and links to other free online tools and software. Information and Communications Technology Diana Pérez Marín, 2014-01-01 Are you a student who wants to become an effective teacher in the 21st century? Maybe you are a teacher already? Would you like to learn how to take advantage of educational technologies in order to achieve your pedagogic goals? Nowadays, technology is all around us, but how do we, as teachers, make the best use of it? Technology has entered the classroom and most teachers are not trained in using it to achieve pedagogic goals. This book aims to remedy this situation. To do that, it provides the reader with many step-by-step guides and solved exercises, all written in clear language in a friendly, positive style. The book demystifies the whole process of understanding how new software or hardware works and introduces techniques to make the reader comfortable with classroom technologies. I hope that you enjoy it and find it useful. Dr. Diana Pérez Marín received a Ph.D. degree in Computer Science and Engineering from the Universidad Autonoma de Madrid in 2007. She has published more than 50 papers in journals, such as the Journal of Educational Technology, and Society and has authored the book "ICT in education" (in Spanish).

Social Media for Government Gohar F. Khan, 2017-02-15 This book provides practical know-how on understanding, implementing, and managing main stream social media tools (e.g., blogs and micro-blogs, social network sites, and content communities) from a public sector perspective. Through social media, government organizations can inform citizens, promote their services, seek public views and feedback, and monitor satisfaction with the services they offer so as to improve their quality. Given the exponential growth of social media in contemporary society, it has become an essential tool for communication, content sharing, and collaboration. This growth and these tools also present an unparalleled opportunity to implement a transparent, open, and collaborative government. However, many government organization, particularly those in the developing world, are still somewhat reluctant to leverage social media, as it requires significant policy and governance changes, as well as specific know-how, skills and resources to plan, implement and manage social media tools. As a result, governments around the world ignore or mishandle the opportunities and threats presented by social media. To help policy makers and governments implement a social media driven government, this book provides guidance in developing an

effective social media policy and strategy. It also addresses issues such as those related to security and privacy.

Bootstrap Site Blueprints Volume II will teach you to build these types of projects in an easy-to-understand fashion. The key to any complex Bootstrap project is a strong development foundation for your project. The book will first teach you how to build a Bootstrap development environment using Harp.js, Node, and Less. In the next chapters, we'll build on this foundation by creating restaurant and mobile-first aggregator projects. Once you're warmed up, we'll move on to more complex projects such as a wiki, a new magazine, a dashboard, and finally a social networking website. Whether you are brand new to Bootstrap or a seasoned expert, this book will provide you with the skills you need to successfully create a

number of popular web applications and websites. Style and approach This book takes a step-by-step approach to building each project, explained in a conversational and easy-to-follow style. We start by designing a development environment that will be used in all of the book's projects. The projects start from an easy-intermediate level and progress to advanced as the book goes on.

Exploring Complexity in Health: An Interdisciplinary Systems Approach A. Hoerbst, W.O. Hackl, N. de Keizer, 2016-09-22 The field of health is an increasingly complex and technical one; and an area in which a more multidisciplinary approach would undoubtedly be beneficial in many ways. This book presents papers from the conference 'Health - Exploring Complexity: An Interdisciplinary Systems Approach', held in Munich, Germany, from August 28th to September 2nd 2016. This joint conference unites the conferences of the German Association for Medical Informatics, Biometry and Epidemiology (GMDS), the German Society for Epidemiology (DGEpi), the International Epidemiological Association - European Region, and the European Federation for Medical Informatics (EFMI). These societies already have long-standing experience of integrating the disciplines of medical informatics, biometry, epidemiology and health data management. The book contains over 160 papers, and is divided into 14 sections covering subject areas such as: health and clinical information systems; eHealth and telemedicine; big data and advanced analytics; and evidence-based health informatics, evaluation and education, among many others. The book will be of value to all those working in the field of health and interested in finding new ways to enable the collaboration of different scientific disciplines and the establishment of comprehensive methodological approaches.
