Momentum, Direction, and Divergence William Blau, 1995-03-20 A guide to the latest, most promising technical indicators and their applications. Momentum, direction, and divergence are the three basic components of nearly all technical indicators used in the analysis of stock and commodities trading. And for those who understand them and their applications, they are also the pillars of a high-performance trading strategy. In this groundbreaking book, technical wizard William Blau schools financial professionals in all three. Combining the latest financial information with dozens of eye-opening graphics, Blau clearly, concisely, and with a minimum of complex mathematics:

- * Introduces the principle of double smoothing and develops potent new indicators based on double smoothing techniques
- * Describes the uses and limitations of a variety of notable technical indicators
- * Explains momentum, direction, and divergence and new ways to apply them
- * Presents the True Strength Index and shows how it can dramatically improve most directional indicators
- * Provides new ways of identifying divergence that make implementation far simpler than ever before

MOMENTUM, DIRECTION, AND DIVERGENCE The Wiley Trader's Advantage is a series of concise, highly focused books designed to keep savvy traders in tune with the latest successful strategies and techniques used by the keenest minds in the business. In this latest volume, technical expert Bill Blau shows you how momentum, direction, and divergence form the basis of most technical indicators and how they can work for you to provide a considerable competitive advantage. Clearly, concisely, and with a minimum of complex mathematics, Blau shows you how to understand and apply them. Integrating the latest financial insights with more than 75 easy-to-follow graphics, Blau describes the uses and limitations of many of today's most notable technical indicators. He then demonstrates a variety of ways in which the principles of momentum, direction, and divergence can be used to create a versatile new set of technical indicators or to improve the effectiveness of the most widely used traditional indicators. Focusing on the groundbreaking double smoothing concept, which he introduces for the first time in this book, William Blau:

- * Develops reliable new momentum indicators based on double smoothing techniques
- * Shows how these indicators improve the effectiveness of most popular oscillators, including the RSI, MACD, and stochastic indicators, by solving a host of timing problems
- * Combines the standard Welles Wilder techniques with his original True Strength Index to improve the effectiveness of most directional movement indicators
- * Introduces new ways of identifying divergence that make implementation simpler than ever
- * And much more

A complete guide to the most potent new indicators and

their applications, Momentum, Direction, and Divergence is an indispensable resource for traders, portfolio managers, and all financial professionals.

Steidlmayer on Markets J. Peter Steidlmayer, Steven B. Hawkins, 2003-01-03 Proven techniques for market profile users at any level A market profile presents a number of basic elements from the market in an easily understood graphic format that, when analyzed properly, can yield profitable intraday and swing trades that traditional indicators do not reveal. Steidlmayer on Markets shows readers how to find these opportunities using the innovative techniques developed by the author during his many years of trading the market. This fully updated Second Edition covers innovations in both technology and technique and broadens the scope of market profile to include stocks. J. Peter Steidlmayer (Chicago, IL) joined the Chicago Board of Trade in 1963 and has been an independent trader ever since. Steidlmayer served on the Board of Directors of the Board of Trade in 1981-1983. While a director, he was responsible for initiating Market Profile and the Liquidity Data Bank. Steve Hawkins (Chicago, IL) has experience in trading in both stocks and commodities. Over the past seven years, Hawkins has educated traders across the globe. He has also collaborated on the writing of books on trading and written articles for industry trade publications. He is a graduate of the University of Illinois with a degree in economics. New technology and the advent of around the clock trading have opened the floodgates to both foreign and domestic markets. Traders need the wisdom of industry veterans and the vision of innovators in today's volatile financial marketplace. The Wiley Trading series features books by traders who have survived the market's ever changing temperament and have prospered—some by reinventing systems, others by getting back to basics. Whether a novice trader, professional or somewhere in-between, these books will provide the advice and strategies needed to prosper today and well into the future.

Granville's New Key to Stock Market Profits Joseph E. Granville, 2018-12-05 In this remarkable stock market study, one of Wall Street's best known market analysts reveals a new technical tool he developed for gauging the pulse of the trading cycle. Called the On Balance Volume Theory, this tool tends to fill in some of the conspicuous voids in the famous Dow Theory—especially the lack of discussion and use of stock volume figures. As straightforward as a set of bridge rules, on-balance volume (OBV) denotes each buy and sell signal so that a trader can follow them without his own emotions tending to lead him astray—emotions causing most of the market misjudgements that take place. The Granville OBV method is essentially scientific, has a high degree of accuracy and has many automatic features. The reader of this book will be introduced to a method whereby he may benefit by the earlier movements of volume over price—the “early warning” radar of volume buy and sell signals.

DeMark Indicators Jason Perl, 2010-06-03 “Long a secret weapon for the hedge-fund elite,” says Trader Monthly, the DeMark Indicators are now used by more than 35,000 traders. This book provides an easy-to-follow system for using the indicators to identify market turns as they happen. Author Jason Perl gives a concise introduction to thirty-nine of the

DeMark Indicators, and then shows how to combine the indicators and time frames to achieve a higher probability of trading success. Thomas R. DeMark, the creator of the DeMark Indicators and one of the most well-respected practitioners of technical analysis wrote the Foreword to this book. This is the second book in the Bloomberg Market Essentials™: Technical Analysis series, which covers the key elements of the most widely used technical analysis tools. Silver Medal Winner, Investing Category, Axiom Business Book Awards (2009) Winner: Book Series Cover Design, The Bookbinders Guild of New York/2009 New York Book Show Awards

Trades About to Happen David H. Weis, 2013-04-22 The definitive book on adapting the classic work of Richard Wyckoff to today's markets Price and volume analysis is one of the most effective approaches to market analysis. It was pioneered by Richard Wyckoff, who worked on Wall Street during the golden age of technical analysis. In *Trades About to Happen*, veteran trader David Weis explains how to utilize the principles behind Wyckoff's work and make effective trades with this method. Page by page, Weis clearly demonstrates how to construct intraday wave charts similar to Wyckoff's originals, draw support/resistance lines, interpret the struggle for dominance in trading ranges, and recognize action signals at turning points. Analyzes markets one bar chart at a time, which recreates the ambiguity of actual trading Emphasizes reading price/volume charts without a secondary reliance on mathematical indicators Includes a short study guide in the appendix to help readers master the material Filled with in-depth insights and practical advice, *Trades About to Happen* promises to be the definitive work on utilizing Wyckoff's classic methods in today's turbulent markets.

Providing the tools you need to make the right decisions at the right times, it helps you enter market shifts early and either pull out before losses accrue or hang on for a long and refreshingly predictable ride. Mastering the Trade covers: The five psychological truths that will transform you from a mistake-prone novice into a savvy trading professional Exact entry, exit, and stop-loss levels for the intraday trading of stocks, options, ETFs, e-mini futures, 30-year bonds, currencies, and more Seven key internals, from \$TICKS to five-minute volume—critical for gauging pending market direction from the opening bell Premarket checklists for analyzing recent market behavior and calculating on each trading day what you plan to do, how you plan to do it, and why Airtight risk control techniques for protecting trading capital—the most important component of a professional trading career After spending many years on various trading desks, Carter has developed an intuitive understanding of how the markets work. In Mastering the Trade, he gives you unlimited access to everything the markets have taught him—so you can make an exceptional living on the frontlines of professional trading.

Fibonacci Analysis Constance Brown,2010-05-13 Only someone who is both a successful trader and a successful writer could pull off what Constance Brown has accomplished in this book: distilling Fibonacci analysis to two hundred or so comprehensive, clearly written, eminently practical pages. Brown knows exactly what a professional trying to come up to speed on a new trading tool needs and she provides it, covering what Fibonacci analysis is, how it works, where it comes

from, pitfalls and dangers, and, of course, how to use it. Basic trading strategies are touched upon in virtually every chapter. Fibonacci analysis is one of the most popular technical analysis tools, yet it is often used incorrectly. Brown quickly clears up common misconceptions and moves on to show, step by step, the correct way to apply the technique in any market. Those with Fibonacci analysis software will learn how to use it with maximum effectiveness; those without will chart the market the old-fashioned way. All will find answers to the trader's most important questions: Where is the market going? At what level should my stop be entered? Based on the size of my trading account, how much should I leverage into a trading position? Can I tell if I am in trouble before my stop is hit? How much should I buy or sell if given a second or third opportunity? Occasional references to other tools--including Elliott Wave, W.D. Gann, and candlestick charts--and an extensive bibliography make this book richer for accomplished technical analysts without confounding the less experienced. Plentiful real-life examples and dozens of carefully annotated charts insure every reader will get maximum value from every minute spent with this book. Gold Medal Winner (tie), Investing Category, Axiom Business Book Awards (2009) Winner: Book Series Cover Design, The Bookbinders Guild of New York/2009 New York Book Show Awards
