The 40 full papers, 8 short papers and 6 workshop presented were carefully reviewed and selected from 121 submissions. The papers reflect the conference sessions as follows: cloud, IoT and edge computing, collaborative IoT services and applications, artificial intelligence, software development, teleportation protocol and entanglement swapping, network based on the neural network, scheme based on blockchain and zero-knowledge proof in vehicle networking, software development.

Cyber Security Intelligence and Analytics Zheng Xu,Saed Alrabaee,Octavio Loyola-González,Niken Dwi Wahyu Cahyani,Nurul Hidayah Ab Rahman,2023 This book provides the proceedings of the 5th International Conference on Cyber Security Intelligence and Analytics. The 5th International Conference on Cyber Security Intelligence and Analytics (CSIA 2023) is an international conference dedicated to promoting novel theoretical and applied research advances in the interdisciplinary agenda of cyber security, particularly focusing on threat intelligence and analytics and countering cybercrime. Cyber security experts, including those in data analytics, incident response and digital forensics, need to be able to rapidly detect, analyze and defend against a diverse range of cyber threats in near real-time conditions. We are organizing the CSIA 2023 at Radisson Blu Shanghai Pudong Jinqiao Hotel. It will feature a technical program of refereed papers selected by the international program committee, keynote address.

**C++ Template Metaprogramming in Practice** Li Wei,2020-12-02 Using the implementation of a deep learning framework as an example, C++ Template Metaprogramming in Practice: A Deep Learning Framework explains the application of metaprogramming in a relatively large project and emphasizes ways to optimize systems performance. The book is suitable for developers with a basic knowledge of C++. Developers familiar with mainstream deep learning frameworks can also refer to this book to compare the differences between the deep learning framework implemented with metaprogramming and compile-time computing with deep learning frameworks using object-oriented methods. Consisting of eight chapters, the book starts with two chapters discussing basic techniques of metaprogramming and compile-time

computing. The rest of the book's chapters focus on the practical application of metaprogramming in a deep learning framework. It examines rich types and systems, expression templates, and writing complex meta-functions, as well as such topics as: Heterogeneous dictionaries and policy templates An introduction to deep learning Type system and basic data types Operations and expression templates Basic layers Composite and recurrent layers Evaluation and its optimization Metaprogramming can construct flexible and efficient code. For C++ developers who are familiar with object-oriented programming, the main difficulty in learning and mastering C++ metaprogramming is establishing the thinking mode of functional programming. The meta-programming approach involved at compile time is functional, which means that the intermediate results of the construction cannot be changed, and the impact may be greater than expected. This book enables C++ programmers to develop a functional mindset and metaprogramming skills. The book also discusses the development cost and use cost of metaprogramming and provides workarounds for minimizing these costs.

**Digital Currency and Consumption** Jashim Khan,Russell Belk,2024-12-31 The digitalization of payment modes, combined with the development of Blockchain technology, is shaping the future of digital currency worldwide. Many financial regulators are experimenting with the feasibility of digital currencies nationally in a variety of forms, such as cryptocurrency, virtual currency and central bank digital currency. These digital currencies are just some of those discussed in this book. Each facilitates a transaction efficiently and will likely open an alternative payment system, possibly leading to a global digital currency. This book will present and highlight a broad view of digital currency in the era of globalization. This book will address the meaning of money in a global world. By going beyond fungible national fiat-based currencies to global cryptocurrency and stablecoins, virtual currencies promise to disintermediate and decentralize money. The digital currencies that are the focus of this book use the internet for transactions and harbor the potential to make a unified digital currency system across the globe. This book explores the role of digital currency in influencing consumer behavior, from spending or saving to gaming, tipping and gambling. It asks what is the future of digital currency and what is its role in facilitating and transforming the future of the metaverse? Digital Currency and Consumption will be useful reading for a postgraduate audience to understand how digital currencies are shaping the digitalization of transactions and behavior of consumer citizens. It will be of value to researchers interested in a wide variety of disciplines, including international business, finance and consumer behavior.

**Quotations from Chairman Mao Tse-Tung** Mao Tse-Tung,Mao Zedong,2013-04-16 Quotations from Chairman Mao Tse-Tung' is a volume of selected statements taken from the speeches and writings by Mao Mao Tse-Tung, published from 1964 to 1976. It was often printed in small editions that could be easily carried and that were bound in bright red covers, which led to its western moniker of the 'Little Red Book'. It is one of the most printed books in history, and will be of considerable value to those with an interest in Mao Tse-Tung and in the history of the Communist Party of China. The

chapters of this book include: 'The Communist Party', 'Classes and Class Struggle', 'Socialism and Communism', 'The Correct Handling of Contradictions Among The People', 'War and Peace', 'Imperialism and All Reactionaries ad Paper Tigers', 'Dare to Struggle and Dare to Win', et cetera. We are republishing this antiquarian volume now complete with a new prefatory biography of Mao Tse-Tung.

**COVID-19** Parag Verma,Ankur Dumka,Alaknanda Ashok,Anuj Bhardwaj,Amit Dumka,2021-08-17 This book highlights progress in terms of Virus Biology and Infection Detection, Prevention, and Control, along with Screening, Testing, and Detection Techniques, that will provide learners and researchers (from basic to advanced) with the most innovative computer-driven methodologies for the fight against COVID-19. In addition, this book also covers the Pre- and Post-Impact of the COVID-19 Pandemic Crisis that will definitely provide useful content for researchers to think broadly about the analytical areas affected by COVID-19. This ultimately shows different paths to the same destination to help understand the nature of the COVID-19 pandemic and how to avoid it in the future.

*Samsung Rising* Geoffrey Cain,2020-03-17 An explosive exposé of Samsung that "reads like a dynastic thriller, rolling through three generations of family intrigue, embezzlement, bribery, corruption, prostitution, and other bad behavior" (The Wall Street Journal). LONGLISTED FOR THE FINANCIAL TIMES AND MCKINSEY BUSINESS BOOK OF THE YEAR AWARD Based on years of reporting on Samsung for The Economist, The Wall Street Journal, and Time, from his base in South Korea, and his countless sources inside and outside the company, Geoffrey Cain offers a penetrating look behind the curtains of the biggest company nobody in America knows. Seen for decades in tech circles as a fast follower rather than an innovation leader, Samsung today has grown to become a market leader in the United States and around the globe. They have captured one quarter of the smartphone market and have been pushing the envelope on every front. Forty years ago, Samsung was a rickety Korean agricultural conglomerate that produced sugar, paper, and fertilizer, located in a backward country with a third-world economy. With the rise of the PC revolution, though, Chairman Lee Byung-chul began a bold experiment: to make Samsung a major supplier of computer chips. The multimillion- dollar plan was incredibly risky. But Lee, wowed by a young Steve Jobs, who sat down with the chairman to offer his advice, became obsessed with creating a tech empire. And in Samsung Rising, we follow Samsung behind the scenes as the company fights its way to the top of tech. It is one of Apple's chief suppliers of technology critical to the iPhone, and its own Galaxy phone outsells the iPhone. Today, Samsung employs over 300,000 people (compared to Apple's 80,000 and Google's 48,000). The company's revenues have grown more than forty times from that of 1987 and make up more than 20 percent of South Korea's exports. Yet their disastrous recall of the

Galaxy Note 7, with numerous reports of phones spontaneously bursting into flames, reveals the dangers of the company's headlong attempt to overtake Apple at any cost. A sweeping insider account, Samsung Rising shows how a determined and fearless Asian competitor has become a force to be reckoned with.

*Proceedings of the 2023 4th International Conference on Artificial Intelligence and Education (ICAIE 2023)* Fang Huang,Zehui Zhan,Intakhab Alam Khan,Mehmet Cüneyt Birkök,2023-10-23 This is an open access book.ICAIE started in 2020, the last two sessions of ICAIE have all been successfully published and indexed by EI & Scopus (Read more). Prometheus: Up & Running Brian Brazil,2018-07-09 Get up to speed with Prometheus, the metrics-based monitoring system used by tens of thousands of organizations in production. This practical guide provides application developers, sysadmins, and DevOps practitioners with a hands-on introduction to the most important aspects of Prometheus, including

dashboarding and alerting, direct code instrumentation, and metric collection from third-party systems with exporters. This open source system has gained popularity over the past few years for good reason. With its simple yet powerful data model and query language, Prometheus does one thing, and it does it well. Author and Prometheus developer Brian Brazil guides you through Prometheus setup, the Node exporter, and the Alertmanager, then demonstrates how to use them for application and infrastructure monitoring. Know where and how much to apply instrumentation to your application code Identify metrics with labels using unique key-value pairs Get an introduction to Grafana, a popular tool for building dashboards Learn how to use the Node Exporter to monitor your infrastructure Use service discovery to provide different views of your machines and services Use Prometheus with Kubernetes and examine exporters you can use with containers Convert data from other monitoring systems into the Prometheus format

  Digital and Social Media Marketing Nripendra P. Rana,Emma L. Slade,Ganesh P. Sahu,Hatice Kizgin,Nitish Singh,Bidit Dey,Anabel Gutierrez,Yogesh K. Dwivedi,2019-11-11 This book examines issues and implications of digital and social media marketing for emerging markets. These markets necessitate substantial adaptations of developed theories and approaches employed in the Western world. The book investigates problems specific to emerging markets, while identifying new theoretical constructs and practical applications of digital marketing. It addresses topics such as electronic word of mouth (eWOM), demographic differences in digital marketing, mobile marketing, search engine advertising, among others. A radical increase in both temporal and geographical reach is empowering consumers to exert influence on brands, products, and services. Information and Communication Technologies (ICTs) and digital media are having a significant impact on the way people communicate and fulfil their socio-economic, emotional and material needs. These technologies are also being harnessed by businesses for various purposes including distribution and selling of goods, retailing of consumer services, customer relationship management, and influencing consumer behaviour by employing digital marketing practices. This book considers this, as it examines the practice and research related to digital and social media marketing.

  **How to Text a Girl** Chase Amante,2016 One of the world's most vaunted dating experts shows you what to text, when to text it, and why... So you can get the dates and girlfriends you deserve... --

  *Caring in Times of Precarity* Chow Yiu Fai,2018-12-14 Caring in Times of Precarity draws together two key cultural observations: the increase in those living a single life, and the growing attraction of creative careers. Straddling this historical juncture, the book focuses on one particular group of 'precariat': single women in Shanghai in various forms of creative (self-)employment. While negotiating their share of the uncanny creative work ethos, these women also find themselves interpellated as shengnü ('left-over women') in a society configured by a mix of Confucian values, heterosexual ideals, and global images of womanhood. Following these women's professional, social and intimate lives, the book refuses to

see their singlehood and creative labour as problematic, and them as victims. It departs from dominant thinking on precarity, which foregrounds and critiques the contemporary need to be flexible, mobile, and spontaneous to the extent of (self-)exploitation, accepting insecurity. The book seeks to understand– empirically and specifically–women's everyday struggles and pleasures. It highlights the up-close, everyday embodied, affective, and subjective experience in a particular Chinese city, with broader, global resonances well beyond China. Exploring the limits of the politics of precarity, the book proposes an ethics of care.

*How to Be Normal* Phil Christman,2022-02-01 Phil Christman is one of the best cultural critics working today. Or, as a reviewer of his previous book, Midwest Futures, put it, one of the most underappreciated writers of [his] generation. You may also know Phil from his columns in Commonweal and Plough, or his viral essay What Is It Like To Be A Man?, the latter adapted in his new book, How to Be Normal. Christman‚Äôs second book includes essays on How To Be White, How to Be Religious, How To Be Married, and more, in addition to new versions of the above. Find in it also brilliant analyses of middlebrow culture, bad movies, Mark Fisher, Christian fundamentalism, and more. With exquisite attention to syntax and prose, the astoundingly well-read Christman pairs a deceptively breezy style with radical openness. In his witty, original hands, seemingly normal subjects are rendered exceptional, and exceptionally.

*Learning For Action* Peter Checkland,John Poulter,2007-04-02 After an explanation of the book's purpose, the authors provide in Part 1 first an overview of SSM as a whole, then a fleshed-out account with just enough detail and advice to enable the reader to set about using the approach in problem situations of concern. Part 2 describes examples of SSM in action and also pays special attention to one of the most common application areas: that of work in the information system/information technology field. A final chapter in part 2 discusses the difficulties some people have in grasping the true nature of SSM, drawing attention to the inadequacies in much of the secondary literature. Appendices provide an outline of the theoretical considerations which underpin SSM, a guide to sources of further information and illustrations of some of SSM's techniques.

*Affective Publics* Zizi Papacharissi,2015 Over the past few decades, we have witnessed the growth of movements using digital means to connect with broader interest groups and express their points of view. These movements emerge out of distinct contexts and yield different outcomes, but tend to share one thing in common: online and offline solidarity shaped around the public display of emotion. Social media facilitate feelings of engagement, in ways that frequently make people feel re-energized about politics. In doing so, media do not make or break revolutions but they do lend emerging, storytelling publics their own means for feeling their way into events, frequently by making those involved a part of the developing story. Technologies network us but it is our stories that connect us to each other, making us feel close to some and distancing us from others. Affective Publics explores how storytelling practices facilitate engagement among movements tuning into a current issue or event by employing three case studies: Arab Spring movements, various iterations of Occupy, and everyday

casual political expressions as traced through the archives of trending topics on Twitter. It traces how affective publics materialize and disband around connective conduits of sentiment every day and find their voice through the soft structures of feeling sustained by societies. Using original quantitative and qualitative data, Affective Publics demonstrates, in this groundbreaking analysis, that it is through these soft structures that affective publics connect, disrupt, and feel their way into everyday politics.
