Millennials Talking Media Sylvia Sierra, 2021-10-09 Friends don't let friends skip leg day. You shall not pass! I'll be back. The way we read these lines—whether or not you picture Gandalf, hear the deep monotone of the Terminator, or smile—makes it clear that media consumption affects our everyday lives, language, and how we identify as part of a group. *Millennials Talking Media* examines how U.S. Millennial friends embed both old media (books, songs, movies, and TV shows) and new media (YouTube videos, videogames, and internet memes) in their everyday talk for particular interactional purposes. Sylvia Sierra presents case studies featuring the recorded talk of Millennial friends to demonstrate how and why these speakers make media references and use them to handle awkward moments and other interactional dilemmas. Sierra's analysis shows how such references contribute to epistemic management and frame shifts in conversation, which ultimately work together to construct a shared sense of Millennial identity. Building on contemporary work in media studies, Sierra weaves together the most current linguistic theories regarding knowledge, framing, and identity to create a book that will be of interest to Boomers, Gen Xers, Millennials, and Gen Z alike.

**Black Feelings** Lisa M. Corrigan, 2020-02-25 Honorable Mention Recipient of the 2021 Marie Hochmuth Nichols Award for Outstanding Scholarship in Public Address by the National Communication Association In the 1969 issue of *Negro Digest*, a young Black Arts Movement poet then-named Ameer (Amiri) Baraka published “We Are Our Feeling: The Black Aesthetic.” Baraka’s emphasis on the importance of feelings in Black selfhood expressed a touchstone for how the Black liberation movement grappled with emotions in response to the politics and racial violence of the era. In her latest book, award-winning author Lisa M. Corrigan suggests that Black Power provided a significant repository for negative feelings, largely Black pessimism, to resist the constant physical violence against Black activists and the psychological strain of political disappointment. Corrigan asserts the emergence of Black Power as a discourse of Black emotional invention in opposition to Kennedy-era white hope. As integration became the prevailing discourse of racial liberalism shaping midcentury discursive structures, so too, did racial feelings mold the biopolitical order of postmodern life in America. By examining the discourses produced by Martin Luther King, Malcolm X, Stokely Carmichael, Huey Newton, Eldridge Cleaver, and other Black Power icons who were marshaling Black feelings in the service of Black political action, Corrigan traces how Black liberation activists mobilized new emotional repertoires

*Gandhi in India's Literary and Cultural Imagination* Nishat Zaidi, Indrani Das Gupta, 2022-07-05 This book engages with the socio-cultural imaginings of Gandhi in literature, history, visual and popular culture. It explores multiple iterations of his ideas, myths and philosophies, which have inspired the work of filmmakers, playwrights, cartoonists and artists for generations. Gandhi's politics of non-violent resistance and satyagraha inspired various political leaders, activists and movements and has been a subject of rigorous scholarly enquiry and theoretical debates across the globe. Using diverse resources like novels, autobiographies, non-fictional writings, comic books, memes, cartoons and cinema, this book traces the pervasiveness of the idea of Gandhi which has been both idolized and lampooned. It explores his political ideas on themes such as modernity and secularism, environmentalism, abstinence, self-sacrifice and political freedom along with their diverse interpretations, caricatures, criticisms and appropriations to arrive at an understanding of history, culture and society. With contributions from scholars with diverse research interests, this book will be an essential read for students and researchers of political philosophy, cultural studies, literature, Gandhi and peace studies, political science and sociology.

**JavaScript by Example** Dani Akash S, 2017-08-30 A project based guide to help you get started with web development by building real-world and modern web applications About This Book Learn JavaScript from scratch by building clones of popular web applications Understand the core concepts and techniques surrounding JavaScript with this power-packed hands-on guide Explore modern JavaScript frameworks and libraries such as Node, React and Webpack Who This Book Is For The target audience for this book is developers with little or basic knowledge of working with JavaScript. If you are an emerging web developer with experience in building static web pages using HTML and CSS, this book will teach you to add JavaScript elements to make your website interactive and dynamic. What You Will Learn A strong understanding of web application development with JavaScript and ES6. A firm foundation on which to master other JavaScript frameworks and libraries. Write maintainable and scalable code by organizing functions into modules. Importance of tools such as Node, NPM, Babel, and Webpack in Front-end development. Work with real-time data such as incoming video streams, texts, and so on Integrate React with JavaScript to build large-scale applications. Utilize Redux to manage data across React components and greatly speed up the development process In Detail JavaScript is the programming language that all web developers need to learn. The first item on our JavaScript to-do list is building a To-do list app, which you'll have done by the end of the first chapter. You'll explore DOM manipulation with JavaScript and work with event listeners. You'll work with images and text to build a Meme creator. You will also learn about ES (ECMAScript) classes, and will be introduced to layouts using the CSS3 Flexbox. You'll also develop a responsive Event Registration form that allows users to register for your upcoming event and use charts and graphics to display registration data. You will then build a weather application, which will show you different ways perform AJAX requests and work with dynamic, external data. WebRTC enables real-time communication in a web browser; you'll learn how to use it when you build a real-time video-call and chat application later in the book. Towards

the end of the book, you will meet React, Facebook's JavaScript library for building user interfaces. You'll throw together a blog with React, and get a feel for why this kind of JavaScript framework is used to build large-scale applications. To make your blog more maintainable and scalable, you'll use Redux to manage data across React components. Style and approach This project-based guide will teach you all the facets of JavaScript through real-world app examples.

Design for Tomorrow—Volume 1 Amaresh Chakrabarti,Ravi Poovaiah,Prasad Bokil,Vivek Kant,2021-04-26 This book showcases cutting-edge research papers from the 8th International Conference on Research into Design (ICoRD 2021) written by eminent researchers from across the world on design processes, technologies, methods and tools, and their impact on innovation, for supporting design for a connected world. The theme of ICoRD'21 has been "Design for Tomorrow". The world as we know it in our times is increasingly becoming connected. In this interconnected world, design has to address new challenges of merging the cyber and the physical, the smart and the mundane, the technology and the human. As a result, there is an increasing need for strategizing and thinking about design for a better tomorrow. The theme for ICoRD'21 serves as a provocation for the design community to think about rapid changes in the near future to usher in a better tomorrow. The papers in this book explore these themes, and their key focus is design for tomorrow: how are products and their development be addressed for the immediate pressing needs within a connected world? The book will be of interest to researchers, professionals and entrepreneurs working in the areas on industrial design, manufacturing, consumer goods, and industrial management who are interested in the new and emerging methods and tools for design of new products, systems and services.

**Re-Composing YouTube** Jonas Wolf,2024-09-30 YouTube features a wide array of multimodal musical figurations, including fan-made music videos, musical aestheticisations of pre-circulating content, and musical self-performances. Jonas Wolf explores open-ended forms of musical creative relay on YouTube, delving into formal, imitative, affective, and (non-)institutional aspects of networked media remix and (self-)aestheticisation. Beyond creating value for non-musical fields of discourse, this study is directed at filling a gap in a largely ocularcentric domain of study. It provides a concise theory of vernacular composition within our time's total digital archive that accounts for socio-aesthetic phenomena and their relation to systems of knowledge, control, and discourse.

*Inhabiting Cyberspace in India* Simi Malhotra,Kanika Sharma,Sakshi Dogra,2021-02-06 This book gathers a selection of essays on the multifaceted aspects of cyber culture in India, both online and offline. It presents an in-depth analysis of cyberspace and its components, while also exploring its lived reality. The respective contributions highlight theoretical perspectives that address questions of relationality regarding all aspects of cyber culture in India, from the physical to the virtual. Bearing in mind India's vast cultural diversity, which is shaped by different levels of political, social, and economic development, the book offers nuanced studies that analyze the complexities of cyberspace and digital culture in India. The

book appeals to all readers interested in technology, cultural studies, online communication networks, feminism, virtual diasporas, and sociology.

Humour Translation in the Age of Multimedia Margherita Dore, 2020-11-02 This volume seeks to investigate how humour translation has developed since the beginning of the 21st century, focusing in particular on new ways of communication. The authors, drawn from a range of countries, cultures and academic traditions, address and debate how today's globalised communication, media and new technologies are influencing and shaping the translation of humour. Examining both how humour translation exploits new means of communication and how the processes of humour translation may be challenged and enhanced by technologies, the chapters cover theoretical foundations and implications, and methodological practices and challenges. They include a description of current research or practice, and comments on possible future developments. The contributions interconnect around the issue of humour creation and translation in the 21st century, which can truly be labelled as the age of multimedia. Accessible and engaging, this is essential reading for advanced students and researchers in Translation Studies and Humour Studies.

*The Electric Meme* Robert Aunger, 2013-07-30 From biology to culture to the new new economy, the buzzword on everyone's lips is meme. How do animals learn things? How does human culture evolve? How does viral marketing work? The answer to these disparate questions and even to what is the nature of thought itself is, simply, the meme. For decades researchers have been convinced that memes were The Next Big Thing for the understanding of society and ourselves. But no one has so far been able to define what they are. Until now. Here, for the first time, Robert Aunger outlines what a meme physically is, how memes originated, how they developed, and how they have made our brains into their survival systems. They are thoughts. They are parasites. They are in control. A meme is a distinct pattern of electrical charges in a node in our brains that reproduces a thousand times faster than a bacterium. Memes have found ways to leap from one brain to another. A number of them are being replicated in your brain as you read this paragraph. In 1976 the biologist Richard Dawkins suggested that all animals -- including humans -- are puppets and that genes hold the strings. That is, we are robots serving as life support for the genes that control us. And all they want to do is replicate themselves. But then, we do lots of things that don't seem to help genes replicate. We decide not to have children, we waste our time doing dangerous things like mountain climbing, or boring things like reading, or stupid things like smoking that don't seem to help genes get copied into the next generation. We do all sorts of cultural things for reasons that don't seem to have anything to do with genes. Fashions in sports, books, clothes, ideas, politics, lifestyles come and go and give our lives meaning, so how can we be gene robots? Dawkins recognized that something else was going on. We communicate with one another and we get ideas, and these ideas seem to have a life of their own. Maybe there was something called memes that were like thought genes. Maybe our bodies were gene robots and our minds were meme robots. That would mean that what we think is not the result of our own

creativity, but rather the result of the evolutionary flow of memes as they wash through us. What is the biological reality of an idea with a life of its own? What is a thought gene? It's a meme. And no one before Robert Aunger has established what it physically must be. This elegant, paradigm-shifting analysis identifies how memes replicate in our brains, how they evolved, and how they use artifacts like books and photographs and advertisements to get from one brain to another. Destined to inflame arguments about free will, open doors to new ways of sharing our thoughts, and provide a revolutionary explanation of consciousness, *The Electric Meme* will change the way each of us thinks about our minds, our cultures, and our daily choices.

**Memetics** Tim Tyler, 2011-08-19 Memetics is the name commonly given to the study of memes - a term originally coined by Richard Dawkins to describe small inherited elements of human culture. Memes are the cultural equivalent of DNA genes - and memetics is the cultural equivalent of genetics. Memes have become ubiquitous in the modern world - but there has been relatively little proper scientific study of how they arise, spread and change - apparently due to turf wars within the social sciences and misguided resistance to Darwinian explanations being applied to human behaviour. However, with the modern explosion of internet memes, I think this is bound to change. With memes penetrating into every mass media channel, and with major companies riding on their coat tails for marketing purposes, social scientists will surely not be able to keep the subject at arm's length for much longer. This will be good - because an understanding of memes is important. Memes are important for marketing and advertising. They are important for defending against marketing and advertising. They are important for understanding and managing your own mind. They are important for understanding science, politics, religion, causes, propaganda and popular culture. Memetics is important for understanding the origin and evolution of modern humans. It provides insight into the rise of farming, science, industry, technology and machines. It is important for understanding the future of technological change and human evolution. This book covers the basic concepts of memetics, giving an overview of its history, development, applications and the controversy that has been associated with it.

*Producing New and Digital Media* James Cohen, Thomas Kenny, 2015-08-20 *Producing New and Digital Media* is your guide to understanding new media, diving deep into topics such as cultural and social impacts of the web, the importance of digital literacy, and creating in an online environment. It features an introductory, hands-on approach to creating user-generated content, coding, cultivating an online brand, and storytelling in new and digital media. In showing you how to navigate the world of digital media and also complete digital tasks, this book not only teaches you how to use the web, but understand why you use it. **KEY FEATURES** For students- a companion site that features research resources and links for further investigation For instructors- a companion site that features lecture slides, a sample syllabus, and an Instructor's Manual. Features a unique approach that covers media studies aspects

with production and design tutorials. Covers up-to-date forms of communication on the web such as memes, viral videos, social media, and more pervasive types of online languages.

**The Untold Help of Harmful Visual Jokes** Mary Gregg, 2023-09-05 This book argues that when visual jokes are harmful, they harm in a specific way: a subject's personhood is revoked in a way that differs both in kind and degree depending on whether that person is depicted or described. Such revocation can occur in every role and any stage within the joke's context, from character to audience member, from moment of depiction to uncritical exposure. Unlike a mere unhumorous insult, which doesn't require the sympathy of its audience but can operate solely between the target and the bully, a joke requires a particular kind of response from its audience to complete itself—to "deliver", which requires not only some degree of complicity from audience members, but a complicity earned at the expense of the joke's referent. This book shows how we need not prevent the occurrence of these things in order to undermine their oppressive power—we only need the right kind of recontextualization: turning those utterances into jokes or turning those jokes against themselves. Unlike other forms of visual oppression, the harms contained within visual jokes can be reconfigured to affirm those they were created to harm, changing their function from jokes which attack others to jokes which attack themselves, empowering those they were created to target by calling into question the problematic conceptions of audiences who are sympathetic to the harmful joke's initial formulation.

**Black, Queer, and Untold** Jon Key, 2024-11-12 Growing up in Seale, Alabama as a Black Queer kid, then attending the Rhode Island School of Design as an undergraduate, Jon Key hungered to see himself in the fields of Art and Design. But in lectures, critiques, and in the books he read, he struggled to see and learn about people who intersected with his identity or who GOT him. So he started asking himself questions: What did it mean to be a graphic designer with his point of view? What did it mean to be a Black graphic designer? A Queer graphic designer? Someone from the South? Could his identity be communicated through a poster or a book? How could identity be archived in a design canon that has consistently erased contributions by designers who were not white, straight, and male? In *Black, Queer, & Untold*, acclaimed designer and artist Jon Key answers these questions and manifests the book he and so many others wish they had when they were coming up. He pays tribute to the incredible designers, artists, and people who came before and provides them an enduring, reverential stage - and in doing so, gifts us a book that immediately takes its place among the creative arts canon.

**Status and Culture** W. David Marx, 2022-09-06 Subtly altered how I see the world. —Michelle Goldberg, *New York Times* "[Status and Culture] consistently posits theories I'd never previously considered that instantly feel obvious." —Chuck Klosterman, author of *The Nineties* "Why are you the way that you are? Status and Culture explains nearly everything about the things you choose to be—and how the society we live in takes shape in the process." —B.J. Novak, writer and actor Solving the long-standing mysteries of culture—from the origin of our tastes and identities, to the perpetual cycles of fashions

and fads—through a careful exploration of the fundamental human desire for status All humans share a need to secure their social standing, and this universal motivation structures our behavior, forms our tastes, determines how we live, and ultimately shapes who we are. We can use status, then, to explain why some things become “cool,” how stylistic innovations arise, and why there are constant changes in clothing, music, food, sports, slang, travel, hairstyles, and even dog breeds. In *Status and Culture*, W. David Marx weaves together the wisdom from history, psychology, sociology, anthropology, economics, philosophy, linguistics, semiotics, cultural theory, literary theory, art history, media studies, and neuroscience to demonstrate exactly how individual status seeking creates our cultural ecosystem. Marx examines three fundamental questions: Why do individuals cluster around arbitrary behaviors and take deep meaning from them? How do distinct styles, conventions, and sensibilities emerge? Why do we change behaviors over time and why do some behaviors stick around? The answers then provide new perspectives for understanding the seeming “weightlessness” of internet culture. *Status and Culture* is a book that will appeal to business people, students, creators, and anyone who has ever wondered why things become popular, why their own preferences change over time, and how identity plays out in contemporary society. Readers of this book will walk away with deep and lasting knowledge of the often secret rules of how culture really works.

*Shifts towards Image-centricity in Contemporary Multimodal Practices* Hartmut Stöckl, Helen Caple, Jana Pflaeging, 2020-01-03 This innovative collection builds on current multimodal research to showcase image-centric practices in contemporary media, unpacking the increasing extent to which the visual plays a principal role in modern day communication. The volume begins by providing a concise overview of the history and development of multimodal research with respect to image-centricity, with successive chapters looking at how image-centricity emerges over time, unfolds in relation to language and other features in global design strategies. Bringing together contributions from both established and emerging researchers in multimodality and social semiotics, the book presents case studies on a variety of image-centric genres and domains, including magazines, advertising discourse, multimedia storytelling, and social media platforms. The aims of the book are, to interrogate the new multimodal genres, relations, forms of analysis, and methods of production that emerge from a greater reliance on visual components. Refining and broadening current understandings of image-centricity in today’s media sphere, this collection will be of particular interest to scholars and students in multimodality, social semiotics, applied linguistics, language and media, and discourse analysis.

**Justice on Demand** Tanya Horeck, 2019-11-11 Explores the proliferation of true crime audiovisual texts across multiple media platforms. *Justice on Demand: True Crime in the Digital Streaming Era* offers a theoretical rumination on the question asked in countless blogs and opinion pieces of the last decade: Why are we so obsessed with true crime? Author Tanya Horeck takes this question further: Why is true crime thought to be such a good vehicle for the new modes of viewer/listener engagement favored by online streaming and consumption in the twenty-first century? Examining a range of audiovisual true

crime texts, from podcasts such as Serial and My Favorite Murder to long-form crime documentaries such as The Jinx and Making a Murderer, Horeck considers the extent to which the true crime genre has come to epitomize participatory media culture where the listener/viewer acts as a desktop detective or internet sleuth. While Facebook and Twitter have reinvigorated the notion of the armchair detective, Horeck questions the rhetoric of interactivity surrounding true crime formats and points to the precarity of justice in the social media era. In a cultural moment in which user-generated videos of real-life violence surface with an alarming frequency, Justice on Demand addresses what is at stake in the cultural investment in true crime as packaged mainstream entertainment. Paying close attention to the gendered and racialized dimensions of true crime media, Horeck examines objects that are not commonly considered true crime, including the subgenre of closed-circuit television (CCTV) elevator assault videos and the popularity of trailers for true crime documentaries on YouTube. By analyzing a range of intriguing case studies, Horeck explores how the audience is affectively imagined, addressed, and commodified by contemporary true crime in an on demand mediascape. As a fresh investigation of how contemporary variations of true crime raise significant ethical questions regarding what it means to watch, listen, and witness in a digital era of accessibility, immediacy, and instantaneity, Justice on Demand will be of interest to film, media, and digital studies scholars.

**Rhetorical Criticism** Jim A. Kuypers, 2021-07-19 Covering a broad range of rhetorical perspectives, *Rhetorical Criticism: Perspectives in Action*, third edition presents a well-grounded introduction to the basics of rhetorical criticism and theory in an accessible manner for advanced undergraduate courses and introductory graduate courses. Throughout the text, sample essays written by noted experts in the field provide students with models for writing their own criticisms. In addition to covering traditional modes of rhetorical criticism, the book introduces less commonly discussed rhetorical perspectives as well as orientations toward performing criticisms including close-textual analysis, critical approaches, and analysis of visual and digital rhetoric. The third edition includes the following features: New chapters on visual rhetoric and digital rhetoric Potentials and Pitfalls sections analyzing individual perspectives Activities and discussion questions in each chapter Glossary of important terms

Chocolate Cities Marcus Anthony Hunter, Zandria F. Robinson, 2018-01-16 From Central District Seattle to Harlem to Holly Springs, Black people have built a dynamic network of cities and towns where Black culture is maintained, created, and defended. But imagine—what if current maps of Black life are wrong? *Chocolate Cities* offers a refreshing and persuasive rendering of the United States—a “Black map” that more accurately reflects the lived experiences and the future of Black life in America. Drawing on film, fiction, music, and oral history, Marcus Anthony Hunter and Zandria F. Robinson trace the Black American experience of race, place, and liberation, mapping it from Emancipation to now. As the United States moves toward a majority minority society, *Chocolate Cities* provides a provocative, broad, and necessary assessment of how racial

and ethnic minorities make and change America's social, economic, and political landscape.
