The Bullet Journal Method Ryder Carroll,2021-12 THE NEW YORK TIMES BESTSELLER Transform your life using the Bullet Journal Method, the revolutionary organisational system and worldwide phenomenon. The Bullet Journal Method will undoubtedly transform your life, in more ways than you can imagine' Hal Elrod, author of The Miracle Morning In his long-awaited first book, Ryder Carroll, the creator of the enormously popular Bullet Journal organisational system, explains how to use his method to: * TRACK YOUR PAST: using nothing more than a pen and paper, create a clear, comprehensive, and organised record of your thoughts and goals. * ORDER YOUR PRESENT: find daily calm by prioritising and minimising your workload and tackling your to-do list in a more mindful and productive way. * PLAN YOUR FUTURE: establish and appraise your short-term and long-term goals, plan more complex projects simply and effectively, and live your life with meaning and purpose. Like many of us, Ryder Carroll tried everything to get organised - countless apps, systems, planners, you name it. Nothing really worked. Then he invented his own simple system that required only pen and paper, which he found both effective and calming. He shared his method with a few friends, and before long he had a worldwide viral movement. The system combines elements of a wishlist, a to-do list, and a diary. It helps you identify what matters and set goals accordingly. By breaking long-term goals into small actionable steps, users map out an approachable path towards continual improvement, allowing them to stay focused despite the crush of incoming demands. But this is much more than a time management book. It's also a manifesto for what Ryder calls intentional living: making sure that your beliefs and actions align. Even if you already use a Bullet Journal, this book gives you new exercises to become more calm and focused, new insights on how to prioritise well, and a new awareness of the power of analogue tools in a digital world. *** This book has been printed with three different colour designs, black, Nordic blue and emerald. We are unable to accept requests for a

specific cover. The different covers will be assigned to orders at random. ***

Romancing the Beat Gwen Hayes,2016 What makes a romance novel a romance? How do you write a kissing book?Writing a well-structured romance isn't the same as writing any other genre-something the popular novel and screenwriting guides don't address. The romance arc is made up of its own story beats, and the external plot and theme need to be braided to the romance arc-not the other way around.Told in conversational (and often irreverent) prose, *Romancing the Beat* can be read like you are sitting down to coffee with romance editor and author Gwen Hayes while she explains story structure. The way she does with her clients. Some of whom are regular inhabitants of the New York Times and USA Today bestseller lists.*Romancing the Beat* is a recipe, not a rigid system. The beats don't care if you plot or outline before you write, or if you pants your way through the drafts and do a beat check when you're revising. Pantsers and plotters are both welcome. So sit down, grab a cuppa, and let's talk about kissing books.

Profitable Posts Social Media Marketing Plan to Build an Online Business to Profit Up to Six Figures, 2024-01-22 INTRODUCTION There comes a time when the elastic snaps. When you push yourself to breaking point, and

everything crashes down. My breaking point came on a gloomy Monday morning commute in 2015. Sitting in my car, waiting for the lights to change, I looked at two guys in their cars on either side of me. They looked as miserable as I felt. At that moment, I burst into tears. "What the fuck was I doing with my life?" I was unhappy in my personal life and hated my job. I couldn't see a way out. I was too invested in my career; too old to start again. Looking back, I didn't know jack shit about building a fitness business. Corporate marketing is one thing. Doing everything from scratch alone in a different industry is another. I didn't have a creative agency or a multimillion-pound budget. All I had was a Personal Trainer certificate and the ironparadisefitness.com domain name. Nevertheless, I started building my online empire. Or, as I now refer to it, pissing in the wind for two years. I would write lousy articles, post selfies, and wonder why clients weren't beating down my virtual door. Desperate to carve a way out of corporate life, I vowed not to quit. My business was my obsession. Going out, meeting friends, and taking a break were a rarity. I thought it was the only way to be successful. I became a hermit. A recluse. Like the creepy guy kids fear in horror movies. "That's Old Man Mitchell from No. 29. He never leaves the house." "Some say he only goes outside to dispose of the dead bodies." I wasn't that bad, but my social life went on ice. I studied nutrition and learned the intricacies of exercise mechanics. I read books and invested in courses on social media, copywriting, and web design. Iron Paradise Fitness had consumed my entire life, and I loved it. It was the fire in my belly I'd been missing. The passion I needed. Although, it did make for awkward conversations on Tinder dates. "What do you like to do in your spare time?" The innocent question would come. "Well, I'm building my own business right now, so that's my main focus." "Ah, cool. But what do you like to do for fun?" "Work on my business." "Yeah, but what about when you're not doing that?" "I'm either working on my business, thinking about working on my business, or eating." "Oh!..."

Pettifer, David Thorne, 2016-07-27 This innovative book provides a completely fresh exploration of bioinformatics, investigating its complex interrelationship with biology and computer science. It approaches bioinformatics from a unique perspective, highlighting interdisciplinary gaps that often trap the unwary. The book considers how the need for biological databases drove the evolution of bioinformatics; it reviews bioinformatics basics (including database formats, data-types and current analysis methods), and examines key topics in computer science (including data-structures, identifiers and algorithms), reflecting on their use and abuse in bioinformatics. Bringing these disciplines together, this book is an essential read for those who wish to better understand the challenges for bioinformatics at the interface of biology and computer science, and how to bridge the gaps. It will be an invaluable resource for advanced undergraduate and postgraduate students, and for lecturers, researchers and professionals with an interest in this fascinating, fast-moving discipline and the knotty problems that surround it.
